**Advances in Human Factors in Training, Education, and Learning Sciences** Waldemar Karwowski,Tareq Ahram,Salman Nazir,2019-06-01 This book focuses on the importance of human factors in optimizing the learning and training process. It reports on the latest research and best practices and discusses key principles of behavioral and cognitive science, which are extremely relevant to the design of instructional content and new technologies to support mobile and multimedia learning, virtual training and web-based learning, among others, as well as performance measurements, social and adaptive learning and many other types of educational technologies, with a special emphasis on those important in the corporate, higher education, and military training contexts. Based on the AHFE 2019 Conference on Human Factors in Training, Education, and Learning Sciences, held on July 24-28, 2019, in Washington D.C., USA, the book offers a timely perspective on the role of human factors in education. It highlights important new ideas and will fosters new discussions on how to optimally design learning experiences.

**Population Loss: The Role of Transportation and Other Issues** ,2018-10-31 At heart, transportation policy and research are about people: connecting individuals and the places they live, ensuring sufficient and equitable access, and facilitating movement. Whether at the regional, city, or neighborhood scale, the loss of population presents unique challenges where transport is concerned. It is not only about preservation of existing access, but possibly even a question of increased

need for connectivity and mobility. Demographic changes that accompany depopulation--aging for example-- also impact existing systems, preferences, and needs. - High quality and focused contributions on a complex and urgent topic - A clear focus on qualitative analyses and mixed method approaches

**Advances in Human Factors, Business Management and Society** Jussi Ilari Kantola, Salman Nazir, Tibor Barath, 2018-06-26 This book presents practical approaches for facilitating the achievement of excellence in the management and leadership of organizational resources. It shows how the principles of creating shared value can be applied to ensure faster learning, training, business development, and social renewal. In particular, it presents novel methods and tools for tackling the complexity of management and learning in both business organizations and society. Discussing ontologies, intelligent management systems, methods for creating knowledge and value added, it offers novel insights into time management and operations optimization, as well as advanced methods for evaluating customers' satisfaction and conscious experience. Based on two conferences, the AHFE 2018 International Conference on Human Factors, Business Management and Society, and the AHFE 2018 International Conference on Human Factors in Management and Leadership, held on July 21-25, 2018, in Orlando, Florida, USA, the book provides both researchers and professionals with new tools and inspiring ideas for achieving excellence in various business activities. *On the Move to Meaningful Internet Systems: OTM 2019 Workshops* Christophe Debruyne, Hervé Panetto, Wided Guédria, Peter Bollen, Ioana Ciuciu, George Karabatis, Robert Meersman, 2020-02-12 This volume constitutes the refereed proceedings of the Confederated International International Workshop on Enterprise Integration, Interoperability and Networking (EI2N ), Fact Based Modeling ( FBM), Industry Case Studies Program ( ICSP ), International Workshop on Methods, Evaluation, Tools and Applications for the Creation and Consumption of Structured Data for the e-Society (Meta4eS) and, 1st International Workshop on Security via Information Analytics and Applications (SIAnA 2019) held as part of OTM 2018 in October 2019 in Rhodes, Greece. As the three main conferences and the associated workshops all share the distributed aspects of modern computing systems, they experience the application pull created by the Internet and by the so-called Semantic Web, in particular developments of Big Data, increased importance of security issues, and the globalization of mobile-based technologies.

*On the Move to Meaningful Internet Systems: OTM 2013 Workshops* Yan Tang Demey, Herve Panetto, 2013-09-25 This volume constitutes the refereed proceedings of the international workshops, Confederated International Workshops: OTM Academy, OTM Industry Case Studies Program, ACM, EI2N, ISDE, META4eS, ORM, SeDeS, SINCOM, SMS and SOMOCO 2013, held as part of OTM 2013 in Graz, Austria, in September 2013. **Analysing Design Thinking: Studies of Cross-Cultural Co-Creation** Bo Christensen, Linden J. Ball, Kim Halskov, 2017-08-03 The scientific analysis of design thinking continues to burgeon and is of considerable interest to academic scholars and design practitioners across many disciplines. This research tradition has generated a growing corpus of studies concerning how designers think during the creation of innovative products, although less focus has been given to analysing how designers think when creating less tangible deliverables such as concepts and user-insights. *Analysing Design Thinking: Studies of Cross-Cultural Co-Creation* brings together 28 contributions from internationally-leading academics with a shared interest in design thinking who take a close look at professional designers working on a project that not only involves soft deliverables, but where a central role is played by co-creation across multiple, culturally diverse stakeholders. This collection of detailed, multi-method analyses gives a unique insight into how a Scandinavian design team tackled a specific design task within the automotive industry over a four-month design process. All papers draw upon a common, video-based dataset and report analyses that link together a diversity of academic disciplines including psychology, anthropology, linguistics, philosophy, architecture, management, engineering and design studies. The dataset affords multiple entry points into the analysis of design thinking, with the selected papers demonstrating the application of a wide range of analytic techniques that generate distinct yet complementary insights. Collectively these papers provide a coherent framework for analysing and interpreting design thinking 'in vivo' through video-based field studies.

*Expanding Boundaries: Systems Thinking in the Built Environment* Guillaume Habert, Arno Schlueter, 2016-08-15 Consuming over 40% of total primary energy, the built environment is in the centre of worldwide strategies and measures towards a more sustainable future. To provide resilient solutions, a simple optimisation of individual technologies will not be sufficient. In contrast, whole system thinking reveals and exploits connections between parts. Each system interacts with others on different scales (materials, components, buildings, cities) and domains (ecology, economy and social). Whole-system designers optimize the performance of such systems by understanding interconnections and identifying synergies. The more complete the design integration, the better the result. In this book, the reader will find the proceedings of the 2016 Sustainable Built Environment (SBE) Regional Conference in Zurich. Papers have been written by academics and practitioners from all continents to bring forth the latest understanding on systems thinking in the built environment.

The SAGE Handbook of Learning and Work Margaret Malloch, Len Cairns, Karen Evans, Bridget N. O'Connor, 2021-10-13

The first two decades of the 21st century have contributed a growing body of research, theorisation and empirical studies on learning and work. This Handbook takes the consideration of this topic into a new realm, moving beyond the singular linking of identity, learning and work to embrace a more holistic appreciation of learners and their life-long learning. Across 40 chapters, learners, learning and work are situated within educational, organisational, social, economic and political contexts. Taken together, these contributions paint a picture of evolving perspectives of how scholars from around the world view developments in both theory and practice, and map the shifts in learning and work over the past two decades. Part 1: Theoretical perspectives of learning and work Part 2: Intersections of learning and work in organisations and beyond Part 3: Learning throughout working lives and beyond Part 4: Issues and challenges to learning and work

*Pursuit of Pattern Languages for Societal Change - PURPLSOC* Sickinger, Richard, Baumgartner, Peter, Gruber-Mücke, Tina, 2018-12-18 We live in a time of social and cultural change. Old patterns are losing their validity and relevance, new patterns are needed and in demand. We need a new approach which can formulate, generate and engage such patterns. The pattern language approach of Christopher Alexander serves this purpose - the interdisciplinary and participatory building blocks for societal change. The PURPLSOC 2017 conference contributions cover 25 domains - from anthropology and automation to political science and systems science - for a comprehensive perspective of current pattern research and practice.

**Interactivity, Game Creation, Design, Learning, and Innovation** Anthony L. Brooks, Eva Brooks, Cristina Sylla, 2019-01-30 This book constitutes the refereed post-conference proceedings of two conferences: The 7th EAI International Conference on ArtsIT, Interactivity and Game Creation (ArtsIT 2018), and the 3rd EAI International Conference on Design, Learning, and Innovation (DLI 2018). Both conferences were hosted in Braga, Portugal, and took place October 24-26, 2018. The 51 revised full papers presented were carefully selected from 106 submissions. ArtsIT, Interactivity and Game Creation is meant to be a place where people in arts, with a keen interest in modern IT technologies, meet with people in IT, having strong ties to art in their works. The event also reflects the advances seen in the open related topics Interactivity (Interaction Design, Virtual Reality, Augmented Reality, Robotics) and Game Creation (Gamification, Leisure Gaming, Gameplay). **The Palgrave Handbook of Age Diversity and Work** Emma Parry, Jean McCarthy, 2016-11-26 This Handbook incorporates a variety of disciplines and approaches in order to provide a comprehensive and authoritative examination of the issues that result from increasing age diversity at work. Despite interest in this area exploding over the past few years amongst academics, practitioners and policy makers, the analysis of age diversity has remained primarily within disciplinary 'silos' such as Psychology or Sociology with a focus on ageing or generational differences, rather than a combination of approaches to understanding age diversity. Unique in its coverage of multiple perspectives, it considers not only generational and ageing perspectives to age diversity, but also highlights the importance of context in driving both the impact and response to this issue. The Palgrave Handbook of Age Diversity and Work includes contributions from leading scholars in age and generational diversity from across the world, discussing cutting-edge research findings about the nature and impact of age diversity and presenting approaches to managing this phenomenon.
