## Philip Tarnoff

**The Road Ahead** Philip Tarnoff, 2011 America's future depends on a vibrant highway system capable of supporting industry and the travel needs of its citizens. The country's highway system can trace its roots to the movements of major armies in colonial times, such as British General Braddock using George Washington's assistance in a disastrous attack of French forces defending Ft. Duquesne. These early roads developed into the engineering marvels of today's modern highway system. But this system is in serious trouble. Inadequate funding and poor management are responsible for its gradual deterioration, and along with it, the U.S. economy. A broad range of solutions can solve this problem, some of which involve transforming public transportation agencies into privately operated utilities. Many of these exciting solutions also offer the potential to solve America's funding problems. This book is must-reading for anyone concerned with America's future, as it shows us The Road Ahead... About the Author: Philip Tarnoff received an electrical engineering degree from Carnegie Mellon University and a master's degree from New York University. He is retired from his most recent full-time job as director of a research center at the University of Maryland. Tarnoff was the president of a major transportation systems integrator and is currently working part-time as a consultant. He is also chairman of the board of a start-up company that produces devices for measuring traffic flow. He lives in Rockville, Maryland <http://SBPRA.com/PhilipTarnoff>

KL Nikolaus Wachsmann, 2015-04-14 The “deeply researched, groundbreaking” first comprehensive history of the Nazi concentration camps (Adam Kirsch, The New Yorker). In a landmark work of history, Nikolaus Wachsmann offers an unprecedented, integrated account of the Nazi concentration camps from their inception in 1933 through their demise, seventy years ago, in the spring of 1945. The Third Reich has been studied in more depth than virtually any other period in history, and yet until now there has been no history of the camp system that tells the full story of its broad development and the everyday experiences of its inhabitants, both perpetrators and victims, and all those living in what Primo Levi called “the gray zone.” In KL, Wachsmann fills this glaring gap in our understanding. He not only synthesizes a new generation of scholarly work, much of it untranslated and unknown outside of Germany, but also presents startling revelations, based on many years of archival research, about the functioning and scope of the camp system. Closely examining life and death inside the camps, and adopting a wider lens to show how the camp system was shaped by changing political, legal, social, economic, and military forces, Wachsmann produces a unified picture of the Nazi regime and its camps that we have never

seen before. A boldly ambitious work of deep importance, KL is destined to be a classic in the history of the twentieth century. Praise for KL A Wall Street Journal Best Book of 2015 A Kirkus Reviews Best History Book of 2015 Finalist for the National Jewish Book Award in the Holocaust category “[A] monumental study . . . a work of prodigious scholarship . . . with agonizing human texture and extraordinary detail . . . Wachsmann makes the unimaginable palpable. That is his great achievement.” —Roger Cohen, The New York Times Book Review “Wachsmann’s meticulously detailed history is essential for many reasons, not the least of which is his careful documentation of Nazi Germany’s descent from greater to even greater madness. To the persistent question, “How did it happen?,” Wachsmann supplies voluminous answers.” —Earl Pike, The Plain Dealer (Cleveland)

*Remembering the Road to World War Two* Patrick Finney, 2010-09-13 Remembering the Road to World War Two is a broad and comparative, international survey of the historiography of the origins of the Second World War. It explores how, in the case of each of the major combatant countries, historical writing on the origins of the Second World War has been inextricably linked with conceptions of national identity and collective memory.

**A Nation of Outsiders** Grace Elizabeth Hale, 2011-02-04 At mid-century, Americans increasingly fell in love with characters like Holden Caulfield in *Catcher in the Rye* and Marlon Brando's Johnny in *The Wild One*, musicians like Elvis Presley and Bob Dylan, and activists like the members of the Student Nonviolent Coordinating Committee. These emotions enabled some middle-class whites to cut free of their own histories and identify with those who, while lacking economic, political, or social privilege, seemed to possess instead vital cultural resources and a depth of feeling not found in grey flannel America. In this wide-ranging and vividly written cultural history, Grace Elizabeth Hale sheds light on why so many

white middle-class Americans chose to re-imagine themselves as outsiders in the second half of the twentieth century and explains how this unprecedented shift changed American culture and society. Love for outsiders launched the politics of both the New Left and the New Right. From the mid-sixties through the eighties, it flourished in the hippie counterculture, the back-to-the-land movement, the Jesus People movement, and among fundamentalist and Pentecostal Christians working to position their traditional isolation and separatism as strengths. It changed the very meaning of authenticity and community. Ultimately, the romance of the outsider provided a creative resolution to an intractable mid-century cultural and political conflict-the struggle between the desire for self-determination and autonomy and the desire for a morally meaningful and authentic life.

So You Think You Can Think Otto B. Toews, 2017-10-30 In our complex world, how can we learn to think through moral dilemmas in the pursuit of justice? How do the words we associate with morality impact our understanding and application of it? In short, how can we enact equal measures of fairness among family members, friends, and strangers? These are the troubling questions that guide Dr. Otto Toews as he critically engages with the language of morality and uncovers what is lacking in our conversations about fairness. Using a Principled Thinking Model for resolving everyday moral dilemmas, Toews identifies five basic categories that are necessary for moral thinking: duty, rights, motive, desert, and justice. Combining this research with Nel Nodding's seminal work on caring, Toews concludes that while it is vital that we practice thinking through moral dilemmas, the key to attaining universal justice and fairness lies in our sense of fellow feeling, or empathy. Toews argues that without the urgency and energy prompted by a sense of concern for others, thinking through moral dilemmas will remain insufficient in fostering an ethical world. Throughout the book, Toews augments his research by providing hypothetical scenarios involving two teachers, Bill and Mae. They engage in spirited debates over how duty, rights, motive, desert, and justice apply to issues such as education, cyber bullying, mental illness, reconciliation, and more. Again and again, Bill and Mae are caught up by the power of empathy, demonstrating the urgent need to care for others. It is through their dialogues that Toews has designed a brilliant way for us to witness moral thinking in action, giving us the language we need to navigate it, and preparing us for the countless types of conflicts we encounter every day.
