The Gentianaceae - Volume 1: Characterization and Ecology Jan J. Rybczyński, Michael R. Davey, Anna Mikula, 2014-05-09

This is the first of two volumes on Gentianaceae. Comprising twelve chapters, it centres upon the characterization and ecology of Gentianaceae worldwide, with emphasis on the application of molecular and cytological approaches in relation to taxonomy. The first three chapters consider the classification of the family and review the advances in research since the earlier revision published in 2002, which resulted in the reclassification of some plants and the naming of new genera. The next chapter provides the most comprehensive report to date of the systematics of South American Neotropical woody Gentians. Other reviews include details of the Gentianaceae in Eastern Europe. The key biochemical steps that result in the diversity of Gentian flower colors, the cytology of European species and an historical account of the importance of Gentians in herbal medicines are also covered. Furthermore, an analysis of gene expression in overwintering buds is presented, discussing several aspects of plant taxonomy, phenotypic characteristics, phylogeography and pedigree. Two contributions highlight the importance of Gentians in India, and the last chapter presents evidence for the importance of Glomeromycota in developing arbuscular mycorrhizal associations with the roots of Gentians. This volume provides the basis for the biotechnological approaches that are considered in the companion book *The Gentianaceae - Volume 2: Biotechnology and Applications*.

Intimate Danger Amy J. Fetzer, 2013-10-08 All The Secrets Inside Clancy McRae is mad as hell. Charged with creating technology-enhanced troops, she's discovered her top-secret nano-device has been surgically implanted in four U.S. Marines without her approval. Though it makes them smarter, faster, and stronger than any human on earth, in this untested stage it can also drive them insane--or kill them. Now she's stolen classified data, risking her career--and her life--to go after them. While recovering from a shoulder wound, Spec Ops leader Mike Gannon learns the rest of his team was dropped into the jungles of Peru to locate a chilling new weapon. Then: nothing, nada. Injured or dead, it's his duty to bring them home and

destroy the threat. But when a scrappy red-haired beauty butts into his rescue mission, insisting the government turned his men into lab rats, Mike doesn't believe her--till she becomes a moving target. Keeping Clancy with him keeps her safe, yet as the tropical temperatures rise with their passion, Mike and Clancy are ensnared in a labyrinth of ingenious deceptions concealing a peril no one suspects--and only they can stop. In the dark forgotten Andes, they unearth a deadly plan and an ancient menace that turns a rescue into the crucial fight for their very survival. And the clock is ticking. . .

San Ignacio Dilser Ivan Carrasco Huaman, Julio César Fernández Alvarado, 2023-06-22 La investigación planteó, como objetivo general, realizar la prospección de evidencias arqueológicas de la parte media y alta del valle del Chinchipe, para lo cual se sustentó bajo dos objetivos específicos: Reconocer las evidencias arqueológicas en la parte media y alta del valle del Chinchipe, San Ignacio-Cajamarca; e identificar las evidencias arqueológicas en la parte media y alta del valle del Chinchipe, San Ignacio-Cajamarca. El esquema organizacional de la investigación está seccionada en cinco partes organizadas bajo un orden lógico. En la primera parte, tratamos acerca del escenario geográfico de la zona de la provincia de San Ignacio, dentro de la región de Cajamarca, destacando la hidrografía, la flora y fauna, y las características del valle de Chinchipe. En la segunda parte versa sobre las evidencias arqueológicas en la cuenca del Chinchipe, destacando las investigaciones realizadas hasta ahora, junto con el escenario en donde se encuentra el valle de Chinchipe. En la tercer parte abordamos la metodología que hemos utilizado para realizar la investigación como parte de la prospección arqueológica; para ello utilizamos el método propuesto por Jordán, quien realizó un protocolo para realizar un trabajo de prospección arqueológica. En la cuarta parte trata sobre los resultados como producto de la prospección realizada en la parte media y alta del valle del Chinchipe, destacando tres ejes importantes: la sectorización, el reconocimiento y la identificación de las evidencias arqueológicas en las zonas prospectadas, para terminar con el análisis de resultados. Al final, en la quinta parte se aborda la discusión y las respectivas conclusiones como producto de la investigación.

In the Shadow of Saint Death Michael Deibert, 2014-06-03 With the war between the Mexican state and the drug traffickers operating within its borders having claimed over 70,000 lives since 2006, noted journalist and author Michael Deibert zeroes in on the story of the notorious Gulf Cartel, their deadly war with their former allies Los Zetas, the cartel's connections in Mexican politics and what its trajectory means for Mexico's--and America's--future. Punctuated by the disappearance of busloads of full of people from Mexican highways, heavy-weapon firefights in once-picturesque colonial towns and the discovery of mass graves, nowhere has the violence of Mexico's drug war been more intense than directly across the border from East Texas, the scene of a scorched-earth war between two of Mexico's largest drug trafficking organizations: The Gulf Cartel, a criminal body with roots stretching back to Prohibition, and Los Zetas, a group famous for their savagery and largely made up of deserters from Mexico's armed forces. From the valleys and sierras of rural Tamaulipas and Nuevo León to the economic hub of Monterrey, the violence rivals anything seen in the more well-known

narco war in Ciudad Juárez, 830 miles to the west. Combining dozens of interviews that the author has conducted over the last six years in Mexico and other countries in the region along with a vast reserve of secondary source material, *In the Shadow of Saint Death* gives U.S. readers the story of the war being waged along our border in the voices of the cartel hitmen, law enforcement officials, politicians, shopkeepers, migrants and children living inside of it year-round. Through their stories, the book will pose provocative questions about the direction and consequence of U.S. drug policy and the militarized approach to combating the narcotics trade on both sides of the border.

Species in the group occur in North, Central and South America, and in Europe and Asia. The group is most species-rich in Peru and Brazil, and three of the component species, *Solanum laxum* of Brazil, *Solanum seforthianum* of the Caribbean and *Solanum crispum* of Chile are cultivated in many parts of the world. All species are illustrated and a distribution map of each is provided. All names are typified and nomenclatural and bibliographic details for all typifications presented. One new species from Ecuador is described. The monograph is the first complete taxonomic treatment of these species since the worldwide monograph of *Solanum* done by the French botanist Michel-Felix Dunal in 1852.
