Road Ends Ahead: Reflections on Aging and the Outdoor Lifestyle Matt Artz, 2013-08-24 I'm getting older. I'm slowing down. I can't do everything that I used to. And as the steamroller of old age continues its relentless advance, there's not much I can do about it. Except complain. And write. Many of the outdoor stories I've been writing over the last three or so years share a common theme: reflections on aging, and how it's changing my perspective on life and my relationship with the outdoors. And thus this little compilation was born. The road may end ahead, but there is still quite a distance left to travel...

The National Curriculum Outdoors: Year 6 Sue Waite, Michelle Roberts, Deborah Lambert, 2020-06-25 Part of the National Curriculum Outdoors series, aimed at improving outside-the-classroom learning for children from Year 1 to Year 6 Teaching outside the classroom improves pupils' engagement with learning as well as their health and wellbeing, but how can teachers link curriculum objectives effectively with enjoyable and motivating outdoor learning in Year 6? The National Curriculum Outdoors: Year 6 presents a series of photocopiable lesson plans that address each primary curriculum subject, whilst enriching pupils with the benefits of learning in the natural environment. Outdoor learning experts Sue Waite, Michelle Roberts and Deborah Lambert provide inspiration for primary teachers to use outdoor contexts as part of their everyday teaching and showcase how headteachers can embed curriculum teaching outside throughout the school, whilst protecting teaching time and maintaining high-quality teaching and performance standards. All of the Year 6 curriculum lessons have been tried and tested successfully in schools and can be adapted and developed for school grounds and local natural environments. What's more, each scheme of work in this all-encompassing handbook includes primary curriculum objectives; intended learning outcomes; warm-up and main activities; plenary guidance; natural connections; ICT and PSHE links; and word banks. Please note that the PDF eBook version of this book cannot be printed or saved in any other format. It is intended for use on interactive whiteboards and projectors only.

The Palgrave International Handbook of Women and Outdoor Learning Tonia Gray, Denise Mitten, 2018-05-12 This Handbook serves as a starting point for critical analysis and discourse about the status of women in outdoor learning environments (OLEs). Women choose to participate actively in outdoors careers, many believing the profession is a level playing field and that it offers alternatives to traditional sporting activities. They enter outdoor learning primarily on the strength of their enthusiasm for leading and teaching in natural environments and assume the field is inclusive, rewarding excellence regardless of age, gender, socioeconomic status, disability, or ethnicity. However, both research and collective experiences in OLEs suggest that many women feel invisible, relegated, marginalized, and undervalued. In response to this marginalization, this Handbook celebrates the richness of knowledge and practices of women practitioners in OLEs. Women scholars and practitioners from numerous fields, such as experiential outdoor education, adventure education, adventure therapy, and gender studies, explore the implications of their research and practice using poignant examples within their own disciplines. These insights emerge from similar life experiences as women and outdoor leaders in the 1970s to the present. Social inequalities still abound in OLEs, and the Handbook ensures that the contributions of women are highlighted as well as the work that needs to be done to make these spaces inclusive. Global in perspective and capacious in content, this one-stop volume is an indispensable reference resource for a diverse range of academics, including students and researchers in the fields of education, psychology, sociology, gender studies, geography, and environment studies, as well as the many outdoors fields.

Outdoor Environmental Education in Higher Education Glyn Thomas, Janet Dymont, Heather Prince, 2021-11-01 This book brings together an international group of authors to discuss the outdoor environmental education (OEE) theory and practice that educators can use to support teaching and learning in higher education. The book contents are organised around a recently established list of threshold concepts that can be used to describe the knowledge and skills that university students would develop if they complete a major in outdoor education. There are six key sections: the theoretical foundations and philosophies of OEE; the pedagogical approaches and issues involved in teaching OEE; the ways in which OEE is a social, cultural and environmental endeavour; how outdoor educators can advocate for social justice; key approaches to safety management; and the need for on-going professional practice. The threshold concepts that form the premise of the book

describe outdoor educators as creating opportunities for experiential learning using pedagogies that align their programme's purpose and practice. Outdoor educators are place-responsive, and see their work as a social, cultural and environmental endeavour. They advocate for social and environmental justice, and they understand and apply safety principles and routinely engage in reflective practice. This book will provide clarity and direction for emerging and established outdoor educators around the world and will also be relevant to students and professionals working in related fields such as environmental education, adventure therapy, and outdoor recreation.

A Life Outside 2: Mountain Biking, Kayaking, Rock Climbing, and Other Excuses Matt Artz, 2012-10-30 The second volume in the A Life Outside series brings together 15 all-new essays and stories about the outdoor lifestyle. A Life Outside 2 maintains the trademark humor of the first volume while also looking more closely at the meaning of the experiences. Unsettling Settler-Colonial Education Cornel Pewewardy, Anna Lees, Robin Zape-tah-hol-ah Minthorn, 2022 "TIPM and the storywork in this book are determining the kind of lives we aim to lead and will lead as Indigenous peoples." —From the Foreword by Tiffany Lee, University of New Mexico This book presents the Transformational Indigenous Praxis Model (TIPM), an innovative framework for promoting critical consciousness toward decolonization efforts among educators. The TIPM challenges readers to examine how even the most well intended educators are complicit in reproducing ethnic stereotypes, racist actions, deficit-based ideology, and recolonization. Drawing from decades of collaboration with teachers and school leaders serving Indigenous children and communities, this volume will help educators better support the development of their students' critical thinking skills. Representing a holistic balance, the text is organized in four sections: Birth-Grade 12 and Community Education, Teacher Education, Higher Education, and Educational Leadership. Unsettling Settler-Colonial Education centers the needs of teachers, children, families, and communities that are currently engaged in public education and who deserve an improved experience today, while also committing to more positive Indigenous futures. Poetic Environmental Activism and Education Amanda Fulford, Victoria Jamieson, 2025-03-25 This book brings together the works of the nineteenth and twentieth century writers Henry David Thoreau and Anna Shepherd. Finding in their work a common approach of poetic forms of writing that enact kinds of environmental activism, the book re-positions them in the context of current environmental crises by offering an original resource for supporting poetic environmental activism in educational contexts. Bringing together scholarship from North America and Europe, the book draws on Thoreau and Shepherd's literary and philosophical sources to support a conceptual understanding of education's role in how we think about, understand, and tackle the climate crisis. Chapters trace the idea of poetic environmental activism in Thoreau and Shepherd, applying literary and environmental thought to educational practice and contexts. The book is timely in taking a scholarly approach that explores educational engagements with climate change and focuses on education for environmental

sustainability. Advocating for engagement with the climate emergency through the lens of poetic environmental activism, this volume will appeal to postgraduate students, researchers, and scholars involved with sustainability education, philosophy of education, poetic inquiry, and literary theory for environmental action.

That is why Chris Peerss fresh study of this fascinating and controversial era is of such value.
