Psicopatología forense Eric García-López, 2022-08-17 Este libro representa el panorama más actualizado de la Psicología Jurídica, Criminológica y Forense en América Latina. Para crearlo, el Director de la obra convocó investigadores de 40

instituciones (universidades, fiscalías, poderes judiciales y centros de investigación) de Alemania, Argentina, Canadá, Chile, Colombia, España, Estados Unidos y México. Científicos del comportamiento humano (psicólogos, neuropsicólogos y neurofisiólogos), juristas expertos y forenses de rotunda experiencia, analizan conceptos y aplicaciones a poblaciones específicas, como los agresores sexuales, los adolescentes en conflicto con la ley penal y los psicópatas. Además, se analizan temas selectos de justicia restaurativa, violencia intrafamiliar, divorcio y custodia de los hijos, alienación parental, mediación, acoso (laboral-mobbing y escolar-bullying), así como la atención y evaluación general a víctimas de tortura. El lector tiene en sus manos una obra imprescindible para aquellos estudiosos(as) de las complejas interacciones entre psicopatología y derecho, entre atención a víctimas y derechos humanos, entre agresores y prevención del riesgo de violencia, entre comportamiento humano y tribunales de justicia.

Perfiles diferenciales en mujeres víctimas de violencia en sus relaciones de pareja María del Rosario Villegas Marín,2019-12-13 Este trabajo presenta una investigación con 405 mujeres, de las cuales 196 constituían el grupo de víctimas de malos tratos en su relación de pareja (IPV). Se han analizado las características sociodemográficas de la muestra, y se ha aplicado el Inventario Clínico Multiaxial de Millon (MCMI-III), así como el AAQ-VP (Cuestionario de Aceptación Acción en situaciones de Violencia en pareja) y el AAQ-II (Cuestionario de Aceptación y Acción), con el fin de valorar características de personalidad, síndromes clínicos y Evitación Experiencial (EE). Se inicia el trabajo con un estudio instrumental mediante el Análisis Factorial Exploratorio (AFE) y el Confirmatorio (AFC), para ratificar los resultados de un estudio piloto previo respecto al AAQ-VP, como medida de la EE en una relación de violencia de pareja. Los resultados apoyaron una versión de 7 ítems con una estructura de un único factor, que refleja las construcciones latentes, resultando una medida fiable. Seguidamente se estudia la prevalencia y porcentajes de los rasgos clínicos de personalidad y de síndromes clínicos en ambos grupos, así como los niveles de EE. Los perfiles de mayor vulnerabilidad para IPV resultaron Evitativos, Dependientes o Depresivos, si bien, cuando los perfiles se conjugan con otras variables se reduce su poder predictivo. Los Síndromes Clínicos más prevalentes, como consecuencia de ser víctima de malos tratos, resultaron TT de Ansiedad, Distímico y Trastorno por Estrés Postraumático. La topografía más prevalente, casi del 100%, son los malos tratos psicológicos. Finalmente, se explora el valor predictivo del conjunto de variables que han resultado significativas en los

análisis bivariados, resultando factores de riesgo: el desempleo, estar sin pareja, haber sido víctimas previamente, elevada evitación experiencial, perfil Dependiente de personalidad, y alta Deseabilidad Social.

Psicología del desarrollo Yanisleidy Hernández Romero, Sarai Andrea Chimal Hernández, 2022-02-11 Psicología del desarrollo. Una perspectiva clínica nos muestra una versión actualizada del tema, incluyendo una guía de cómo realizar una consulta psicológica desde el ámbito clínico, ya que es un tema clásico en el estudio de la psicología actual y de uso diario en la práctica de dicha profesión. Se aborda a lo largo de siete capítulos todas las edades del desarrollo, partiendo de la psicología como ciencia, dando un enfoque lógico e integrador que abarca desde la lactancia hasta la tercera edad, teniendo en cuenta todas las regularidades de su desarrollo mediante un enfoque biopsicosocial e integrador de cada edad. Presenta, además, las técnicas de evaluación psicológicas correspondientes a cada una de estas etapas y su justificación, de manera que sea un volumen lo más completo posible para sus lectores, sirviendo de consulta tanto para estudiantes de pregrado de psicología y medicina, como para profesionales de las ciencias de la salud y psicológicas en general.

Evaluación psicológica: modelos y técnicas Teresa Kirchner, Mercedes Torres, Maria Forns, 1998 Los padres de un niño acuden al psicólogo porque su hijo presenta problemas escolares. Como interpretara estas dificultades un profesional adscrito al modelo psicoanalítico? Y uno de línea conductual cognitiva? Que tests le administraran a este niño desde el modelo de rasgos? Que haria un conductista para solucionar su problema? Por otra parte, sabia usted que la depresion puede interpretarse, segun la línea conceptual de partida, como la ausencia de refuerzos positivos en la historia vital del sujeto, o como la consecuencia de problemas tempranos con la figura materna, o bien como el resultado de haber sometido a un niño a unas altas exigencias a cambio de darle el cariño que necesita? Este es justamente el objetivo de este libro: brindar algunas de las principales alternativas que coexisten en estos momentos en el panorama de la evaluación psicológica y relacionarlas con los instrumentos de medida diseñados para evaluar las bases de la conducta. Y así el lector neofito podrá tener una visión amplia y objetiva de las distintas formas de operar en psicología aplicada, y el estudiante o incluso el profesional de la docencia dispondrá de una guía en la práctica de su profesión para decantarse, de forma razonada, por la alternativa más acorde con su concepción de las causas de la conducta humana.

New Methodological, Intervention and Neuroscientific Perspectives in Sports Psychology, volume II Antonio Hernández-Mendo, Jose María Carames Tejedor, M. Teresa Anguera, Verónica Morales-Sánchez, 2025-06-26 This Research Topic is the second volume of the Research Topic New Methodological, Intervention and Neuroscientific Perspectives in Sports Psychology. Please see the first volume here. Within the discipline of sport psychology, considerable work involves the development, implementation, and evaluation of interventions to improve the world of sport. The importance of theory as a basis for such intervention efforts has been strongly emphasized. In recent years, research has shown that there are three

factors on which to base future developments: methodological innovations (e.g. Mixed Methods), new intervention approaches (e.g. Empowering/Disempowering Climates) and advances in neuroscience (e.g. inhibitory circuits). Regarding methodological innovations, the importance of mixed methods in this field is highlighted by their profound significance. Indeed, procedural innovations with direct and indirect observational data has allowed the observational methodology to be considered as a mixed method in itself. This approach has been implemented in recent years in many publications relating to various sports. Other methodological advances involve the evolution of structural equation analysis. For example, the increasing use of invariance analysis, mediation analysis, PLS software (which allows non-normal samples), multilevel analysis, generalizability analysis, and the graphical evolution of data with programs such as Neo4j.

Evaluación y tratamiento psicopedagógicos Ana Salvador Alcaide, 2021-04-23 El presente libro está especialmente dirigido a psicólogos y pedagogos que se enfrentan con las tareas propias del Departamento de Orientación, en un centro educativo. Estas tareas son complejas, difíciles y de una gran responsabilidad, y van encaminadas a enriquecer el proceso educativo en todos sus ámbitos. Por tanto, de la forma en que se lleven a cabo y de su rigor y eficacia, depende en gran medida el que ese derecho esencial del alumno a la ayuda, que a lo largo de toda su escolaridad le debe proporcionar el Departamento de Orientación, se convierta en una realidad fructífera y bien lograda. En esta tercera edición se han incorporado las últimas novedades legislativas y se ha actualizado el capítulo dedicado a la ética profesional con los principios éticos básicos del orientador. También se ha hecho una revisión bibliográfica de la obra. Finalmente se aportan novedades importantes, en los Anexos, con la incorporación de dos técnicas muy actuales, la Batería IGF (1995) de Yuste y el ACRA (1994) de Román y Gallego sobre Estrategias de aprendizaje. La intención de la autora ha sido poner en manos de los responsables de la orientación escolar, casi un manual que exponga de manera clara y práctica dichas tareas, poniendo a contribución su ya larga experiencia en este ejercicio profesional.

Gisbert Calabuig, Villanueva Cañadas. Medicina legal y toxicología Marina Gisbert Grifo, Aurelio Luna Maldonado, María Castellano Arroyo, 2024-06-14 - Abarca todos los campos de la Medicina legal y sus áreas de conocimiento. - Se recogen las nuevas técnicas y teorías científicas. - Se actualizan las legislaciones española, europea e internacional. Se presta una especial atención al campo jurídico. - Se orienta a resolver problemas médico-legales, de ahí que se parta siempre de por qué se hace la pericia para entonces deducir cómo se resuelve. - Se amplían campos como la Valoración del Daño Corporal, el Derecho sanitario y la violencia contra la mujer, entre otros, manteniendo los clásicos de la Toxicología, la Psiquiatría forense y la Criminalística. - Se parte del principio de que cualquier médico puede ser llamado por un juez en auxilio de la administración de justicia, por lo que precisa una fuente de la que obtener conocimientos ciertos, rigurosos, prudentes, matizados y sometidos a la crítica de la experiencia de profesionales experimentados. Considerado desde hace más de 50 años «el libro de legal», esta octava edición de Medicina legal y Toxicología mantiene la misma personalidad y filosofía que

siempre tuvo. Un libro completo —holístico se podría decir— que abarca el complejo mundo de la Medicina legal en sus diversos campos y objetos de estudio. Un libro clásico en su estructura y moderno en sus contenidos, que aborda aquellos temas que más interesan al médico de hoy desde la perspectiva de la Medicina legal y forense. El médico, en el ejercicio de cualquier especialidad, plaza o lugar, ha de formular cuatro juicios a la cabecera del paciente: el clínico, el médico-legal, el ético y el económico. El lector encontrará en este tratado cumplida respuesta al menos a dos de estas cuestiones: la médico-legal y la ético-deontológica. Esta obra va dirigida a los especialistas que cultivan el amplio campo de la Medicina legal y forense, opositores al Cuerpo Nacional de Médicos Forenses, estudiantes del grado de Medicina, MIR de Medicina legal y forense, operadores del Derecho, criminólogos, profesionales de instituciones penitenciarias, psicólogos y policía científica, entre otros.
