La economía. Virtudes e inconvenientes: manual básico para no economistas ,2006

Fletes y Comercio Marítimo María Jesús Freire Seoane, Fernando González Laxe, 2007 Este libro explicita las nuevas bases del comercio marítimo, señalando con claridad los agentes que participan e intervienen en el negocio naval. El contenido refleja la situación actual de las pólizas de arrendamiento y fletamiento, de los contratos de utilización del buque y conocimientos de embarque, así como la eficiencia productiva y la naturaleza del tráfico de mercancías, para a continuación describir de manera clara el nuevo rol de los puertos, realizando un análisis económico de los fletes marítimos y sus repercusiones en el entorno empresarial. Concluye el volumen con una referencia al nuevo rol de los puertos que, año tras año, confirman una nueva realidad socioeconómica y territorial, sirviendo de pivote al desarrollo de las fachadas marítimas. Es un estudio de gran utilidad para los profesionales relacionados con el tráfico marítimo, y forma parte de las investigaciones desarrolladas por el grupo de trabajo del Instituto Universitario de Estudios Marítimos.

Lecciones de Economía Marítima Ricardo J. Sánchez, 2007 El transporte marítimo concentra alrededor del 90% del comercio exterior mundial y el desarrollo de éste requiere un cierto número de condiciones que un Estado debe satisfacer para mejorar y afrontar una eficaz política marítima. Esta demanda se puede resumir en varios aspectos, tales como las estrategias de las compañías marítimas; los desarrollos portuarios con sus respectivas infraestructuras y modelos de gestión; y las modalidades de inserción con otros modos de transporte, esto es la intermodalidad, interoperatividad y conectividad. El análisis de estos elementos, que son complementarios, constituye la base de una política marítima. Este volumen es fruto de la necesidad de actualizar y poner al día los últimos cambios y transformaciones llevados a cabo en las actividades marítimas. Responde a los interrogantes actuales y, sobre todo, marca los vectores por los que discurrirá tanto el debate académico como las estrategias empresariales. La procedencia de los autores es variada, son a la vez académicos y profesionales; pertenecen a distintas Universidades (Sevilla, Valencia, Oviedo, A Coruña, Miguel Hernández y Osnabrück) e Instituciones (CEPAL, Puertos del Estado, Fundación ValenciaPort e Instituto Universitario de Estudios Marítimos), lo que muestra una pluralidad de orígenes y de enfoques, pero en todos anida la reflexión teórica, la plasmación práctica de la misma y, finalmente, las recomendaciones de futuro.

Introducción a la República Centroafricana Gilad James, PhD, La República Centroafricana (RCA) es un país sin salida al mar en el corazón de África. Su población de alrededor de 5 millones de habitantes es una de las más pobres del mundo, a pesar de la presencia de valiosos recursos minerales como diamantes, oro y uranio. La República Centroafricana tiene una composición étnica diversa, con más de 80 grupos étnicos, cada uno con su propio idioma y tradiciones. Uno de los grupos étnicos más grandes del país son los bayaka, que tradicionalmente son cazadores-recolectores, mientras que los bantús son el grupo más grande en términos de población. La República Centroafricana ha experimentado una inestabilidad política significativa desde su independencia de Francia en 1960. El país ha estado plagado de golpes de estado, rebeliones y conflictos armados, que han afectado gravemente el desarrollo económico y social del país. Las dos crisis más recientes tuvieron lugar en 2013 y 2020, y la primera provocó un período de violencia sectaria y desplazamiento, y la segunda llevó al derrocamiento del presidente en ejercicio, Faustin-Archange Touadéra, por una coalición de grupos rebeldes. A pesar de los desafíos del país, se están realizando esfuerzos para estabilizar la situación política y abordar las necesidades humanitarias de la población.

La ingeniería en la evolución de la urbanística Manuel Herce Vallejo,2004-12-31 Con este volumen se inicia una colección de textos, coordinada por el Departamento de Infraestructuras del Transporte y Territorio de la UPC, cuyo objetivo es

aportar una visión de la construcción de la ciudad y del territorio desde la perspectiva de la construcción de sus redes de infraestructura, actividad primordial de la ingeniería civil, con efectos cada vez más contundentes. El libro se centra en el campo de la urbanística y pretende cubrir un vacío en la formación de los ingenieros, los cuales con frecuencia perciben las infraestructuras tan sólo desde sus aspectos funcionales, olvidando su enorme potencial como organizadoras del territorio y su papel esencial como soporte acumulativo del espacio urbano. De forma complementaria, la presente obra colabora a asentar unas bases epistemológicas comunes con otros profesionales, fundamentalmente arquitectos y geógrafos, retomando así una colaboración que ha sido fructífera en los momentos más relevantes de la evolución de la ciudad actual, tal como se subraya en el libro. La colección que mejor responde a este propósito es Arquitectext.

El Istmo mexicano Emilia Velázquez Hernández, 2009 Situé entre les océans Atlantique et Pacifique, l'Isthme mexicain présente un paradoxe : la région géopolitique constamment évoquée par les politiciens et les planificateurs, contraste avec la difficulté d'identifier une région unifiée et avec l'existence de plusieurs « isthmes ». Les études rassemblées ici ne considèrent pas l'Isthme mexicain comme un « fait » régional, établi et intangible, mais comme le théâtre de divers processus, parallèles, croisés, de construction et de recomposition territoriale, politique et culturelle. Ces études multidisciplinaires (anthropologiques, géographiques, historiques et agro-économiques) sont le résultat d'un projet de recherche interinstitutionnel appelé Proyecto Istmo, dont l'objectif principal était de connaître, à travers diverses perspectives et différentes époques historiques, les problématiques socioculturelles, politiques, territoriales et démographiques qui ont joué un rôle important dans la configuration de l'Isthme mexicain.

Estudios sobre cambio climático y transición energética Alenza García, José Francisco, Mellado Ruiz, Lorenzo, 2022-04-01

La Ley de Cambio Climático y Transición Energética es la primera ley estatal en nuestro país aprobada para afrontar el doble reto de la neutralidad climática y de la transformación integral del sistema energético. Se trata, sin duda, de dos objetivos ambiciosos, pero necesarios. El cambio climático es ya un riesgo existencial. Y la transición energética hacia la descarbonización y la penetración masiva de fuentes de energía renovable, una necesidad ineludible. La presente obra colectiva pretende dar una respuesta reflexiva y crítica a los contenidos y previsiones de la Ley 7/2021, de 20 de mayo. Pero no es una mera obra analítica. Los estudios incluidos en ella responden más bien a un patrón de estudio sistemático, analizándose los elementos fundamentales de la norma en su relación con los problemas y ámbitos clave hoy en día en el estudio del Derecho climático y energético. Se trata, así, de un conjunto ordenado de estudios que pretende ofrecer una visión completa de la actual respuesta jurídica frente a estos dos grandes retos. Ofrece, por tanto, un interés no solo académico, desde la rigurosidad y completitud de los temas tratados, sino también sociológico, económico y técnico. La aparición de esta importante Ley ha coincidido en el tiempo con la celebración del aniversario de los veinticinco años del acceso a la cátedra de Derecho Administrativo de la Universidad de Almería por el profesor Íñigo del Guayo Castiella. Por ello, un nutrido grupo de discípulos, amigos y compañeros del mismo nos hemos reunido en esta obra para rendirle un merecido homenaje a través del estudio de una de sus grandes líneas de investigación, el Derecho de la energía.
