**Jens Andermann**

Indefinite Visions Martine Beugnet, 2017-07-07 Moving image culture seems to privilege the instantly identifiable: the recognizable face, the well-timed stunt, the perfectly synchronized line of dialogue. Yet perfect, in-focus visibility does not come 'naturally' to the moving image, and if there is one visual effect the eye of the camera can record better than the human eye it is blur. Looking beyond popular media to works of experimental cinema and video art, this groundbreaking collection addresses the aesthetics and politics of moving images in states of decay, distortion, indistinctness and fragmentation. A range of international scholars examines what is at stake in these images' sometimes radical foregrounding of materiality and mediation, or of evanescence and spectrality, as well as their challenging of the dominant position accorded to 'legible' images. How have artists and filmmakers rendered the 'indefinite' image, and what questions does it pose? With a range of approaches, from aesthetics to phenomenology to production studies, the authors in this volume investigate techniques, themes and concepts that emerge from this wilful excavation of the moving image's material base.

*Hyperbodies* Kas Oosterhuis, 2003 Hyperbodies are buildings and environments which can continuously change shape and content. The mutations of such buildings depend on the input coming from their user as well as from the surroundings. This interaction between user and building is determined by a data flow which the hyperbody uses and converts into a hypersurface structure, which then alters our perception of space in and around the hyperbody. The architect programs this interaction and can thereby define the specific character of the building. In this book, the author provides a concise overview of this latest digital tool. Kaas Oosterhuis is Professor at the Technical University Delft and is a well-known Dutch architect.

*Architecture Goes Wild* Kas Oosterhuis, 2002 Een selectie van teksten van architect Kas Oosterhuis waarin hij zijn beweegredenen uiteenzet rond de digitale revolutie, die hij vanaf het begin van de 90-er jaren, in zijn ontwerppraktijk inzet.

**The Changing Shape of Practice** Michael U. Hensel, Fredrik Nilsson, 2016-04-14 Architectural practices worldwide have to deal with increasingly complex design requirements. How do practices acquire the ability to do so? The Changing Shape of Practice provides a handbook of examples for practices that wish to integrate more research into their work and a reference book for students that seek to prepare themselves for the changing shape of practice in architecture. It addresses the increasing integration of research undertaken in architectural practices of different sizes ranging from small to very large practices from the UK, USA, Europe and Asia. The book is organized according to the size of the practices which is

significant in that it addresses the different structures and resourcing requirements that are enabled by specific practice sizes, as this determines and constrains the type, scope and modes of research available to a given practice. The practices covered include: Woods Bagot Perkins + Will White AECOM UN Studio Shop Architects PLP Architecture Kieran Timberlake 3XN ONL AZPML Thomas Herzog + Partners Herreros Arquitectos Spacescape OCEAN Design Research Association By taking stock of the current shape of practice, the book provides essential information for professional architects who are integrating research into their practice.

**Kubrick and the Deep State** Heracles Harixcalde, 2024-09-12 By exploring the secrets of Kubrick's filmography, the author, who describes himself as the anti-Harari, reveals the stages and key actors of the global mind control project, as well as its spiritual and technological workings. This analysis, situated at the crossroads of psychosociology, science, organizational theory, religion, cosmology, and detective fiction, will show you how Kubrick's symbolic and initiatory cinema, aided by the intuitive reasoning of psychoanalyst CG Jung, hides, much like Leonardo da Vinci in his time, the keys to understanding the universe. At once an explanation of artificial karma, a manifesto for a better future, and a survival guide against transnational organizations, the author presents a subversive, profound, useful, and accessible book, but one not to be placed in just anyone's hands. Volume I from the *Mysterium Australis* Trilogy which aims to expose the key and discreet role of Australia in the global satanic oligarchy.

**The Closed World** Paul N. Edwards, 1996 The Closed World offers a radically new alternative to the canonical histories of computers and cognitive science. Arguing that we can make sense of computers as tools only when we simultaneously grasp their roles as metaphors and political icons, Paul Edwards shows how Cold War social and cultural contexts shaped emerging computer technology--and were transformed, in turn, by information machines. The Closed World explores three apparently disparate histories--the history of American global power, the history of computing machines, and the history of subjectivity in science and culture--through the lens of the American political imagination. In the process, it reveals intimate links between the military projects of the Cold War, the evolution of digital computers, and the origins of cybernetics, cognitive psychology, and artificial intelligence. Edwards begins by describing the emergence of a closed-world discourse of global surveillance and control through high-technology military power. The Cold War political goal of containment led to the SAGE continental air defense system, Rand Corporation studies of nuclear strategy, and the advanced technologies of the Vietnam War. These and other centralized, computerized military command and control projects--for containing world-scale conflicts--helped closed-world discourse dominate Cold War political decisions. Their apotheosis was the Reagan-era plan for

a Star Wars space-based ballistic missile defense. Edwards then shows how these military projects helped computers become axial metaphors in psychological theory. Analyzing the Macy Conferences on cybernetics, the Harvard Psycho-Acoustic Laboratory, and the early history of artificial intelligence, he describes the formation of a cyborg discourse. By constructing both human minds and artificial intelligences as information machines, cyborg discourse assisted in integrating people into the hyper-complex technological systems of the closed world. Finally, Edwards explores the cyborg as political identity in science fiction--from the disembodied, panoptic AI of 2001: A Space Odyssey, to the mechanical robots of Star Wars and the engineered biological androids of Blade Runner--where Information Age culture and subjectivity were both reflected and constructed. Boss, 2006-05-31 By revealing the facts behind the fiction of some of the finest films in the sci-fi genre, Fantastic Voyages offers a novel approach to teaching science: using scenes from science fiction films to illustrate fundamental concepts of physics, astronomy, and biology.

**Kubrick's Hope** Julian Rice, 2008-09-29 There have been two common assumptions about Stanley Kubrick: that his films portray human beings who are driven exclusively by aggression and greed, and that he pessimistically rejected meaning in a contingent, postmodern world. However, as Kubrick himself remarked, 'A work of art should be always exhilarating and never depressing, whatever its subject matter may be.' In this new interpretation of Kubrick's films, Julian Rice suggests that the director's work had a more positive outlook than most people credit him. And while other studies have recounted Kubrick's life and production histories, few have offered lucid explanations of specific sources and their influence on his films. In Kubrick's Hope, Rice explains how the theories of Freud and Jung took cinematic form, and also considers the significant impression left on the director's last six films by Robert Ardrey, Bruno Bettelheim, and Joseph Campbell. In addition to providing useful contexts, Rice offers close readings of the films, inviting readers to note details they may have missed and to interpret them in their own way. By refreshing their experience of the films and discarding postmodern clichés, viewers may discover more optimistic themes in the director's works. Beginning with 2001: A Space Odyssey and continuing through A Clockwork Orange, Barry Lyndon, The Shining, Full Metal Jacket, and Eyes Wide Shut, Rice illuminates Kubrick's thinking at the time he made each film. Throughout, Rice examines the compelling political, psychological, and spiritual issues the director raises. As this book contends, if these works are considered together and repeatedly re-viewed, Kubrick's films may help viewers to personally grow and collectively endure.

**Rave Culture and Religion** Graham St John, 2004-06-01 The collection provides insights on developments in post-traditional religiosity (especially 'New Age' and 'Neo-Paganism') through studies of rave's Gnostic narratives of ascensionism and re-enchantment, explorations of the embodied spirituality and millennialist predispositions of dance culture, and investigations of transnational digital-art countercultures manifesting at geographic locations as diverse as Goa, India, and

Nevada's Burning Man festival. Contributors examine raving as a new religious or revitalization movement; a powerful locus of sacrifice and transgression; a lived bodily experience; a practice comparable with world entheogenic rituals; and as evidencing a new Orientalism. *Rave Culture and Religion* will be essential reading for advanced students and academics in the fields of sociology, cultural studies and religious studies.

**100 Cult Films** Ernest Mathijs, Xavier Mendik, 2017-10-23 Some films should never have been made. They are too unsettling, too dangerous, too challenging, too outrageous and even too badly made to be let loose on unsuspecting audiences. Yet these films, from the shocking *Cannibal Holocaust* to the apocalyptic *Donnie Darko*, from the destructive *Tetsuo* to the awfully bad *The Room*, from the hilarious *This Is Spinal Tap* to the campy *Showgirls*, from the asylum of *Das Cabinet des Dr. Caligari* to the circus of *Freaks*, from the gangs of *The Warriors* to the gangsters of *In Bruges* and from the flamboyant *Rocky Horror Picture Show* to the ultimate cool of *The Big Lebowski*, have all garnered passionate fan followings. Cult cinema has made tragic misfits, monsters and cyborgs, such as Edward Scissorhands or *Blade Runner's* replicants, heroes of our times. *100 Cult Films* explains why these figures continue to inspire fans around the globe. Cult film experts Ernest Mathijs and Xavier Mendik round up the most cultish of giallo, blaxploitation, anime, sexploitation, zombie, vampire and werewolf films, exploring both the cults that live hidden inside the underground (*Nekromantik*, *Café Flesh*) and the cult side of the mainstream (*Dirty Dancing*, *The Lord of the Rings*, and even *The Sound of Music*). *100 Cult Films* is a true trip around the world, providing a lively and illuminating guide to films from more than a dozen countries, across nine decades, representing a wide range of genres and key cult directors such as David Cronenberg, Terry Gilliam and David Lynch. Drawing on exclusive interviews with some of the world's most iconic cult creators and performers, including Dario Argento, Pupi Avati, Alex Cox, Ruggero Deodato, Jesús Franco, Lloyd Kaufman, Harry Kümel, H. G. Lewis, Christina Lindberg, Takashi Miike, Franco Nero, George A. Romero and Brian Yuzna, and featuring a foreword by cult director Joe Dante, *100 Cult Films* is your ultimate ticket to the midnight movie show.

*The Optic of the State* Jens Andermann, 2007-09-02 *The Optic of the State* traces the production of nationalist imaginaries through the public visual representation of modern state formation in Brazil and Argentina. As Jens Andermann reveals, the foundational visions of national heritage, territory, and social and ethnic composition were conceived and implemented, but also disputed and contested, in a complex interplay between government, cultural, and scientific institutions and actors, as a means of propagating political agendas and power throughout the emerging states. The purpose of these imaginaries was to vindicate the political upheavals of the recent past and secure the viability of the newly independent states through a sense of historic destiny and inevitable evolution. The careful presentation of artifacts and spectacles was also aimed abroad in order to win the favor of European imperial powers and thereby acquire a competitive place in the nascent global economy of the late nineteenth century. *The Optic of the State* offers a fascinating critique of the visual aspects of national mythology. It

exposes how scientific and cultural institutions inscribed the state-form in time and space, thus presenting historical processes as natural givens.

**The Violence of the Letter** Melanie McMahon,2023-09-27 The emergence of the alphabet in ancient Greece, usually heralded as the first step in the inexorable march toward reason and progress, in fact signaled the introduction of a chance technology that hijacked the future, with devastating consequences for humanity. By investigating an array of cultural artifacts, ranging from Kubrick's 2001: A Space Odyssey to the Oracle at Delphi to Luther's challenge to the Church, this book demonstrates how the apparently benign emergence of writing made possible far-ranging systems of organized domination and unprecedented levels of violence. The Violence of the Letter considers how a twenty-six-letter code changed the face of the world, and not always for the better.

**A Level Media Studies** Pete Bennett,Sarah Casey Benyahia,Jerry Slater,2019-07-09 A Level Media Studies is a comprehensive guide to the subject content of AS and A Level Media Studies, across all examining boards.
