The Secret History of the American Empire John Perkins, 2007

The Secret History of the American Empire John Perkins, 2007 Perkins, author of *Confessions of an Economic Hit Man*, zeroes in on hot spots around the world and, drawing on interviews with other hit men, jackals (CIA operatives), reporters, and activists, examines the current geopolitical crisis. Instability is the norm: It's clear that the world we've created is dangerous and no longer sustainable. How did we get here? Who's responsible? What good have we done and at what cost? And what can we do to change things for the next generations? Perkins reveals the secret history behind the events that have created the American Empire, including: the current Latin American revolution and its lessons for democracy; how the defeats in Vietnam and Iraq benefited big business; the role of Israel as Fortress America in the Middle East; tragic repercussions of the IMF's Asian Economic Collapse; U.S. blunders in Tibet, Congo, Lebanon, and Venezuela; jackal forays to assassinate democratic presidents. Alarming yet hopeful, this book provides a compassionate plan to reimagine our world.--From publisher description

The State of the American Mind: Stupor and Pathetic Docility Volume II Amechi Okolo, 2010-06-11 This book, *The State of the American Mind: Stupor and Pathetic Docility Volume One* begins to unravel some of the most obvious, perplexing, embarrassing and enduring problems and contradictions of American history and sociology, viz., how could the American revolution that started with the most ringing and most inspiring Declarations of human equality in world history end up establishing the most vicious, exploitative society the world ever knew Black chattel slavery and only ten percent

white enfranchisement, etc. Further, how could men of such great wisdom and intellect like George Washington, James Madison, Thomas Jefferson, and others who were Enlightenment scholars and clearly knew that slavery was despicable and evil, because they had variously experienced white servitude and slavery themselves, collude to establish and institutionalize the horrible system of Negro chattel slavery in America; and also disenfranchised over 90 percent of people of their own race actions that racism could not explain. The structural/institutional slavery system they established, and the resultant consequent racism hobbles America today as it did in the past, and forced Eric Holder, the Attorney General to declare that, America is a nation of cowards, when it comes to race discussions. Thus, this book starts with serious critical discussions of race in America and reveals what no textbook has ever done, viz., that most early American whites and Blacks were slaves an uncomfortable fact that would shock most Americans because it contradicts the orthodoxy or the dominant narrative that only Blacks were brought here in chains. Further, the book also shows the year Black slavery started something almost, all textbooks got wrong. It also shows who, was the first Black slave in America something no textbook ever mentions. It also shows when and how racism started in America and many other very sensitive and embarrassing but necessary issues that America avoids but must be frankly discussed for America to move forward. This book therefore shatters the two dominant themes of Americas history and sociology that Blacks were brought into America in chains as slaves while whites came to America in search of freedom, as Harvard educated President Obama famously told us in his race speech. Thus, the crowning lesson of this book, in addition to discussing some critical policy issues like education, health care, etc., is that it discovers the centripetal force of the American society that eluded contemporary Americans because American bosses have laboriously concealed the facts from the public the scary but clearly healthy uniting fact that most Americans are united by their common ancestry, their universal history and experience of servitude, bond-indentures and slavery. Nothing is more universal, more common and more shared in American history and sociology than the fact that most of our ancestors, black and white, were servants, bond-indentures and slaves who were dominated and super-exploited by few overlords. Colonial America was the preferred dumping ground for British, outcasts, rejects, criminals, masterless class, vagabonds, bond-indentures, slaves, etc., until 1776 when Australia replaced America as the British dump for its rejects and surplus citizens. Thus, that America was a nation founded by British rejects and losers is inherently more rational than the prevailing orthodoxy or the Obama theory of Americas founders that they were great honorable men who journeyed across the ocean for freedom because of the obvious reason that good, powerful achieving citizens do not normally emigrate to new uncharted lands.

American Heart of Darkness Robert Kirkconnell, 2013-05-21 These days, most Americans know that the country has serious problems. Problems that will have to be addressed before the country can move forward. What are these problems? Where did they come from? Before we can move forward we have to know where we are and how we got there. American

Heart of Darkness paints an unvarnished picture of the seeds of destruction that were sown into the foundations of the Republic from the very beginning. How did slavery come about in the land of the free? How did a pre-Columbian native population, in North America alone, of over eighteen million (yes, you heard it right) native peoples dwindle down to about two hundred thousand? Was it really Small Pox? Why has a people who constantly talk about freedom, democracy, equality, human rights, life, liberty, and the pursuit of happiness continually practiced racism, genocide, and war? How do drugs come into the country, and who is really behind the most profitable product sold in the world? There are also other unanswered questions that need to be explored: Why were thousands of the worst Nazi war criminals given refuge in the U.S.? Who financed Hitler? Where did Hitler get his master race and genocidal ideas from? Was Lee Harvey Oswald a C.I.A. agent? Were Oswald, Sirhan Sirhan, Ted Kaczynski, Timothy McVey, and the Peoples Temple all mind control, MKULTRA, subjects? What really happened in the Jeffery MacDonald, so-called Fatal Vision case? How does hundreds of billions of dollars come into the United States every year without detection? The answers to these questions, and many more, will surprise you! They are not in the History books, although they should be. American Heart of Darkness, Volume I, explores the ugly side of America that has been hidden for far too long, and it is literally killing us. This book is not for the reader looking for an uplifting story to escape everyday life for a few hours. It is for true patriots who are sick and tired of being lied to and stolen from. It is for those who know they need to do something but do not know where to start. It is for those who feel powerless and that Americas problems are far too big for little ol me to handle. It is for those with the courage to go from darkness to light. As comedian and activist Dick Gregory once said, If you been in the DARK for so long, LIGHT will hurt your eyes. This book will hurt your eyes. The reader will be shocked, then angry, then motivated, and finally, in the authors next two books, empowered and liberated. It is better to see where we are and where we need to go, right now, before it is too late. Congratulations! If you have read this far this book is probably for you. Please keep in mind the universal truth that with any form of government, the leaders only have the power that the people allow them have. This was true in India when a little skinny guy named Gandhi with no money and only a rag wrapped around his middle took on the British Empire, and won! There is no question that the American people have the power to reclaim a government that is clearly not being run for them. We have to empower ourselves to take this government back from only a handful of selfish and greedy individuals, who have proven that they only care about making more and more money. Let us all stop giving them the power that belongs to us. Reading this book is a beginning, and then we will talk about what to do about it in the authors next two books!

Afrosolian Knowledge and Cheikh Anta Diop François Ngoa Kodena, 2023-07-03 Afrosolian Knowledge and Cheikh Anta Diop: Geo-Ethical and Political Implications wrestles with the cultural, epistemological, ethical, and geopolitical conundrums of our contemporary world. The book offers fresh conceptual and dialogical frameworks that allow the reader to explore alternative perspectives on the axiological impasses of philosophia. A cultural slide from Greek to Afrikan terrain

offers a novel semantic trove, namely sofia in the Beti Mvett. Therefore, sophia calls for sofia, the trope for subjective and social “solarization.” François Ngoa Kodena argues that sofia is a psychological, discursive, social, and civilizational sickle constantly sharpened to weed barbarism in its alienating, imperial-colonial, mental, linguistic, racist, and prejudicial overtones from private and public spheres. Kodena’s methodology is direct and trans-disciplinary; his overall ontological outlook is curative and conciliatory. After expounding an Afrosolian-Antadiopian paradigm, the author undertakes an in-depth examination of Cheikh Anta Diop’s epistemology to uncover its subtle underlying threads connecting sofia to the Kemetic cosmic law of becoming called kheper. Contemporary humanity is thus faced with a crucial dilemma: civilization or barbarism? The former informs earthly existential struggles and epistemic Afrosolian practices.

Why It's OK to Be a Moderate Marcus Arvan, 2025-03-17 Conservatives and progressives rarely agree on much—but one thing many agree upon is that it’s not OK to be a moderate. This book shows they are wrong. In *Why It’s OK to Be a Moderate*, Marcus Arvan shows how many of history’s worst evils have resulted from far-right and far-left radicalism, how escalating conflicts between conservatives and progressives are undermining democracy, and how many widely hailed social and political achievements have been achieved by moderates and radicals working in constructive tension with each other. Using philosophy, science, and historical analysis, Arvan shows that critics of moderates tend to equate them with spineless centrists, but that most moderates aren’t centrists, falling into diverse categories across the political spectrum. Arvan then shows that although radicals tend to be popular in their era, many of them have gone down in infamy, while many moderates, like Abraham Lincoln or Clement Attlee, have endured short-term unpopularity to “make history.” Arvan shows that it’s OK to be a moderate precisely because not everyone should be one. He makes this case to you, showing that whatever your reasonable political ideology may be, things tend to go best politically when radicals and moderates effectively complement each other’s virtues while counterbalancing the other’s vices. **Key Features** Uses science and historical analysis to show that while liberals and conservatives may have some political virtues, radicals on both sides of the political spectrum tend to display twelve political vices that undermine democracy Explores how Aristotle’s idea of the “Golden Mean” and Buddhism’s “Middle Way” might be used to better understand far-left and far-right mistakes in the UK, US, Continental Europe, and India Shows how moderates are a leading political demographic, existing in greater numbers than liberals or conservatives while falling into diverse categories across the political spectrum Documents how radicalism has underwritten many of history’s worst political events, along with many of the most widely acknowledged political problems of the 20th and 21st centuries Demonstrates to the reader that things tend to go best politically when radicals and moderates work in constructive tension with each other, and worst when there aren’t enough moderates

Imperialism and Expansionism in American History Chris J. Magoc, David Bernstein, 2015-12-14 This four-volume encyclopedia chronicles the historical roots of the United States' current military dominance, documenting its growth from

continental expansionism to hemispheric hegemony to global empire. This groundbreaking four-volume encyclopedia offers sweeping coverage of a subject central to American history and of urgent importance today as the nation wrestles with a global imperial posture and the long-term viability of the largest military establishment in human history. The work features more than 650 entries encompassing the full scope of American expansionism and imperialism from the colonial era through the 21st-century War on Terror. Readers will learn about U.S.-Native American conflicts; 19th-century land laws; early forays overseas, for example, the opening of Japan; and America's imperial conflicts in Cuba and the Philippines. U.S. interests in Latin America are explored, as are the often-forgotten ambitions that lay behind the nation's involvement in the World Wars. The work also offers extensive coverage of the Cold War and today's ongoing conflicts in Iraq, Afghanistan, Africa, and the Middle East as they relate to U.S. national interests. Notable individuals, including American statesmen, military commanders, influential public figures, and anti-imperialists are covered as well. The inclusion of cultural elements of American expansionism and imperialism—for example, Hollywood films and protest music—helps distinguish this set from other more limited works.

Gifts of an Uncommon Life Howard E. Friend, Jr., 2008-11-24 This book of ten essays is a breath of fresh air, a source of inspiration, a wake-up call, and a bold challenge for pastors, congregational leaders, and church members--both active and lapsed--who long for a new perspective, even a touch of creative irreverence. With an invitation to quietness and stillness, inner strength and resilience, audacious hope and insistent confidence, it welcomes those among the people of God who do not belong to a church or even name themselves as Christian. Yet it does not shy away from raising difficult questions. Howard Friend offers forthright, at times disarming, candor as he shares his personal pilgrimage of activism rooted in contemplation. Convinced that God still seeks to work in and through the church, Friend shows us where God is present--at times despite the church itself. In his opinion, the church needs to stir the pot, upset the applecart, and dare to welcome the new and refreshing. Yet Friend remains hopeful for and committed to the church, calling and equipping it to become its highest and best. Drawing on a range of stories from the Bible and his own lived experiences, Friend invites us to meet real people--pastors, leaders, everyday folks--who dare to dream a new dream, journey toward a far horizon, walk with tireless determination, and press on with awesome hope.

Ameroca's New World Order Chris Tyson, 2011-10 What if the United States of America had a secret destiny that was known by only an enlightened few? Purpose Beyond 2012 Wj Reichertz, 2012 Like many Americans, Ricky Vogt was searching for a career and purpose during the fallout from America's 2008 economic implosion. At the same time the nation was searching to resolve energy, environmental, and economic problems within a dysfunctional political system. This story explains how Vogt joined his fellow Americans as they fought amongst themselves in search of a better vision. He questions how community resolves the tension between intolerance and personal liberty; between the selfishness of trickle-down economics and the ideals of spirituality and our founding documents promoting the common good. The book depicts Vogt's evolving search for better solutions and a new way forward.

Veteran's Notes Scott Albright, 2012-03-06 On March 19, 2003 the U.S. military launched one of the most massive land invasions in the history of warfare. Ten years later many of the same American soldiers and Marines who served during that

invasion are now missing limbs, dead from suicide, medicated for psychological disorders, unemployed, or struggling with little income and piles of debt. Veterans Notes explains these issues through the eyes of Scott Albright, a former Marine who was deployed twice to Iraq during his time in service from 2000-2004. Read Scott's notes, thoughts, newspaper articles, and blog posts to learn about important domestic and foreign policy issues involving information operations, humanitarian assistance, approaches to peace, and veterans health & education. Veterans Notes provides a unique perspective on issues soldiers face after serving in war zones and then returning to normal civilian life shortly after. Scott brings those issues home so readers can better understand America's heroes and make the changes necessary to prevent future conflicts from occurring.

The "Nonsense" Papers James W. Astrada, 2012-09-17 The idea of aliens and UFOs has always played a crucial role in human history. Regardless of the ridicule this mind-set inspires in skeptics, the intense speculation and debate on this topic continues to intrigue around the world. Hundreds have shared detailed personal experiences of contact with these beings or crafts, recounting a wide variety of alien interaction with our world and its peoples. Yet the official explanations swamp gas, weather balloons, and more just don't match up with these reports. The Nonsense Papers anthology explores these controversial and contemporary issues, considering a wide variety of interrelated topics: UFOs Military black projects based on alien technology Former NASA missions (and the possible secrets they hold) An alternative view on organized religious cults (and how their origin by our creators from the stars) Environmental issues, including climate change Time travel Testimonies from those who offer insight on alien contact The future and fate of our planet after 2012 This collection also focuses on humanity and culture, examining where we are headed if we continue down our current path. It questions those who plan to save humanity by making exaggerated claims and impossible goals and challenges us to analyze and examine ourselves and our society as a whole. It implores humans to use common sense, rationality, and logic as our present life seems void of feelings, dreams, hopes, and desires. Overall, the only way humans can save these precious ideologies is in the discovery of ourselves.

Business of Civil War Patience Kabamba, 2013 Within the context of the absence of effective state sovereignty and the presence of numerous armed struggles for power, Nande traders have managed to build and protect self-sustaining, prosperous, transnational economic enterprises in eastern Congo. This book discusses the commercial enterprises of the Nande trust networks and the subsequent transnational community they have produced, thereby challenging the assumption that a weak state or a failed state or even a collapsed state can be presumed to signal a failed society. It demonstrates the fact that several sovereignties and property right systems can coexist side by side, reinforcing each other - an idea which seems inconceivable for those with a normative view of governmental institutions and state sovereignty. Rethinking the question of African state formation, the study contributes to the formulation of a more rigorously transnational and local paradigms in the study of post-colonial African state formations. It constitutes an original contribution to critical theory of societal responses to processes of state implosion, and the anthropology of new social formations that emerge when states disintegrate, especially in war-torn Africa. The book also discusses issues related to the dynamics of conflict, new state formation, transnational trade network, ethnicity, and global political and economic governance. In the midst of abundant anti-ethnic literature on African studies, this study posits that there may be a renewed usefulness and necessity in theorizing the salience and continuing production of 'ethnic' differences in a manner that challenges the notion of ethnicity as merely a devious and divisive invention of colonialism that must simply be overcome.
