Words to Live By T.R. Robinson, 2023-05-22 The importance of words cannot be overstated. In our earthly realm, a business leader, politician, or coach can speak or write words of encouragement that result in people achieving more and reaching heights previously thought unattainable. The opposite can also occur when charismatic leaders influence their followers to commit atrocities. The critical importance of the word is never more illustrated when you consider that God spoke the word and the universe came into being. Think about the apostles when they realized that Jesus's life represented a fulfillment of prophecy, ...The word became flesh and dwelt among us. *Words to Live By* is more than an inspirational book. In fact, *Words to Live By* is a guide to help you seek out, compile, and live life according to a set of words you can be proud of. A set of words which encourages hope. A set of words which leaves a legacy of a life others can follow, with a can-do mentality. It is my hope that this book will serve as the catalyst for you, the reader, to create a life lived on purpose following God's will. To define your meaning of success and achievement based upon the relationships you nurture with others. To become an overcomer and never give up when faced with the inevitable hurdles, obstacles, and disappointments we all experience in life. Perfect for teaching positive values in your classroom, Sunday School class or book group.

Punching Back Jasmijn Rana,2022-11-11 In the Netherlands, girls and young women are increasingly active in women-only kickboxing. The general assumption, in the Netherlands and in western Europe more broadly, is that women's sport is a form of secular, feminist empowerment. Muslim women's participation would then exemplify the incongruence of Islam with the modern, secular nation-state. Punching Back provides a detailed ethnographic study that contests this view by showing that young Muslim women who kickbox establish agentive selves by playing with gender norms, challenging expectations, and living out their religious subjectivities.

Edwards and the Edwardseans David W. Kling, 2024-09-24 Edwards and the Edwardseans gathers into a single volume eight of the author's previously published articles and chapters. Suitable as either a basic or supplementary text for interested lay people and graduate students, this book serves as an introduction to the central spiritual and theological interests of Jonathan Edwards and to the long shadow those interests cast on his eponymous followers. The first four chapters (Part One) focus on Jonathan Edwards—his formative role in the Great Awakening, his biblical understanding of conversion, his perspective on petitionary prayer, and his influence on missionary endeavors. The following four chapters (Part Two) trace a well-defined theological movement from Edwards to his second- and especially third-generation followers. The impact of this movement resulted in the creation of a distinct theological culture that, over two generations, was institutionalized in informal seminaries or “schools of the prophets” in colleges attended by New Divinity students and staffed by New Divinity presidents and in missionary outreach both at home and abroad. Taken together, these chapters introduce theological subjects that mattered most to Edwards and his disciples: spiritual revival, conversion, the Bible, prayer, and

extending the kingdom of God.

The psychological training of the marathon Gustavo Vaquera, 2025-05-20 The book addresses psychological preparation for the marathon, a dimension often overlooked in favor of running, physiological, nutritional, and biomechanical aspects. Although it is widely acknowledged that the mind plays a crucial role—especially in the last 12 kilometers—many runners and coaches lack a systematic method to develop it, relying instead on intuitive or motivational advice. The work debunks the myth that physical suffering automatically strengthens the mind and criticizes the lack of concrete tools in classical literature. It proposes a scientific approach, integrating Neuroscience, Psychoanalysis, Sport Psychology, and the experiences of professional athletes, to train skills such as resilience, pain management, focus, motivation, psychological endurance, anxiety control, and other mental factors that influence marathon performance. It includes a 16-week program

with scientifically validated techniques (visualization, mindfulness, mental training journals, present-moment training, and others). It demonstrates that it is not enough to merely mention psychological aspects; it is essential to show how they can be trained.
