

Prayer For The Crown Shy

Shannon Vallor

A Prayer for the Crown-Shy Becky Chambers, 2022-07-12 A USA Today Bestseller! “Tender and healing... I’m prescribing a preorder to anyone who has ever felt lost. Stunning, kind, necessary.” —Sarah Gailey on book 1: A Psalm for the Wild-Built A Prayer for the Crown-Shy is a story of kindness and love from one of the foremost practitioners of hopeful SF. After touring the rural areas of Panga, Sibling Dex (a Tea Monk of some renown) and Mossap (a robot sent on a quest to determine what humanity really needs) turn their attention to the villages and cities of the little moon they call home. They hope to find the answers they seek, while making new friends, learning new concepts, and experiencing the entropic nature of the universe. Becky Chambers's new series continues to ask: in a world where people have what they want, does having more even matter? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Monk and Robot Becky Chambers, 2025-05-06 Becky Chambers' two award-winning, bestselling, beloved, and uplifting Monk and Robot stories, A Psalm for the Wild-Built and A Prayer for the Crown-Shy, together in trade paperback for the first time! Becky Chambers' delightful, post-Utopian, Hugo Award-winning series gives us hope for the future. It's been centuries since the robots of Panga gained self-awareness and laid down their tools; centuries since they wandered, en masse, into the wilderness, never to be seen again; centuries since they faded into myth and urban legend. One day, the life of a tea monk is upended by the arrival of a robot, there to honor the old promise of checking in. The robot cannot go back until the question of what do people need? is answered. But the answer to that question depends on who you ask, and how. They're going to need to ask it a lot. Becky Chambers' series asks: in a world where people have what they want, does having more matter? This book includes both A Psalm for the Wild-Built and A Prayer for the Crown-Shy in paperback for the first time!

The AI Mirror Shannon Vallor, 2024 For many, AI technology inspires hope for the future—the promise of shared human flourishing and collective liberation from drudgery that defines the good life, but always seems to elude our species. Yet today's AI technology is forged from human-generated data into immensely powerful but flawed mirrors that endlessly reflect the same errors, biases and failures of wisdom we are striving to escape. To open new futures for ourselves with these tools is as misguided as gazing into a mirror while trying to climb an uncharted mountain. At this crucial juncture for humanity and our planet, we need something new from AI, and more importantly, from ourselves. We need to find new hope—not to surrender our greatest moral and intellectual ambitions to machines that have none, but to renew those ambitions,

collectively, for ourselves. Shannon Vallor makes a wide-ranging, prophetic, and philosophical case for what AI could be, and what we can be with it. She calls us to reclaim our human potential for moral and intellectual growth, rather than losing sight of our shared humanity as we gaze dully into our AI mirrors.

The Ancient World in Alternative History and Counterfactual Fictions Alberto J. Quiroga Puertas, Leire Olabarria, 2024-08-22 Focusing in turn on history, powerful individuals, under-represented voices and the arts, the essays in this collection cover a wide variety of modern and contemporary narrative fiction from Jo Walton and L. Sprague De Camp to T. S. Chaudhry and Catherynne M. Valente. Chapters look into the question of chance versus determinism in the unfolding of historical events, the role individuals play in shaping a society or occasion, and the way art and literature symbolise important messages in counterfactual histories. They also show how uchronic narratives can take advantage of modern literary techniques to reveal new and relevant aspects of the past, giving voices to marginalised minorities and suppressed individuals of the ancient world. Counterfactual fiction and uchronic narratives have been largely up until now the domain of literary critics. However, these modes of literature are here analysed by scholars of Ancient History, Egyptology and Classics, shedding important new light on how cultures of the ancient world have been (and still are) perceived, and to what extent our conceptions of the past are used to explore alternate presents and futures. Alternate history entices the imagination of the public by suggesting hypothetical scenarios that never occurred, underlining a latent tension between reality and imagination, and between determinism and contingency. This interest has resulted in a growing number of publications that gauge the impact of what-if narratives, and this one is the first to give scholars of the ancient world centre-stage.

Routledge Handbook of Climate Change and Society Steven R. Brechin, Seungyun Lee, 2024-12-27 Routledge Handbook of Climate Change and Society is a comprehensive guide that provides insights into the multifaceted relationship between climate change and society and covers a wide array of topics, disciplines, and cultures, from the latest trends in weather patterns to the issue of climate (in)justice. The second edition, which is overwhelmingly comprised of all-new essays, is an indispensable resource for those interested in understanding the complexities of climate change and its societal implications. The book contains seven thematically organized sections examining the various aspects of climate change and its intersection with our society: Climate Change in the Natural and Social Sciences; Human Population, Movement, and Health; Economics, Energy, and Consumption; Urban Climate Resiliency; Technological Innovations and Pitfalls; Gender, Poverty, and Justice; and Politics and Governance. Each part provides a unique and important perspective for understanding the challenges as well as opportunities presented by climate change. Through original research findings and critical analysis, this book sheds light on the urgent need for interdisciplinary approaches to tackle climate change effectively. By examining the intersectionality of climate change with various social, economic, and political factors, it offers valuable insights for researchers, policymakers, activists, and anyone concerned about the future of our planet. With a forward-looking

perspective that emphasizes optimism and resilience, this book serves as a tool for fostering hope and collective action in the face of climate change challenges.

Novel Ecologies Allison Carruth, 2025-03-04 Tracing the convergence of ecology and engineering over the last three decades, this book pinpoints a new environmental paradigm that the author calls Nature Remade. Allison Carruth's *Novel Ecologies* shows how the tech industry has taken up the wilderness mythologies that shaped one strain of American environmentalism over the last century. Calling this twenty-first-century environmental imagination Nature Remade, Carruth describes a distinctly West Coast framework that is at once nostalgic and futuristic. Through three case studies (synthetic wildlife, the digital cloud, and space colonization), the book shows Nature Remade to be a quasi-religious belief in venture capitalism and big tech. This paradigm thus imagines a future in which species, ecosystems, and entire planets are re-generated and re-created through engineering. *Novel Ecologies* challenges the conviction that climate change and other environmental crises must be met with ever larger-scale forms of technological intervention. Against the new worlds conjured by Google, Meta, Open AI, Amazon, SpaceX, and a host of lesser-known start-ups, Carruth marshals writers and artists who imagine provisionally hopeful environmental futures while refusing to forget the histories that have made the world what it is. On this track of the book, Carruth discusses the works of Octavia Butler, Becky Chambers, Jennifer Egan, Ruth Ozeki, Craig Santos Perez, Tracy K. Smith, Jeff VanderMeer, Saya Woolfalk, and many more. Their novels, poems, installation artworks, and expressive media offer a speculative world built on livable communities rather than engineered lifeforms.

A Collection of Dreams about the Future of Technology Education, 2025-01-27 Aside from celebrating the work of Marc J. de Vries, this book also highlights the need for further work, effort, and energy to improve learning about technology. It is a collection of essays written by experts from the philosophy of technology and education. They have written about their perspectives on how a future education about technology must better relate to the technologically textured world we now inhabit: a world in which the continuing exponential evolution of technology is affecting virtually every aspect of our lives. This book serves as a clarion call to all those responsible for school-based education. Contributors are: Piet Ankiewicz, Frank Banks, Moshe Barak, Hilda Ruth Beaumont, Dennis Cheek, Osnat Dagan, John R. Dakers, Wendy Dakers, Marc J. de Vries, Christian Detweiler, Andrew Doyle, Wendy Fox-Turnbull, Lena Gumaelius, Jonas Hallström, Alison Hardy, Eva Hartell, Pasi Ikonen, Henk Jochemsen, Alister Jones, Hanna Kauppinen, Steve Keirl, Richard Kimbell, Dov Kipperman, Roel Kuiper, Mike Martin, David Mioduser, Carl Mitcham, Sonja Niiranen, Charlotta Nordlöf, Aki Rasinen, Philip A. Reed, Timo Rissanen, John M. Ritz, Marion Rutland, Elwin Savelsbergh, Alice Schut, David Spendlove, Kay Stables, Kendall N. Starkweather, Maarten van der Sanden, Gerald van Dijk, and Maarten J. Verkerk.

Aging Experiments João Paulo Guimarães, 2023-08-04 The sustained expansion of the life span and the attendant

demographic changes in the West have fuelled the production of cultural texts that explore alternative representations of aging and old age. The contributors to this volume show how artists in science-fiction, fantasy and the avant-garde develop visions of late life transformation, improvisation and adaptation to new circumstances. The studies particularly focus on perspectives on aging that challenge the predominant narratives of decline as well as fantasies of eternal youth, as defined by neoliberal notions of health, able-bodiedness, agency, self-improvement, progress, plasticity and productivity.

The Best Science Fiction of the Year: Volume 8 Naomi Kritzer, Grace Chan, S.L. Huang, Ai Jiang, Isabel J. Kim, A.T. Greenblatt, Marie Vibbert, M. Bennardo, Julianna Baggott, Tobias S. Buckell, Premee Mohamed, Ray Nayler, Suzanne Palmer, Sarah Gailey, Nian Yu, Rich Larson, R.S.A. Garcia, Alastair Reynolds, Wole Talabi, Congyun "Mu Ming" Gu, Greg Egan, J.C. Hsyu, Leonard Richardson, Yoon Ha Lee, Hannah Yang, Annalee Newitz, Chinelo Onwualu, Meg Elison, Jessica Reisman, 2024-09-10 For decades, science fiction has compelled us to imagine futures both inspiring and cautionary. Whether it's a cryptic message encountered by a survey ship, the discovery of alien life in the distant reaches of space, a window into a future Earth, or the adventures of well-meaning AI, science fiction inspires our imagination and delivers a lens through which we can view ourselves and the world around us. At the very heart of the genre is short fiction, the secret lab that has introduced many of the new ideas, techniques, and voices prominent across all other media. In *The Best Science Fiction of the Year: Volume Eight*, Hugo and Locus Award-winning editor Neil Clarke provides a comprehensive year-in-review of 2022's short fiction markets and selects thirty-one of its best stories from the wealth of magazines, anthologies, podcasts, and collections that make up the field. In these pages you'll find works by both the new and established authors who are setting the pace for science fiction today and into tomorrow. Start your journey here.

Digital Environments and Human Relations Adriano Fabris, Sergio Belardinelli, 2024-12-09 In *Digital Environments and Human Ecology: New Perspectives on AI Issues*, editors and contributors embark on a multidisciplinary exploration of how artificial intelligence (AI) is reshaping the landscapes of human interactions, societal structures, and individual and collective psychologies. Discussing if and to what extent the digital environment can be considered an extension of our environment, this book investigates the profound implications of AI's integration into our daily life, emphasizing the need for a harmonious coexistence between technological advancements and human-centric values, stressing the importance of sustainability in digital development and, therefore, a renewed Human Ecology. By weaving together insights from computer science, social sciences, philosophy, and environmental studies, this book offers a comprehensive and nuanced understanding of the complex relationship between humans and technology. It serves as a vital resource for policymakers, technologists, scholars, and anyone interested in the ethical and ecological implications of digital technologies in our lives.

Teach Us to Pray Charles Francis Whiston, 2009-12-01 The current resurgent interest in prayer emanates from many walks of life. Threats of war, economic crises, and conflicting ideologies are affecting the thinking of thoughtful men and

women. Increasingly, they find themselves looking for inspiration and directives. Teach Us to Pray deals specifically with the nature and power of Christian prayer, and it invites the reader to explore and enter into the great elements of Christian praying. In his Foreword, Nels F. S. FerrŽ says: I have seldom been so thoroughly convinced of the need of any single book as I am of this one. If it is read and used in the spirit in which it has been written, it will come as a fresh breeze of power to this desperately needy and despairing world . . . It rises out of the genuine prayer life of its author. The reader will feel himself caught by its power and purpose the more he is willing to let himself go with it.
