The Archaeology of Iberia Margarita Diaz-Andreu, Simon Keay, 2013-12-02 For many archaeologists, Iberia is the last great unknown region in Europe. Although it occupies a crucial position between South-Western Europe and North Africa, academic attention has traditionally been focused on areas like Greece or Italy. However Iberia has an equally rich cultural heritage and archaeological tradition. This ground-breaking volume presents a sample of the ways in which archaeologists have applied theoretical frameworks to the interpretation of archaeological evidence, offering new insights into the archaeology of both Iberia and Europe from prehistoric time through to the tenth century. The contributors to this book are leading archaeologists drawn from both countries. They offer innovative and challenging models for the Paleolithic, Neolithic, Copper Age, Bronze Age, Iron Age, Roman, Early Medieval and Islamic periods. A diverse range of subjects are covered including urban transformation, the Iron Age peoples of Spain, observations on historiography and the origins of the Arab domains of Al-Andalus. It is essential reading for advanced undergraduates and those researching the archaeology of the Iberian Peninsula.

La cueva de Caldas (Priorio, Oviedo) M^a Soledad CORCHÓN RODRÍGUEZ, 2017-07-01 Este libro recoge los resultados de las investigaciones realizadas por un equipo internacional e interdisciplinar, en la Cueva de Las Caldas (Asturias). La cavidad fue habitada durante ca. 21,000 a 12,000 BP, y conserva uno de los registros estratigráficos más importantes del Solutrense y Magdaleniense de Europa, así como grabados parietales en el vestíbulo. Diferentes especialistas estudian las ocupaciones de la Sala II, que corresponden al Magdaleniense inferior, medio y superior y el Solutrense final. Destaca la colección de Arte mueble en hueso, asta y marfil, a la que se suman más de 400 plaquitas de arenisca grabadas con motivos figurativos y lineales, o con pintura roja. Algunos de los sujetos reproducidos en este arte son emblemáticos por su rareza: antropomorfos, bisontes, mamuts, renos, rinocerontes lanudos, rebecos, etc. A este volumen seguirá una segunda monografía, dedicada al estudio espacial del paisaje de Las Caldas, los suelos de ocupación y los restos humanos, así como al registro arqueológico solutrenses de la Sala II y el Arte parietal.

Palaeolithic Pioneers: Behaviour, abilities, and activity of early Homo in European landscapes around the western Mediterranean basin ~1.3-0.05 Ma. Michael J. Walker, 2017-06-30 Archaic humans were present for over a million years in western Mediterranean Europe where they left very many traces of their early stone-age activities and behaviour, and

sometimes even human skeletal remains. This book evaluates archaeological findings about their life-ways at many important sites in Italy, southern France, and Spain.

Caracterización microclimática de cavidades y análisis de la influencia antrópica de su uso turístico Ángel Fernández Cortés, 2005-02-17 La conservación y protección de cavidades necesita de herramientas de gestión adecuadas y fundamentadas en un conocimiento exhaustivo de los parámetros ambientales del karst. La principal herramienta de gestión del karst es la definición y delimitación de áreas de protección y, en el caso de cavidades turísticas, la estimación de la capacidad de carga de visitas. Esta tesis doctoral aborda los aspectos metodológicos más importantes aplicados al control microclimático de cavidades, especialmente aquellas abiertas al turismo o con una marcada potencialidad para ello. La utilización de una cantidad ingente de datos ambientales de diferentes cavidades del sureste peninsular, ha requerido el uso de varias técnicas estadísticas con el objetivo de simplificar y revalorizar esta información ambiental. La posibilidad de incorporar los resultados del control ambiental en cavidades dentro de un modelo integral de gestión, en el que se contemple además aspectos socioeconómicos, es el principal interés del trabajo de investigación para los gestores de este tipo de georrecursos. El análisis microclimático en cada una de las cavidades estudiadas se aborda de forma diferente dependiendo del tipo de datos registrados en cada una de ellas. En cavidades como la Cueva del Agua y la Cueva de las Ventanas se caracteriza el comportamiento espaciotemporal de los parámetros fundamentales de su microclima, como es la temperatura y el contenido en CO₂ del aire, en aquellas salas que se prevé que sean visitadas según las ideas concebidas en los proyectos de habilitación al turismo. Esta información sobre el estado cero de la cavidad se completa con el análisis de los procesos de infiltración y con el estudio de los fenómenos de intercambio de masas de aire. En el karst de Sorbas, el diseño e instalación de un sistema inteligente de control ambiental en una de las cavidades potencialmente turísticas (Sistema Covadura), permite reunir una amplia base de datos temporal que, junto con la información microclimática de carácter espacial, constituye el conocimiento básico sobre el estado inicial de la cavidad antes de cualquier actuación de habilitación al turismo. Por su parte, la Geoda gigante de Pulpí representa un caso excepcional y de características diferentes a los de una cavidad turística en sentido estricto. La singularidad de este enclave en cuanto a su fragilidad y dimensiones, junto con la necesidad inminente de adoptar medidas encaminadas a su protección, ha posibilitado el desarrollo de un estudio microclimático exhaustivo en aras de evaluar su posible apertura al turismo.

Arqueomanía. Historias de la arqueología Manuel Pimentel, Manuel Navarro, La arqueología es una ciencia apasionante que aúna el rigor con el misterio y la aventura. Conozca sus increíbles historias: Olduvai, Orce, Atapuerca, Altamira, el Tesoro del Carambolo, Cova Eirós, los santuarios tartésicos, los príncipes íberos, la gran Roma, la sepultura desconocida de Boabdil, o el templo de Millones de Años de Tutmosis III, entre otros, componen la mejor obra de divulgación arqueológica. La arqueología es una ciencia apasionante bajo la que se ocultan historias increíbles. Los arqueólogos rastrean nuestro

pasado en sus excavaciones. A ellos les debemos tantos y tantos tesoros descubiertos y, sobre todo, lo más importante, el conocimiento de lo que aconteciera miles de años atrás. Hemos descendido a cuevas profundas, trepado pendientes y montañas, soportado el frío y el calor para conseguir llegar a yacimientos remotos. En esos lugares, algunos llenos de magia ancestral, hemos podido compartir muchas horas, en algunos casos de sol a sol, con los verdaderos protagonistas de esta obra, los arqueólogos. Pero, sobre todo, vamos a contar historias de la arqueología; comenzando por aquel pasado remoto en el que como humanos dábamos los primeros pasos en una sabana africana. Conoceremos cómo llegamos a Europa, ya habitada por los neandertales y cómo creamos el arte rupestre. Tras conocer yacimientos e historias del Neolítico y de los primeros metales, nos adentraremos en los misterios tartésicos e íberos para llegar hasta la gran Roma. La desconocida arqueología insular, canaria y balear nos ocupará varios capítulos. Y como arqueología medieval, participaremos, entre otras, en la investigación arqueológica de un enigma templario y trataremos de averiguar dónde está enterrado el rey Boabdil el Desdichado. Y como queremos dar a conocer las misiones de los arqueólogos españoles en el extranjero, viajaremos hasta Egipto para conocer las excavaciones del templo de Millones de Años del faraón Tutmosis III. Esta obra también tiene la esencia de un libro de viajes, contiene la narración en primera persona de las impresiones que los paisajes, las personas y las ruinas causaron en nuestra alma de viajeros curiosos y apasionados por la arqueología y la historia. No somos arqueólogos ni científicos, somos divulgadores y tenemos muy clara nuestra misión: dar a conocer al gran público, de manera rigurosa y amena, la arqueología española y la tarea de sus arqueólogos.

Semblanza evolutiva neandertal en Europa Flores Escobedo, 2018-03-21 En este libro se realiza una semblanza de la historia que nos acerca a la vida de nuestros primos los Hombres de Neandertal, llamados así por haberse encontrado sus primeros restos reconocidos por la ciencia en el Valle del Neander, tramo del desfiladero del río Düsseln, Cuevas de Feldhofer, cercanías de Düsseldorf-Renania del Norte-Westfalia (Alemania). El Hombre de Neandertal vivió en Europa durante el período que va del año 250.000 al 21.430 a.C. y los últimos restos encontrados de los miembros de esta especie humana habitaron en España y es en la Cueva de la Carihuela en donde ya se pierde su registro fósil hacia el año 21.430 a.C. Los científicos tratan de averiguar con sus estudios, las causas que motivaron la extinción de esta raza humana, que pobló nuestro Planeta durante tan largo período de tiempo, para tratar de salvaguardar a nuestra especie Homo Sapiens que la habita actualmente de alguna amenaza similar.

Breve historia de Andalucía Manuel Peña, 2012 Los ocho historiadores que participan en el volumen Breve Historia de Andalucía, coordinado por el profesor de Historia Moderna de la Universidad de Córdoba y director de la revista Andalucía en la Historia, Manuel Peña Díaz, han consensuado un objetivo fundamental: divulgar la historia con rigor, riqueza documental e interpretaciones factibles y verídicas. Procedentes de distintas universidades andaluzas y diferentes campos cronológicos de estudio, todos ellos han realizado un importante esfuerzo de síntesis con el propósito de ofrecer al lector no

especialista una visión amplia de nuestro pasado, desde los primeros pobladores hasta nuestros días, es decir, desde dos millones de años antes de Cristo hasta el año 2.000 de nuestra era.

PREHISTORIA ANTIGUA DE LA PENÍNSULA IBÉRICA VV.AA.,2013-12-04 La ciencia prehistórica ha experimentado un notable auge en los últimos años al desprenderse de dogmatismos, variar sus intentos de conocimiento y abrirse a la multidisciplinariedad. Con este nuevo enfoque, la Península Ibérica ha visto aumentar notablemente su ámbito cronológico de estudio al descender la ocupación humana de la misma por debajo del millón de años. Paralelamente, la aparición de nuevos y espectaculares yacimientos arqueológicos, estudiados desde diversas y renovadas disciplinas, han enriquecido en cantidad y calidad las informaciones arqueológicas disponibles. Por estas razones, la Prehistoria del siglo XXI formula nuevas hipótesis para el mejor conocimiento de nuestros orígenes como europeos y para explicar la evolución biológica y cultural de las sociedades de cazadores recolectores de la Prehistoria Antigua (Paleolítico y Mesolítico). En este cambio del paradigma científico, la Península Ibérica ha jugado un papel fundamental, que pretendemos recoger en este manual universitario. La forma de enseñar y de aprender también ha cambiado en los últimos años con la aparición de los grados y el modelo de enseñanza del EEES. Este libro intenta, igualmente, adaptarse al mismo tratando de favorecer el estudio autónomo, los aspectos prácticos y la evaluación continua del estudiante. Al igual que la propia arqueología prehistórica hemos tratado de «humanizar» nuestra disciplina disminuyendo los aspectos descriptivos y potenciando las explicaciones sociales. Pensamos que con ello no solamente comprendemos mejor la dinámica que siguieron las sociedades humanas de la Península Ibérica a lo largo de un 99% de su historia, sino que creemos hacerlo también de una forma más amena y provechosa. Esperamos haberlo conseguido.

CINCO MILLONES DE AÑOS DE CAMBIO FLORÍSTICO Y VEGETAL en la Península Ibérica e Islas Baleares JOSÉ CARRIÓN coordinador ,2015-05-25 La Península Ibérica y las Islas Baleares suponen un centro de biodiversidad vegetal de gran importancia en la biogeografía del extremo occidental de Eurasia. En este libro se analizan y discuten los registros paleobotánicos para los últimos cinco millones de años de cambio ambiental, incluyendo estudios sobre polen y carbón fósil, restos macroscópicos preservados y otros microfósiles de importancia en la reconstrucción de ecosistemas pretéritos. La utilidad de este conocimiento excede su ámbito temático y alcanza la biología de la conservación y la gestión del patrimonio natural.

Peña Laja Manuel Pimentel,2014-09-25 El reportaje que María, una joven periodista, realiza sobre el *Homo antecessor*, la pondrá tras la pista del robo de huesos fósiles en Peña Laja, un yacimiento arqueológico con importantes restos de homínidos. Seguirá el rastro de una trama que llegará mucho más lejos de lo que nunca hubiera podido imaginar; que la guiará desde la oscuridad que habita en las entrañas de la Tierra, hasta la cegadora luz de la última tecnología científica. Un apasionante viaje a la sima de los tiempos donde se reencontrará, gracias a los misterios del ADN, con el corazón de la

Humanidad.

La Prehistoria en la península Ibérica Pilar López García, 2020-11-23 El presente volumen es el resultado de la colaboración interdisciplinar de un grupo de los más destacados especialistas en el estudio de la Prehistoria peninsular, que han combinado los más actuales conocimientos científicos sobre el tema para ofrecer una visión holística de un pasado que no siempre se interpreta exclusivamente a través de la cultura material. El resultado es una obra completamente distinta a las hasta el momento publicadas, que se aleja de una presentación meramente cronológica al permitir una lectura más temática, sin necesidad de tener que leer capítulo tras capítulo para la comprensión de un periodo tan amplio como el que nos ocupa. A lo largo de sus páginas se analizan aspectos como la evolución humana, el paisaje, la alimentación, el desarrollo de la agricultura y la ganadería, así como el arte, desde el Paleolítico hasta el Bronce Medio.
