Malaysia International Monetary Fund. Asia and Pacific Dept,2015-03-03 This 2014 Article IV Consultation highlights that Malaysia's well-diversified economy continued to perform well in 2014. Growth accelerated to 5.9 percent, aided by robust domestic private demand and a recovery in exports. Lower energy costs helped contain inflation to 3.1 percent despite the removal of fuel subsidies and increase in electricity tariffs. Growth is expected to moderate to 4.8 percent in 2015. Strong investment momentum should help offset headwinds from continued fiscal consolidation. Lower energy prices will be a drag on oil and gas production but should provide a boost to the large non-oil sector.

Malaysia International Monetary,International Monetary Fund. Asia and Pacific Dept,2023-06 Malaysia registered a strong economic recovery in 2022, backed by its well diversified economy, sound policy frameworks, and commodity exporter status. While monetary policy started a gradual post-pandemic normalization, record costly spending on fuel subsidies broadly kept inflationary pressures suppressed in 2022. Meanwhile, the new national unity government has signaled its commitment to the reform priorities outlined in the Twelfth Malaysia Plan (12MP) and the 2023 Budget to propel the economy toward net-zero greenhouse gas emissions and high-income status.

OECD Economic Surveys: Malaysia 2024 OECD, 2024-08-27 Sustained rapid and inclusive economic growth for half a century has brought Malaysia close to the threshold of high-income status. Growth is now accelerating, driven mostly by domestic demand. Exports are also set to rebound amid stronger external demand. The economy has been resilient to recent shocks, and inflation has remained contained. A new fiscal framework provides a good basis for the needed fiscal consolidation, but rising spending needs will require mobilising additional tax revenues. Improving the targeting of social protection while raising social assistance coverage and benefit levels would allow stronger reductions of poverty and inequality. Better access to childcare and a better alignment of tertiary education curriculums with labour market needs would allow more workers, especially women, to participate in the labour market and find jobs that match their skills. Addressing climate change requires phasing out fossil fuel subsidies and a stronger role for carbon pricing, complemented by stricter regulations. Better disaster risk financing and insurance could bolster adaptation efforts. SPECIAL FEATURES: SMALL AND MEDIUM-SIZED ENTERPRISES; BOOSTING PRODUCTIVITY; SOCIAL PROTECTION; GREEN GROWTH

Malaysia's Development Challenges Hal Hill,Tham Siew Yean,Ragayah Haji Mat Zin,2013-07-03 This book examines the various economic, political and developmental policy challenges that Malaysia faces in her shift from a middle income to high-income economy. This issue is of great interest to academics, policy makers and development practitioners in the developing world, particularly in middle-income economies where there is a widespread concern about the challenges of managing such a transition. Malaysia is one of the developing world's greatest success stories. The book argues that as one of the developing world's most open economies, with a reputation for prudent macroeconomic management, Malaysia has achieved consistent growth since independence. It has moved from a largely resource-based economy to a multinational-led, export-oriented, industrial economy. Despite this success, Malaysia, like other developing countries, is currently at a crossroads in its development strategy; it is in danger of being unable to graduate to the level of more advanced economies - such as Korea, Taiwan and Singapore - but with the basis of its success at risk from competition from efficient, lower-wage countries - such as China, India and Vietnam. Moreover, there are new threats to the political stability and affirmative action programmes which have successfully held together a very racially diverse population.

Energy Conservation in East Asia Elspeth Thomson,Youngho Chang,Jae-Seung Lee,2011 As East and Southeast Asia continue to modernize and urbanize, their demand for energy will soar. Besides seeking to import fossil fuels from the Middle East, Africa, the Caspian Region, Russia, Latin America, Australia, etc., it is imperative for these Asian countries to cooperate in substantially raising the efficiency with which energy is consumed. This book offers a comprehensive examination of East and Southeast Asia's energy conservation policies. It begins with a summary of the current and projected energy supply and demand patterns in the region, and a discussion about the need and basis for cooperation in energy conservation. This is followed by an examination of the energy conservation policies and progress to date in seven ASEAN countries and in China, Japan and Korea.

Energy and Non-Traditional Security (NTS) in Asia Mely Caballero-Anthony,Youngho Chang,Nur Azha Putra,2012-06-07 Traditional notions of security are premised on the primacy of state security. In relation to energy security, traditional policy thinking has focused on ensuring supply without much emphasis on socioeconomic and environmental impacts. Non-

traditional security (NTS) scholars argue that threats to human security have become increasingly prominent since the end of the Cold War, and that it is thus critical to adopt a holistic and multidisciplinary approach in addressing rising energy needs. This volume represents the perspectives of scholars from across Asia, looking at diverse aspects of energy security through a non-traditional security lens. The issues covered include environmental and socioeconomic impacts, the role of the market, the role of civil society, energy sustainability and policy trends in the ASEAN region.

Indonesia International Monetary Fund. Asia and Pacific Dept,2015-03-19 This 2014 Article IV Consultation highlights that sound macroeconomic management and exchange rate flexibility have bolstered policy credibility and external resiliency in Indonesia over the past 18 months. In the face of Federal Reserve tapering and headwinds posed by slumping commodity prices, policy and reserve buffers have been strengthened through a clearer policy framework and better policy coordination. Notwithstanding commodity sector developments and global risk factors, the near-term outlook is broadly positive. Looking ahead, the main challenge for Indonesia is to chart a course to higher, more inclusive growth, while preserving macrofinancial stability and further strengthening the external position.
