

Los Herederos De William Golding

Francisco Fernández Buey

Los herederos Golding, William,2022-01-07 A partir de vestigios ancestrales olvidados bajo la tierra, William Golding reconstruye las vidas y las imágenes compartidas de un grupo de neandertales cuyo mundo empieza a desvanecerse cuando olores y visiones desconocidos se hacen presentes y sus miembros van desapareciendo sin explicación alguna. La entrada de nuevos seres en sus vidas, tan distintos pero con intrigantes rasgos en común, significará el fin de una era que dejará paso a los verdaderos herederos de la Tierra: los humanos.

Un viaje por mi biblioteca ,2006

El señor de las moscas de William Golding (Guía de lectura) ResumenExpress,2016-03-14 ResumenExpress.com presenta y analiza en esta guía de lectura El señor de las moscas de William Golding, superventas imprescindible de la literatura inglesa que cuenta la historia de un grupo de niños que se quedan solos en una isla desierta y tratan de organizarse. Las discusiones no tardan en llegar, y tampoco la reflexión implícita sobre la fragilidad de la civilización y la crueldad. ¡Ya no tienes que leer y resumir todo el libro, nosotros lo hemos hecho por ti! Esta guía incluye: • Un resumen completo del libro • Un estudio de los personajes • Las claves de lectura • Pistas para la reflexión ¿Por qué elegir ResumenExpress.com? Para aprender de forma rápida. Porque nuestras publicaciones están escritas con un estilo claro y conciso que te ayudará a ganar tiempo y a entender las obras sin esfuerzo. Disponibles en formato impreso y digital, te acompañarán en tu aventura literaria. Toma una dosis de literatura acelerada con ResumenExpress.com

El Proceso lector en L2/ Marto Redondo Madrigal,1995

Corazones en la Atlántida Stephen King,2012-10-24 Lleno de peligro, lleno de suspense y, sobre todo, lleno de sentimientos, este libro de Stephen King transportará a algunos lectores a un lugar que nunca antes han visitado y a otros, a un lugar que nunca podrán abandonar del todo... Aunque algunos episodios de la década de los sesenta nos parezcan irreales, no son ficticios, ocurrieron de verdad. Stephen King, que ha sido el primer escritor de la generación de la televisión que ha logrado un enorme éxito, publicó en 1974 Carrie, su primera novela, justo un año antes de la retirada de las últimas tropas estadounidenses de Vietnam. Las imágenes de aquella guerra y de las protestas en contra habían inundado las pequeñas pantallas de las casas norteamericanas durante casi diez años, dejando una huella imborrable en toda una generación. En Corazones en la Atlántida, King hipnotiza a sus lectores con una ficción profundamente inspirada en esos

años, los sesenta, y explora, a lo largo de cuatro décadas, los estigmas y la herencia psicológica de la guerra de Vietnam en las personas.

William Golding R. A. Gekoski,Peter A. Grogan,1994

Stephen King. El resplandor del genio Tony Jiménez,2025-08-01 Stephen King. El resplandor del genio es, además de un vibrante recorrido por la vida y obra del maestro del terror contemporáneo, una carta de amor al escritor de Maine que ha marcado a generaciones de lectores y escritores. En este ensayo apasionado y riguroso, Tony Jiménez —voraz estudioso de la ingente obra de King y un consumado erudito sobre su misteriosa figura— se adentra en los entresijos de una producción literaria tan vasta como influyente, analizando no solo sus novelas más emblemáticas (*El resplandor*, *La niebla*, *Carrie...*), sino también sus relatos, las numerosas adaptaciones cinematográficas y su visión del mundo como narrador incansable de las sombras humanas. El resultado arroja un perfil preciso y fascinante de un autor que ha sabido trascender el género para convertirse en un fenómeno cultural, explorando sus obsesiones recurrentes, sus estrategias narrativas y su evolución como figura pública. Este libro ilumina también el impacto de King en la cultura popular y su sorprendente versatilidad, capaz de combinar horror, fantasía, realismo y crítica social con una naturalidad desconcertante. Con un estilo accesible y ameno, este volumen resulta indispensable tanto para lectores habituales del autor como para quienes desean iniciarse en su vasto y fascinante corpus. La mirada de Tony Jiménez invita a redescubrir a Stephen King con nuevos ojos: no solo como el rey del terror, sino como un narrador profundamente humano, atento a los miedos, deseos y fantasmas que pueblan nuestra cotidianidad. Un libro imprescindible para entender por qué, más de medio siglo después de su debut, Stephen King sigue siendo una voz imprescindible en la literatura contemporánea.

Ellos o nosotros Agustín Senderos,2021-12-27 Aurora, joven paleontóloga de una universidad española, obsesionada desde niña por una cueva con pinturas rupestres, consigue, al fin, poder desentrañar sus secretos. Entre los vestigios fósiles encontrados le sorprende la disposición y aparente relación que presenta la amalgama de restos neandertales junto a restos de *Homo sapiens*. Esta relación la lleva a elaborar una sorprendente hipótesis acerca de la relación entre ambas especies de homínidos, a la vez que se replantea la propia sociedad actual frente a la posibilidad de que hubiesen perdurado los neandertales en vez de los sapiens.

Más allá de nuestras mentes Felipe Fernández-Armesto,2020-09-17 «Una historia estimulante sobre cómo la imaginación interactúa con las facultades psicológicas, -emoción, percepción y razón- para formar la historia de la vida humana.» The Wall Street Journal El imaginar (para ver lo que no está presente) es la asombrosa habilidad que ha alimentado el desarrollo y la innovación de los humanos a lo largo de los siglos. Como especie, somos únicos, con nuestra singular capacidad para remodelar el mundo después de ver las imágenes en nuestras mentes. Atravesando distintos campos como los de la ciencia, política, religión, cultura, filosofía e historia, Felipe Fernández-Armesto revela las apasionantes e

inquietantes historias de nuestros saltos imaginativos, desde el primer Homo sapiens hasta nuestros días. A través de ideas innovadoras de la ciencia cognitiva, Fernández-Armesto explora cómo y por qué primero tenemos ideas, y nos da una visión tentadora de cómo somos y qué necesitamos para conseguirlas. Desenterrando evidencias históricas, comienza reconstruyendo el pensamiento de nuestros ancestros del Paleolítico para revelar la sutileza y profundidad de las ideas de los primeros humanos. Un magistral himno a la alegría de la imaginación humana por parte de un maravilloso y elegante pensador, este libro nos muestra que las malas ideas son en muchas ocasiones más influyentes que las buenas ideas, que los pensamientos más antiguos, son en ocasiones los mejores; y que las ideas originales del Occidente en ocasiones vienen del intercambio con un mundo más amplio; y que los pasos del pensamiento innovador están bajo amenaza. La crítica ha dicho... «Escrito con gusto y estilo y con la idea de provocar, este libro es un maravilloso recuento de cómo la imaginación y las ideas han conformado la extraña historia del Homo sapiens durante más de dos mil años.» David Christian, autor de *Origin Story: A Big History of Everything* «Este maravilloso libro cubre muchos temas con autoridad considerable. Felipe Fernández-Armesto es un escritor con un don, guía al lector con astucia sin dejar de ilustrar sus ideas con una prosa ejemplar.» Daniel Lord Smail, autor de *On Deep History and the Brain* «Brillante y profundo, este libro es un estudio magistral sobre los saltos de la imaginación humana, desde el canibalismo hasta nuestra convergencia global de la actualidad. Fernández-Armesto es el líder practicante de la gran historia, y aquí lo demuestra con un gran estudio sobre la historia de la humanidad. Escrito con su sello particular y con un humor retorcido, este libro reta toda suposición que hayas leído sobre quiénes somos y de dónde venimos.» Jerry Brotton, autor de *A History of the World in 12 Maps* «Una ambiciosa historia de las ideas.» Justo Barranco, *La Vanguardia* «Un texto ameno, original e interdisciplinar que recurre a diversas ciencias y materias para explicar la capacidad que tenemos de transformar la realidad remodelándola e ideando otra distinta en nuestras mentes.» El Correo «El intelectual británico Felipe Fernández-Armesto da un salto a la Antropología para centrarse en los mecanismos por los que la imaginación y la capacidad humana para generar ideas se relaciona en nuestro cerebro con las emociones, los sentidos, el entendimiento y la razón. Un texto interdisciplinar.» SUR

Utopías e ilusiones naturales Francisco Fernández Buey, 2007 La obra propone un recorrido a través de la historia de la idea de utopía: desde las tablas sobre la ciudad ideal, pintadas en Urbino en el siglo XV, hasta la utopía libertaria de Ursula K. Le Guin, ya en la segunda mitad del siglo XX, pasando por Thomas More y las principales utopías ilustradas y socialistas.

Premios Nobel de literatura Laura Vaccaro, 2007 Hasta ahora no existía ningún libro escrito por un especialista que hiciera un análisis crítico global de los escritores galardonados con el Premio Nobel, existiendo sólo información enciclopédica superficial y mayoritariamente procedente de fuentes oficiales, lo que bloquea la posibilidad de una mirada crítica del conjunto.

Artículos de prensa Cristián Huneeus,2001

Historia de los perdedores Luis E. Íñigo Fernández,2022-01-07 De los neandertales a las víctimas de la globalización Un homenaje a los agentes de la historia que han quedado fuera de la crónica oficial o han sufrido su desprecio. Dicen que la historia la escriben siempre los vencedores y, al hacerlo, dejan fuera a los perdedores, los ignoran o los tratan de tal manera que provocan hacia ellos desprecio e incluso odio. El pasado debe narrarse como fue, o al menos como el historiador, a la vista de sus fuentes, cree que fue, sin hipotecas de ideas o intereses, desde la honestidad y el rigor intelectual. Y hacerlo así exige dar voz a quienes han sido privados de ella y escuchar al menos su versión de los hechos para construir un relato equilibrado de nuestro acontecer como especie. Historia de los perdedores no habla de guerras ni de batallas; habla de personas, gentes y pueblos. Por sus páginas desfilan herejes y extranjeros, locos y marginados, brujas y mendigos; pero también reyes desheredados, soñadores a destiempo, rebeldes sin causa, amantes de lo prohibido, caminantes sin camino... y pretende, sobre todo, contar la historia de otra forma, distinta a la tradicional. Como escribió Nietzsche: «Necesitamos de la historia, pero la necesitamos de otra manera a como la necesita el holgazán mimado en los jardines del saber».

La naranja mecánica 60 aniversario Anthony Burgess,2022-11-16 EDICIÓN ESPECIAL 60o ANIVERSARIO DE LA NARANJA MECÁNICA. Esta es una edición completamente revisada del texto original de Anthony Burgess de La naranja mecánica, con un glosario de la jerga adolescente 'Nadsat', notas explicativas, páginas del texto mecanografiado original, entrevistas, artículos y reseñas, Editado por Andrew Biswell. A Alex, de quince años, le gustan los latigazos de ultraviolencia. Él y su pandilla de amigos roban, matan y violan en su camino a través de un futuro de pesadilla, hasta que el Estado pone fin a sus desenfrenados excesos. Pero, ¿qué significará su reeducación? Un horror distópico, una comedia negra, una exploración de elección, La naranja mecánica es también un trabajo de invención exuberante que creó un nuevo lenguaje para sus personajes. Edición limitada.

Breve historia de los neandertales Fernando Diez Martín,2011-10-01 En esta obra, el autor nos muestra una gran y detallada visión de esta especie rompiendo muchos de los tópicos habituales sobre la misma y sacando a la luz las últimas novedades de la investigación. Todo ello acompañado de imágenes y reconstrucciones que nos ayudan a comprender mejor parte del texto. (Blog Cientos de miles de historias) Desde los primeros intentos por saber a quién, o a qué, pertenecían aquellos huesos que los trabajadores de una cantera encontraron al desmantelar una de las grutas del valle de Neander, hasta las investigaciones más recientes, Fernando Diez hace un recorrido exhaustivo por la historia del hombre de Neandertal, pero también nos cuenta cómo eran y cómo vivían esos humanos que la evolución histórica dejó atrapados en un camino sin salida. (Web Anika entre libros) La aparición de los primeros restos de Neandertales supuso una revolución científica y un golpe a los mismos cimientos de los sectores religiosos más dogmáticos. La aparición de los primeros fósiles humanos en el valle de Neander, en 1856, supuso una auténtica revolución, tanto científica como en el resto de disciplinas.

Suponía la confirmación de que las tesis de Darwin y Huxley eran aplicables también a los humanos y, con ello, daba un duro revés al dogma religioso ya que destruía la idea del ser humano creado a imagen y semejanza de Dios: corroboraba que el hombre, como el resto de animales, era fruto de un proceso evolutivo. Breve Historia de los Neandertales nos sumerge de lleno en esa polémica y nos recrea a esta especie que habitó la Europa glaciar. Fernando Diez Martín nos presenta la historia del Homo neanderthalensis desde la migración de su antecedente directo, el Homo heidelbergensis, la adaptación al clima glaciar de Europa da lugar a una nueva especie.

Cómo razonamos Philip Johnson-Laird, 2018-07-31 ¿Por qué hay quien es un experto razonador y quien es un zoquete? ¿Qué es lo que provoca errores en nuestro razonamiento que pueden llevar a catástrofes como la de Chernobyl? ¿Cómo podemos mejorar nuestro razonamiento? ¿Cómo es posible que tengamos opiniones inconsistentes? ¿Cómo pueden los prestidigitadores inventar ilusiones que nos confunden? ¿Por qué modificamos algunas creencias pero nos aferramos a otras casi sin esfuerzo? ¿Por qué hay quien desarrolla temores irracionales? ¿Por qué los terroristas desarrollan ideologías peligrosas? ¿Por qué cree la gente que existen las brujas, que la Tierra es plana y que solo tiene cuatro mil años de existencia? ¿Por qué en los sistemas legales reales se producen paradojas similares a Trampa-22? ¿No somos racionales? Y, si lo somos, ¿cómo es posible si nunca nos han enseñado lógica? Este libro aborda todas estas cuestiones, porque todas dependen de cómo razonamos.

Lenguaje y silencio George Steiner, 2020-04-16 ¿Cómo debemos valorar la función del lenguaje después de que haya servido para expresar falsedades en los regímenes totalitarios, después de que haya sido arrastrado a la vulgaridad y la imprecisión de las democracias de consumo masificado? ¿Cómo responderá el lenguaje futuro a las exigencias científicas de expresiones más exactas, como la matemática o la lógica? Steiner consagra este volumen a la vida del lenguaje a través de los tiempos, desde la Grecia clásica y la Edad Media hasta los logros siempre inalcanzables de Shakespeare, las luces y sombras de Baudelaire, Kafka, Thomas Mann, Broch o Beckett. Sus reflexiones se centran en las posibilidades de los distintos géneros literarios y en las sacudidas que las complejas energías de las palabras provocan en nuestro mundo, pero también evoca los límites del lenguaje. Ante los extremos de lo atroz o lo sublime parece imponerse el silencio. Sin embargo, a los seres hablantes el lenguaje impone el deber de transmitir incluso aquellas experiencias que están en el límite de poder articularse.
