**Joseph Agassi, Abraham Meidan**

Focus on Thinking Paul A. Wagner, Daphne Johnson, Frank Fair, Daniel Fasko Jr., 2017-01-23 In the wake of initiatives such as No Child Left Behind and the use of high-stakes testing, the emphasis in schools has been on drill and practice for the test. Genuine understanding and critical thinking have been increasingly shortchanged. As a result, students have fewer opportunities to advance their insight into cognitive and emotional challenges, even though both teachers and parents recognize the importance of developing deliberative and reflective thinking skills. This book uniquely combines two things. First, it provides resources for classroom teachers in middle and secondary school that make it possible to, at a moment's notice, take advantage of a teachable moment by drawing students into productive intellectual discussions. Second, it gives the reader an overview of the rationale and the research base for engaging students in educational activities that are truly intellectual and that are not limited to training for testing success.

*Plato's Theory of Art* Rupert C. Lodge, 2014-06-23 First published in 2000. This is Volume VII of ten in the International Library of Philosophy in a series on Ancient Philosophy. Written around 1953, this book looks at Plato and his ideas on art based on his 'Dialogues'.

**Be Extraordinary** Guy Tal, 2024-07-19 An inspiring, educational, and practical book about philosophy and art, and finding a personally meaningful life. Teacher, philosopher, and author Guy Tal has written several best-selling books on photography, creativity, and expression. While it would be understandable to label Guy a "photographer," it is more accurate to call him a philosopher and artist who has forged a creative life on his own terms: a life shaped by his love of nature, his interest in science and philosophy, his individualistic temperament, and his desire to create art that is expressive and significant in the ways most meaningful to him. *Be Extraordinary: Philosophical Advice for Photographic and Other Artists*, Guy shares his knowledge of philosophy and art, then offers advice on how to implement it into your own work. In the first part, "Foundations," Guy lays out a conceptual framework for the book with short essays about philosophy and art. In the second part, "Practical Advice," he offers a series of brief essays aiming to enable and empower you to apply the foundational

philosophies to your own life and work. Together, the two parts demonstrate how Guy has carefully fashioned his own perspective on philosophy, art, and life, and offer you a set of tools for finding your own path. This is not a how-to book of techniques and tips. The goal of the book is to make you think, to pose hard questions, to challenge you to question common beliefs and attitudes, to nudge you out of your comfort zone, and to help you find the courage to become who you—and only you—are. And in so doing, to create a life and art that is meaningful in the deepest ways that life and art can be meaningful, which is to say: meaningful to you.

A View from the Balcony--Opera through Womanist Eyes Jean Derricotte-Murphy, 2024-08-23 In this theological work, readers are seated in a metaphorical balcony as a counter melody is composed within America's operatic tradition. By using imaginary opera glasses, readers are invited to critically view American society and history. The most popular folk songs of white Southerners, Western settlers, and Northern elites were composed from chords of colonialism, white supremacy, patriarchy, hegemony, and xenophobia—forms of anthropological poverty. These songs were, and remain, the most discordant melodies heard by indigenous and enslaved persons in America. Indicting the “church” for its complicity in these oppressions, this work offers the reader a historical glimpse at the philosophical and religious underpinnings of systemic racism. A new healing hermeneutic, the balcony hermeneutic, enables the reader to view, critique, assess, correct, and reverse the devastating consequences of anthropological poverty. By taking a “reversed gaze” of traditional Western Eurocentric systems of knowledge production, through theomusicology, this work privileges the voices of indigenous scholars—philosophers, anthropologists, theologians, and performers—to sing a new song as we correct negative narratives and lyrics through resistance operatic performances.

**The Gate of Appreciation: Studies in the Relation of Art to Life** Carleton Eldredge Noyes, 2022-09-04 Carleton Eldredge Noyes's 'The Gate of Appreciation: Studies in the Relation of Art to Life' is a profound exploration of aesthetics, situated at the intersection of art, philosophy, and the human experience. Through the beautifully crafted text, Noyes dissects the intrinsic connection between art and life, revealing how art serves as a gateway to understanding the broader world around us and our own inner selves. A classic in the realm of aesthetic theory, this book unites historical context and personal introspection, resonating with the literary style of early 20th-century scholarship and the burgeoning intellectual curiosity of the period regarding the philosophy of art. Noyes's prose, both lucid and enlightening, contends with timeless questions and remains as relevant now as at the time of its initial publication. Carleton Eldredge Noyes, a respected literary figure and essayist, was driven by an innate appreciation for beauty and its manifestations in daily life. His expertise and passion for the arts are evident in every page of 'The Gate of Appreciation,' which can be perceived as a summation of a life devoted to understanding the profound reciprocity between artistic expression and life's richness. The author's immersion in the cultural milieu of his time provides a unique foundation for his observations and lends credibility to his profound insights

into the purpose and impact of art. This meticulously republished edition by DigiCat Publishing is a homage to Noyes's enduring work and its significance in the studies of art and life. Scholars of aesthetics, art history, and philosophy, alongside any reader with a yearning to delve into the profound relationship between art and the human condition, will find this book both illuminating and inspiring. 'The Gate of Appreciation' beckons to those who seek to unlock the deeper appreciation of art and its relevance to our collective and individual existences.

**Art, Design, Craft, Beauty and All Those Things...** Donald Richardson, 2023-08-18 Responding to many recent calls for redress and restitution, Richardson summarises the historical and current situation and attributes its problematics to the fact that theorists and historians have taken the concept art as a generic that includes both design and craft – which are actually and validly distinguishable from art by application of the concept function/al – or else ignored the two entirely. Considering the concept function/al, he maintains, calls into question the view that the three may be sub-classes of the one class: whereas in a work of art, typically there is a resolution of the tension between form and content, in works of design and craft the resolution is between form and function. How this recognition can clarify the issue informs the entire book. The book's other major thesis is the realisation that aesthetic values are inherently human and that, therefore, they apply not only to art but to life in general. Far from being frivolous or a mere 'emotion', the aesthetic is a sense of equivalent psychic status to sight and hearing and, like them, is employed at almost every moment of our daily lives – which fact grounds art, design and craft deeply in human life. This is reflected in the universal use of the human form (including the exhibition of sexual characteristics) in art. The eternal conflict between making art and making a living from making art is examined and contrasted to the rarely-recognised, but positive, role of design in planning and industry. Richardson also critiques common theories of representation and composition, including 'creativity', Albertian perspective and scientific and geometric theories of beauty and composition; also the relevance of the camera and the computer in the field.

**Art of Ford Madox Brown** Kenneth Bendiner, 2010-11-01 This is the first comprehensive history devoted to the art of Ford Madox Brown (1821-93), in which his paintings establish him as a major figure in the most important new art movement of Victorian England, Pre-Raphaelitism. The book presents a new explanation of the development and basic aims of Pre-

Raphaelite art as a whole and offers a revealing discussion of the power and importance of the humor and negative spirit that run throughout Brown's work. It also ties Brown's realist approach to British decorative taste at midcentury and redefines his place in the Aesthetic Movement, a cultural trend that dominated the latter half of the nineteenth century. In addition, the artist's socialist leanings and nationalistic tendencies, expressed in depictions of workers, children, women, and religious scenes, are set out more fully than in any previous literature on the artist.

*On Realism* J. P. Stern, 2021-12-16 First published in 1973, *On Realism* is a comprehensive introduction to the complex problem of literary realism. Written from both a critical and philosophical perspective, the book brings together the concrete study of literary cases and the conceptual analysis of the terms used in describing them. It uses examples drawn from a wide range of European literature and engages in philosophical discussion to argue for a richer and freer sense of the concept than was more commonly in favour at the time of writing. The book describes the literary forms of realism as an art of the 'middle distance' and sets out its character and value against alternatives and distortions - symbolism, naturalism, socialist realism, faits divers, and the literature of language consciousness. *On Realism* will appeal to those with an interest in literary history, the history of literary theory, and literature and philosophy.

*A Critical Rationalist Aesthetics* Joseph Agassi, Ian C. Jarvie, 2008-01-01 This book is a first attempt to cover the whole area of aesthetics from the point of view of critical rationalism. It takes up and expands upon the more narrowly focused work of E. H. Gombrich, Sheldon Richmond, and Raphael Sassower and Louis Ciccotello. The authors integrate the arts into the scientific world view and acknowledge that there is an aesthetic aspect to anything whatsoever. They pay close attention to the social situatedness of the arts. Their aesthetics treats art as emerging from craft in the form of luxurious and playful challenge to the audience. In developing it they place emphasis on the number of questions and claims that can be settled by appeal to empirical facts; on the historical character of aesthetic judgements; and on the connection of aesthetic truth to true love and true friendship, i.e. fidelity and integrity, not to informative truth.

*Theory and Practice of Nursing* Lynn Basford, Oliver Slevin, 2003 This is a comprehensive guide to the theory and practice of nursing addressing the nursing theory and skills specific to clients' and patients' needs. Each chapter has learning outcomes, study activities and reflection to prompt readers to learn as they read.

"Death, Torture and the Broken Body in European Art, 1300-1650" John R. Decker, 2017-07-05 Bodies mangled, limbs broken, skin flayed, blood spilled: from paintings to prints to small sculptures, the art of the late Middle Ages and early modern period gave rise to disturbing scenes of violence. Many of these torture scenes recall Christ's Passion and its aftermath, but the martyrdoms of saints, stories of justice visited on the wicked, and broadsheet reports of the atrocities of war provided fertile ground for scenes of the body's desecration. Contributors to this volume interpret pain, suffering, and the desecration of the human form not simply as the passing fancies of a cadre of proto-sadists, but also as serving larger

social functions within European society. Taking advantage of the frameworks established by scholars such as Samuel Edgerton, Mitchell Merback, and Elaine Scarry (to name but a few), *Death, Torture and the Broken Body in European Art, 1300-1650* provides an intriguing set of lenses through which to view such imagery and locate it within its wider social, political, and devotional contexts. Though the art works discussed are centuries old, the topics of the essays resonate today as twenty-first-century Western society is still absorbed in thorny debates about the ethics and consequences of the use of force, coercion (including torture), and execution, and about whether it is ever fully acceptable to write social norms on the bodies of those who will not conform.

**Routledge Revivals: Painting, Language and Modernity (1985)** Michael Phillipson, 2016-11-10 First published in 1985, this book draws together the author's artistic with analytical practices which had been developed over many years of sociological enquiry. It interprets a 'work of art' as a site on which a viewer or critic is invited to share in questioning celebration of the painting itself. The author reassesses modern painting's relation to its own origins and to tradition in light of the emergence of 'postmodern' practice — exploring its engagement of fundamental questions about language and being. Also assessed is the relevance of the metaphors of writings and Reading to an understanding of painting and viewing practices — looking at painters' writings as well as phenomenological and post-structuralist writers.
