International Entrepreneurship in Emerging Markets Vahid Jafari-Sadeghi, Leo-Paul Dana, 2022-09-02 International Entrepreneurship in Emerging Markets: Contexts, Behaviours, and Successful Entry aims to provide a comprehensive understanding of international entrepreneurship in emerging markets. This collection of prominent, context-based chapters focuses on entrepreneurial activities in SMEs and analyses a specific dimension of international entrepreneurship in countries belonging to emerging markets. In a constantly evolving international business context, economies can play a crucial role in the promotion and support of firms looking for expanding their market globally. As such, internationalisation, considered as among the most challenging strategies, can provide an opportunity for Small and Medium-Sized Enterprises (SMEs) to seek for performance and growth. In this vein, although international business literature has prominently focused on developed countries, the contribution of emerging markets (EMs) has become as increasingly important contenders on the global scene. Emerging markets are known as growing fast economies, in which they provide an opportunity for SMEs to operate. Therefore, entrepreneurial firms, SMEs in particular, can take advantage of the context unique characteristics of emerging markets to successfully operate and grow not only in domestic but also in international markets. This book is

essential reading for researchers, scholars, and practitioners seeking international entrepreneurial activities related to emerging markets.

Women Entrepreneurs and the Myth of 'Underperformance' Shumaila Yousafzai, Alain Fayolle, Adam Lindgreen, Colette Henry, Saadat Saeed, Shandana Sheikh, 2018-02-23 'A must read for all entrepreneurship scholars because it helps us to understand and appreciate the real and many roles of women entrepreneurs, their relevance and importance to societies across the World, as well as the challenges and issues women entrepreneurs can face. An exciting and interesting read which

presents us with critical questions for the future - thank you.' - Sarah Jack, Lancaster University Management School, UK

Taking a fresh look at how performance is defined by examining the institutional power structures and policies, eminent scholars herein explore ways to overcome constrained performance and encourage women's entrepreneurial activities through a variety of methodological approaches and geographical contexts. Significantly, this book adds a critical perspective to defining 'success' and 'performance', shattering misconceptions of underperformance in women-owned enterprises. The contributing authors raise questions on the limiting concept of the 'entrepreneur' and have valuable insights into policies to facilitate female entrepreneurs. Instead of taking a one-sided and narrow approach with regards to understanding the entrepreneurship performance phenomenon, this book argues that future researchers should take a fresh look at business performance, considering structural constraints, definitions of success and other socio-political factors. Scholars in the fields of entrepreneurship, gender studies, and institutional theory, as well as those who have a general interest in critical research, will benefit from this progressive step in entrepreneurship research. Ageing Asia and the Pacific in Changing Times Subas Dhakal, Alan Nankervis, John Burgess, 2022-01-31 This book demonstrates that there are wide-ranging potential challenges in addressing issues associated with ageing populations in both developed and developing countries of the region. This book brings together local, national and regional perspectives on the ageing population and sustainable development nexus in selected countries in the Asia Pacific region. The countries selected in this book include a mix of developed and developing economies that all reflect strong trade, investment and migration linkages. While the Asia Pacific region is forecast to enjoy high growth in the coming decade, a recurring common policy challenge is addressing the 'demographic time bomb' posed by ageing populations and workforces (Montague et al., 2017). Consequently, this book focuses on strategic policies and practices of multiple stakeholders, primarily: governments, industry and education systems, together with, the range of aged care services providers - in more effectively addressing these key socio-economic challenges associated with the ageing population for sustainable development.

Science and Technology Based Regional Entrepreneurship Sarfraz A. Mian, 2011 Providing a global survey of public policies and programs for building national and regional ecosystems of science and technology based entrepreneurial development, this book provides a unique analysis of the advances, over the last several decades and in light of the experiential knowledge gained in various parts of the world, in the understanding of innovation systems in the pursuit of developing these economies. Presenting nineteen case studies of diverse developed and emerging economy nations and their regions, more than thirty expert authors describe an array of policy and program mechanisms that have been implemented over the years. The in-depth analyses of the worldwide efforts featured in this volume provide the reader with several valuable lessons. There are clear indications of a trend toward better cohesion and coordination of national efforts to improve innovation but also a trend toward the broadening of regional agendas to address technology, talent, capital, innovation infrastructure and entrepreneurship culture issues - considered essential for knowledge based entrepreneurial growth. The book also offers a unique treatment of grassroots level programmatic aspects of these efforts, including some novel entrepreneurial mechanisms employed for policy implementation. The book's blend of theory and practice provides valuable insights to the reader, particularly government, academic and private sector policymakers and scholars researching or involved directly with efforts to build and support the development of science and technology based entrepreneurial regions.

OECD Studies on SMEs and Entrepreneurship The Digital Transformation of SMEs OECD, 2021-02-03 Despite potentially tremendous benefits, small and medium-sized enterprises (SMEs) lag in the digital transformation. Emerging technologies, as diverse as they are, offer a range of applications for them to improve performance and overcome the size-related limitations they face in doing business. However, SMEs must be better prepared, and stakes are high. SMEs make the most of the industrial fabric in many countries and regions, they create jobs (most jobs sometimes) and are the cement of inclusive and sustainable societies.

Entrepreneurship in the Creative Industries Phillip McIntyre, Janet Fulton, Susan Kerrigan, Michael Meany, 2023-03-03 This book provides a critical perspective on entrepreneurialism in the creative industries. Split into three sections, the book

first asks the contextual question; why, at this point in time, did we arrive at such a focus on entrepreneurship in the creative industries? Examining the historical, social, cultural, economic and political background, the book places the creative industries and entrepreneurship firmly within a systemic approach to creativity and cultural production. Given this emphasis on entrepreneurship in the creative system, the second part of the book asks, what do those who want to work in the creative industries need to do to pragmatically gain an income? The practices, skills, business models and plans necessary to master in order to successfully run a business are explored in this section. The final section contains detailed case studies that reveal the lives of those who found a way to successfully gain an income in the creative industries. It highlights the practical knowledge they gathered, how they negotiated their field of endeavour, and the decisions they made in the real world. Fundamentally the book answers three questions: How and why did we get here? Given that we are here at this point in time, how do we go about being entrepreneurial? And who has managed to do this in the creative industries and how did they do it? Covering both theoretical debates in detail, and practical case studies in key sub-sectors of creative industries, this truly integrative and far-reaching volume will be of interest to students, researchers and practitioners alike.

Entrepreneurship and Organised Crime Petter Gottschalk, 2009-01-01 Entrepreneurship and Organised Crime provides a much needed and original overview of the boundary between legal and illegal entrepreneurship. It will appeal to a wide variety of readers interested in new perspectives on entrepreneurship. The text is clearly structured and systematically explores the basics of organised crime as an entrepreneurial business enterprise. Petter Gottschalk draws upon several theoretical strands including organisational, sociological, managerial, historical, and practical perspectives in providing an insight into organised crime activity. Julia Davidson, Kingston University, UK Entrepreneurship and Organised Crime tarnishes the conventional clean and wholesome depiction of entrepreneurs by bringing to life the lived and messy realities of entrepreneurs who operate illegal businesses. Moving beyond the standard textbook positive and celebratory portrayal of entrepreneurs, this volume addresses in a highly readable manner both the entrepreneurial aspects of criminal endeavour as well as the criminal aspects of entrepreneurial endeavour. It is an essential and compelling read for scholars of entrepreneurship and criminology. Colin C. Williams, University of Sheffield, UK Entrepreneurship and Organised Crime provides a fresh and realistic insight into the problem of organised crime activity and the role of entrepreneurs in illegal business. Petter Gottschalk takes a close look at how some entrepreneurs choose to develop criminal business enterprises. Stage models for criminal entrepreneurs are presented, and entrepreneurial leadership and management are discussed. This book illustrates how so many issues for entrepreneurs and entrepreneurship are similar in legal and illegal business. At the same time, all the cases in the book show how different many of the individual criminal entrepreneurs are. In sum, this book provides a pragmatic view of another kind of entrepreneurship not frequently discussed in a neutral way. This book will be warmly welcomed by scholars and researchers looking for a different perspective of entrepreneurship or interested in

criminology. This will also be a good reference tool for students at police academies.
