**Minority Languages, National Languages, and Official Language Policies** Gillian Lane-Mercier, Denise Merkle, Jane Koustas, 2018-12-30 In a context where linguistic and cultural diversity is characterized by ever-increasing complexity, adopting official multilingual policies to correct a country's ethno-linguistic, socio-economic, and symbolic imbalances presents many obstacles, but the greatest challenge is implementing them effectively. To what degree and in what ways have official multilingualism and multiculturalism policies actually succeeded in attaining their goals? Questioning and challenging foundational concepts, *Minority Languages, National Languages, and Official Language Policies* highlights the extent to which governments and international bodies are unable to manage complex linguistic and cultural diversity on an effective and sustained basis. This volume examines the principles, theory, intentions, and outcomes of official policies of multilingualism at the city, regional, and national levels through a series of international case studies. The eleven chapters – most focusing on lesser-known geopolitical contexts and languages – bring to the fore the many paradoxes that underlie the concept of diversity, lived experiences of and attitudes toward linguistic and cultural diversity, and the official multilingual policies designed to legally enhance, protect, or constrain otherness. An authoritative source of new and updated information, offering fresh interpretations and analyses of evolving sociolinguistic and political phenomena in today's global world, *Minority Languages, National Languages, and Official Language Policies* demonstrates how language policies often fail to deal appropriately or adequately with the issues they are designed to solve.

**The Cambridge Handbook of Heritage Languages and Linguistics** Silvina Montrul, Maria Polinsky, 2021-11-25 Heritage languages are minority languages learned in a bilingual environment. These include immigrant languages, aboriginal or indigenous languages and historical minority languages. In the last two decades, heritage languages have become central to many areas of linguistic research, from bilingual language acquisition, education and language policies, to theoretical linguistics. Bringing together contributions from a team of internationally renowned experts, this Handbook provides a state-of-the-art overview of this emerging area of study from a number of different perspectives, ranging from theoretical linguistics to language education and pedagogy. Presenting comprehensive data on heritage languages from around the world, it covers issues ranging from individual aspects of heritage language knowledge to broader societal, educational, and

policy concerns in local, global and international contexts. Surveying the most current issues and trends in this exciting field, it is essential reading for graduate students and researchers, as well as language practitioners and other language professionals.

*Language Description, History and Development* Jeff Siegel, John Lynch, Diana Eades, 2007-03-14 This volume in memory of Terry Crowley covers a wide range of languages: Australian, Oceanic, Pidgins and Creoles, and varieties of English. Part I, Linguistic Description and Typology, includes chapters on topics such as complex predicates and verb serialization, noun incorporation, possessive classifiers, diphthongs, accent patterns, modals in Australian English and directional terms in atoll-based languages. Part II, Historical Linguistics and Linguistic History, ranges from the reconstruction of Australian languages, to reflexes of Proto-Oceanic, to the lexicon of early Melanesian Pidgin. Part III, Language Development and Linguistic Applications, comprises studies of lexicography, language in education, and language endangerment and language revival, spanning the Pacific from South Australia and New Zealand to Melanesia and on to Colombia. The volume will whet the appetite of anyone interested in the latest linguistic research in this richly multilingual part of the globe.

**Language Power and Hierarchy** Linda Tsung, 2014-10-27 Shunning polemicism and fashioning a new agenda for a critically informed yet practically orientated approach, this book explores aspects of multilingual education in the People's Republic of China (PRC). Amongst other issues, it also looks at the challenges associated with bilingual and trilingual education in Xinjiang and Tibet as well as the mediation between religion and culture in multi-ethnic schools, covering these issues from a range of perspectives - Korean, Uyghur, Tibetan, Mongolian and Yi. The PRC promotes itself as a harmonious, stable multicultural mosaic, with over 50 distinct ethnic groups striving for common prosperity. Beneath this rhetoric, there is also inter-ethnic discord, with scenes of ethnic violence in Lhasa and Urumqi over the last few years. China has a complex system of multilingual education - with dual-pathway curricula, bilingual and trilingual instruction, specialised ethnic schools. This education system is a lynchpin in the Communist party state's efforts to keep a lid on simmering tensions and transform a rhetoric of harmony into a critical pluralistic harmonious multiculturalism. This book examines this supposed lynchpin.

**International Encyclopedia of Linguistics** William J. Frawley, 2003-05-01 The International Encyclopedia of Linguistics, 2nd Edition encompasses the full range of the contemporary field of linguistics, including historical, comparative, formal, mathematical, functional, and philosophical linguistics with special attention given to interrelations within branches of linguistics and to relations of linguistics with other disciplines. Areas of intersection with the social and behavioral sciences--ethnolinguistics, sociolinguistics, psycholinguistics, and behavioral linguistics--receive major coverage, along with interdisciplinary work in language and literature, mathematical linguistics, computational linguistics, and applied linguistics. Longer entries in the International Encyclopedia of Linguistics, ranging up to four thousand words, survey the major fields of study--for example, anthropological linguistics, history of linguistics, semantics, and phonetics. Shorter entries treat specific

topics within these fields, such as code switching, sound symbolism, and syntactic features. Other short entries define and discuss technical terms used within the various subfields or provide sketches of the careers of important scholars in the history of linguistics, such as Leonard Bloomfield, Roman Jakobson, and Edward Sapir. A major portion of the work is its extensive coverage of languages and language families. From those as familiar as English, Japanese, and the Romance languages to Hittite, Yoruba, and Nahuatl, all corners of the world receive treatment. Languages that are the subject of independent entries are analyzed in terms of their phonology, grammatical features, syntax, and writing systems. Lists attached to each article on a language group or family enumerate all languages, extinct or still spoken, within that group and provide detailed information on the number of known speakers, geographical range, and degree of intelligibility with other languages in the group. In this way, virtually every known language receives coverage. For ease of reference and to aid research, the articles are alphabetically arranged, each signed by the contributor, supported by up-to-date bibliographies, line drawings, maps, tables, and diagrams, and readily accessible via a system of cross-references and a detailed index and synoptic outline. Authoritative, comprehensive, and innovative, the 2nd edition of the International Encyclopedia of Linguistics will be an indispensable addition to personal, public, academic, and research libraries and will introduce a new generation of readers to the complexities and concerns of this field of study.

Language Policy William Eggington, Helen Wren, 1997-02-24 'Think globally, act locally' is the message of Language Policy: Dominant English, Pluralist Challenges. The book examines the impact of English in countries in which it is taken for granted — Australia, Britain, Canada, New Zealand, and the USA. It explores how the dominance of English impacts on the development of national language policies, the maintenance of minority languages, the ability to provide services in other languages, the efforts to promote first language and bilingual education programs, and the opportunities for adult and child second language and literacy training. The book examines language and language-in-education policies in these countries and the extent to which English influences some policies or precludes others. It explores the viability of a statement on national language policies that could be adopted by the International Teachers of English to Speakers of Other Languages (TESOL) organization as a statement of principles. The book explores how to raise issues of individual, social and educational responsibilities that TESOL members must face as they are influenced by, and can influence, the language policy agendas established in these countries. It explores what can be learned from other English dominant nations, and compares language policy and practice, developing a more cross-national view on rights and responsibilities in language and language-in-education in these five dominant nations.

*An Introduction to Sociolinguistics* Janet Holmes, 2013-10-31 Sociolinguistics is the study of the interaction between language and society. In this classic introductory work, Janet Holmes examines the role of language in a variety of social contexts, considering both how language works and how it can be used to signal and interpret various aspects of social

identity. Written with Holmes' customary enthusiasm, the book is divided into three sections which explain basic sociolinguistic concepts in the light of classic approaches as well as introducing more recent research. This fourth edition has been revised and updated throughout using key concepts and examples to guide the reader through this fascinating area, including: - New sections on: koines and koineisation linguistic landscapes New Englishes Stylistic language and sexuality societal approaches to attitude research forensic linguistics - A new selection of informative examples, exercises and maps - Fully updated further reading and references sections An Introduction to Sociolinguistics is an essential introductory text for all students of sociolinguistics and a splendid point of reference for students of applied linguistics. It is also an accessible guide for those who are simply interested in language and the many and varied uses we put it to.

**Journeys Towards Intercultural Capability in Language Classrooms** Martin East, Constanza Tolosa, Jocelyn Howard, Christine Biebricher, Adèle Scott, 2022-05-16 This open access book presents an account of five teacher educators who, over a two-year period, undertook a research project with five teachers of languages other than English in pre-secondary schools in New Zealand. Their collaborative aim was to develop students' intercultural capability in the context of learning a new language. The school participants were typical of many in New Zealand's pre-secondary sector; the teachers had limited language-teaching experience and limited prior knowledge of how to develop the intercultural dimension in their language classrooms, and the students were largely at the beginning stages of learning a new language. The book discusses the findings obtained using a range of data collection methods, including classroom observations, reflective interviews with teachers, and focus groups with students. It documents instances of breakthrough and growth for teachers and students and reveals the problems and tensions. Lastly, it reflects on the lessons learned in the course of this project and speculates on the roles that teacher education needs to play if the goal of intercultural capability is to be better achieved in language classrooms, both in New Zealand and internationally. Of interest to a wide range of stakeholders in the area of education, the book allows readers to gain an understanding of the opportunities of working with teachers through an action-research model, alongside the challenges that this brings and ways in which intercultural capability may be strengthened.

Shallow Equality and Symbolic Jurisprudence in Multilingual Legal Orders Janny H.C. Leung, 2019-01-28 What challenges face jurisdictions that attempt to conduct law in two or more languages? How does choosing a legal language affect the way in which justice is delivered? Answers to these questions are vital for the 75 officially bilingual and multilingual states of the world, as well as for other states contemplating a move towards multilingualism. Arguably such questions have implications for all countries in a world characterized by the pressures of globalization, economic integration, population mobility, decolonization, and linguistic re-colonization. For lawyers, addressing such challenges is made essential by the increased frequency and scale of transnational legal dealings and proceedings, as well as by the lengthening reach of international law. But it is not only policy makers, legislators, and other legal practitioners who must think about such questions. The

relationship between societal multilingualism and law also raises questions for the burgeoning field of language and law, which posits--among other tenets--the centrality of language in legal processes. In this book, Janny H.C. Leung examines key aspects of legal multilingualism. Drawing extensively on case studies, she describes the implications of the legal, practical, and ideological dilemmas encountered in a given country when it becomes bilingual or multilingual, discussing such issues as: how legal certainty and the linguistic ideology of authenticity may be challenged in a multilingual jurisdiction; how courts balance the language preferences of different courtroom participants; and what historical, socio-political and economic factors may influence the decision to cement a given language as a jurisdiction's official language. Throughout, Leung elaborates a theory of symbolic jurisprudence to explore common dilemmas found across countries, despite their varied political and cultural settings, and argues that linguistic equality as proclaimed and practiced today is a shallow kind of equality. Although officially multilingual jurisdictions appear to be more inclusive than their monolingual counterparts, they run the risk of disguising substantive inequalities and displacing real efforts for more progressive social change. This is the first book to offer overarching discussion of how such issues relate to each other, and the first systematic study of legal multilingualism as a global phenomenon.

The New New Zealand William Edward Moneyhun, 2020-01-09 Today's New Zealand is an emerging paradigm for successful cultural relations. Although the nation's Maori (indigenous Polynesian) and Pakeha (colonial European) populations of the 19th century were dramatically different and often at odds, they are today co-contributors to a vibrant society. For more than a century they have been working out the kind of nation that engenders respect and well-being; and their interaction, though often riddled with confrontation, is finally bearing bicultural fruit. By their model, the encounter of diverse cultures does not require the surrender of one to the other; rather, it entails each expanding its own cultural categories in the light of the other. The time is ripe to explore modern New Zealand's cultural dynamics for what we can learn about getting along. The present anthropological work focuses on religion and related symbols, forms of reciprocity, the operation of power and the concept of culture in modern New Zealand society.

**War Words: Language, History and the Disciplining of English** Urszula Clark, 2021-10-01 Debates about the nature of literacy and literacy practices have been conducted extensively in the last fifteen years or so. The fact that both previous and current British governments have effectively suppressed any real debate makes the publication of this book both timely and important. Here, Urszula Clark stresses the underlying ideological character of such debates and shows that they have deep historical roots. She also makes the point that issues regarding the relationship between language and identity, especially national identity, become sharply focused at times of crisis in that identity. By undertaking a comparison with other major English-speaking countries, most notably Australia, New Zealand and the USA, Clark shows how these times of crisis reverberate around the globe.

Mission Noel Pearson,2021-11-30 Mission traces a life of politics, ideas and inspiring words. Whether he is recalling his boyhood in Hope Vale, Queensland, making the case for Indigenous recognition, or evoking a reconciled, multicultural Australia, Noel Pearson confirms he is one of Australia's most powerful and influential thinkers – and an extraordinary writer. Mission selects the best of Pearson's work to date. There are indelible portraits of political leaders seen close up – Keating, Rudd, Whitlam, Turnbull and more. There is Pearson's brilliant exploration of a Voice to Parliament, which led eventually to the Uluru Statement from the Heart. And there are acute analyses – of passive welfare; of the fate of the Labor Party; of identity politics, good and bad; and of education and the role of a great teacher. The volume also contains a remarkable new extended title essay, in which Pearson reflects on his life and work so far. Mission is honest, provocative and utterly original. Noel Pearson is a lawyer, activist and founder of the Cape York Institute. He is author of Up From the Mission, Our Right to Take Responsibility, Mission, two Quarterly Essays and many essays, articles and speeches.

*An Ecology of World Literature* Alexander Beecroft,2015-01-06 What constitutes a nation's literature? How do literatures of different countries interact with one another? In this groundbreaking study, Alexander Beecroft develops a new way of thinking about world literature. Drawing on a series of examples and case studies, the book ranges from ancient epic to the contemporary fiction of Roberto Bolaño and Amitav Ghosh. Moving across literary ecologies of varying sizes, from small societies to the planet as a whole, the environments in which literary texts are produced and circulated, *An Ecology of World Literature* places in dialogue scholarly perspectives on ancient and modern, western and non-western texts, navigating literary study into new and uncharted territory.

**Young Migrants and Plurilingualism in Schools** Fiona Smythe,2024-10-14 In many parts of the world, there is a growing interest in how existing linguistic knowledge is involved in the acquisition of further languages; in particular how learning the language of schooling can be improved through inclusion of students' home languages. This theme gathers around it a rich international network of multilingual researchers interested in promoting the benefits of bilingual and plurilingual education, the recognition of linguistic and cultural diversity in schools, and strategies for supporting young migrants to succeed in schools. *Young Migrants and Plurilingualism in Schools: A Comparative Study of Language Diversity within Education Systems in France and Aotearoa, New Zealand* presents findings from the author's Ph.D. study carried out during 2017–2019 with young migrants and their teachers in France and New Zealand. These findings provide evidence for plurilingual learning spaces as improving student participation, interaction, sense of wellbeing and social cohesion—all elements of democratic coexistence in culturally and linguistically diverse societies.

**The International Encyclopedia of Language and Social Interaction, 3 Volume Set** Cornelia Ilie,Todd Sandel,2015-06-08 The International Encyclopedia of Language and Social Interaction is an invaluable reference work featuring contributions from leading global scholars, available both online and as a three-volume print set. *Demographic and Socioeconomic Basis of Ethnolinguistics* Jacob S. Siegel, 2017-10-25 This book presents a description and analysis of sociolinguistics written from a demographer's perspective. It synthesizes the data on the materials, methods, and issues of this interdisciplinary field, pulling together the scattered materials published in this area into a coherent whole. Drawing on a wide range of sciences in addition to demography and sociolinguistics, including sociology, anthropology, statistics, psychology, neuroscience, and public policy, the book treats theoretical and applied issues, links methods and substantive findings, covers both national and international materials, and provides prehistorical, historical, and contemporary illustrations. The book treats the theoretical issue of how the language we use develops socially on a base of linguistic genetic capacity and the practical issue of how the intervention of the state and public figures may profoundly alter the natural evolution of the language. As such, this book will appeal to a wide range of users, from students to teachers and practitioners of social demography, sociolinguistics, cultural anthropology, and particularly to those social scientists interested in ethnic studies and human migration.

*Tort Law in New Zealand* Stephen Todd, 2017-11-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides ready access to how the legal dimension of prevention against harm and loss allocation is treated in New Zealand. This traditional branch of law not only tackles questions which concern every lawyer, whatever his legal expertise, but also concerns each person's most fundamental rights on a worldwide scale. Following a general introduction that probes the distinction between tort and crime and the relationship between tort and contract, the monograph describes how the concepts of fault and unlawfulness, and of duty of care and negligence, are dealt with in both the legislature and the courts. The book then proceeds to cover specific cases of liability, such as professional liability, liability of public bodies, abuse of rights, injury to reputation and privacy, vicarious liability, liability of parents and teachers, liability for handicapped persons, product liability, environmental liability, and liability connected with road and traffic accidents. Principles of causation, grounds of justification, limitations on recovery, assessment of damages and compensation, and the role of private insurance and social security are all closely considered. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for lawyers New

Zealand. Academics and researchers will also welcome this very useful guide, and will appreciate its value not only as a contribution to comparative law but also as a stimulus to harmonization of the rules on tort.
