*The Goldenacre* Philip Miller, 2022-06-28 A bitter journalist and troubled art expert risk their lives to find the connection between a legendary painting and a series of rash murders in this “riveting, brutal journey into the high-stakes world of legacy art and inherited wealth” (Denise Mina, author of *Conviction*). Thomas Tallis, inspector of provenance, has just arrived in Edinburgh, Scotland, to authenticate *The Goldenacre*, a masterpiece by iconic Scottish architect and painter Charles Rennie Mackintosh. Still dealing with a miserable divorce and the fallout from a disastrous job in London, Tallis is eager to sign off on the painting and leave. It should be simple, as the painting has been owned by one noble family since the '20s. But then a horrifying parcel arrives on Tallis's desk, and the threatening message is clear: someone doesn't want him inspecting the painting. Now that Tallis sees lives are in danger, he has no choice but to stay until the investigation is complete. Meanwhile, gruesome murders are plaguing Edinburgh. First, a Scottish painter of great renown. Next, an Edinburgh City Counsellor. Battle-hardened newspaper reporter Shona Sandison is on the case, even as her beloved industry shrinks around her. Shona doesn't care who she steps on to get the best story, and she soon uncovers a link between *The Goldenacre* and the murders. As Tallis's personal crises reach a fever pitch, Shona struggles to enlist his help in understanding how the painting is mixed up in all this violence before either one of them becomes the next victim. Pensive, lush, and tragic, *The Goldenacre* is a heartbroken love letter to Edinburgh, and an unpredictable, gorgeously plotted mystery to savor.

Word Association Norms David Stuart Palermo,James J. Jenkins,1964 Word Association Norms was first published in 1964.In an effort to stimulate research and to provide raw materials for a wide variety of behavior studies, the authors present a complete tabulation of the responses of 4,500 subjects, ranging from fourth grade through college age, to a word association test of 200 words. The norms thus obtained will be useful to psychologists, linguists, psychiatrists, anthropologists, and others studying verbal behavior and related questions. The data are arranged in three major tables: first, a tabke of the responses made to each stimulus word, including the frequency of each response in each sex-grade group; second, a table of all idiosyncratic responses to each stimulus; third, a response index listing each response and the stimuli to which it occurred.
