The Spanish Habsburgs and Dynastic Rule, 1500-1700 Elisabeth Geevers, 2023-06-19 Providing a novel research methodology for students and scholars with an interest in dynasties, at all levels, this book explores the Spanish Habsburg dynasty that ruled the Spanish monarchy between c. 1515 and 1700. Instead of focusing on the reigns of successive kings, the book focuses on the Habsburgs as a family group that was constructed in various ways: as a community of heirs, a genealogical narrative, a community of the dead and a ruling family group. These constructions reflect the fact that dynasties do not only exist in the present, as kings, queens or governors, but also in the past, in genealogies, and in the future, as a group of hypothetical heirs. This book analyses how dynasties were ‘made’ by the people belonging to them. It uses a social institutionalist framework to analyse how family dynamics gave rise to practices and roles. The kings of Spain only had

limited power to control the construction of their dynasty, since births and deaths, processes of dynastic centralisation, pressure from subjects, relatives' individual agency, rivalry among relatives and the institutionalisation of roles limited their power. Including several genealogical tables to support students new to the Spanish Habsburgs, this book is essential reading for all students of early modern Europe and the history of monarchy. *The Habsburg Monarchy, 1490-1848* Paula Sutter Fichtner, 2017-03-07 The Habsburg monarchy was a singular experiment in diversity within the European continent. By the eighteenth century it stretched from the Austrian Netherlands to the Balkans and southern Poland, and south into Italy. Its subjects spoke a number of languages, and while the social and institutional structure of these lands shared common features, there were also substantial differences among them. Was the Habsburg monarchy therefore an empire like those of Great Britain, France or Spain? Drawing upon modern theoretical perspectives on European expansion to answer this question, Paula Sutter Fichtner argues that the Habsburg holdings did indeed constitute a form of European imperialism, and that they are best understood in such terms. The Habsburg Monarchy, 1490-1848 - Examines the role of the interaction between Habsburg rulers, territorial estates, and religious institutions in the expansion of the empire - Explores the reorientation of these relationships under the impact of the European Enlightenment, the rationalization of dynastic government under Empress Maria Theresa and her son, Joseph II, the beginning of the Industrial Revolution, and the rise of nationalism - Assesses the effect of the Revolutions of 1848 on the strength of the connections between the crown and its nobles, as well as its ties to its ecclesiastical elites and the bourgeoisie - Discusses the parallel developments in cultural affairs as the coherence of a world outlook dominated by Catholicism gave way to linguistic and cultural particularism Incorporating the latest research, this broad-ranging study is an essential guide to one of Europe's most powerful and important dynasties.

**Supplanting Empires** Kendall Stiles, 2024-12-15 What happens when one empire or hegemon cedes the global stage to a rising power? *Supplanting Empires: Power Transitions Across Human History* argues that, historically, such power

transitions tend to be relatively smooth, resulting in the preservation of the status quo with respect to the global order and institutions. This stems from the tendency of rising powers to be closely associated with declining powers, to the point that they generally support and perpetuate the old ways of governing. They maintain similar governing institutions, retain ties to the former empire's allies, and generally endorse the declining empire's ideology and norms. The violence involved in such transitions tends to be limited, and societies and economies are typically left undisturbed. To test this proposition, Kendall Stiles and his students undertake a systematic study of numerous power transitions across millennia of human history. The implications of these findings have considerable relevance with respect to the contemporary power struggle between the United States and China.

**Perfecting Parliament** Roger D. Congleton, 2010-11-01 This book explains why contemporary liberal democracies are based on historical templates rather than revolutionary reforms; why the transition in Europe occurred during a relatively short period in the nineteenth century; why politically and economically powerful men and women voluntarily supported such reforms; how interests, ideas, and pre-existing institutions affected the reforms adopted; and why the countries that liberalized their political systems also produced the Industrial Revolution. The analysis is organized in three parts. The first part develops new rational choice models of (1) governance, (2) the balance of authority between parliaments and kings, (3) constitutional exchange, and (4) suffrage reform. The second part provides historical overviews and detailed constitutional histories of six important countries. The third part provides additional evidence in support of the theory, summarizes the results, contrasts the approach taken in this book with that of other scholars, and discusses methodological issues.

**Biology of Sex** Alex Mills, 2018-01-01 This text explains the biological aspects of human sex by using direct and intriguing comparisons with the many variations in sexual systems among non-human organisms.

**Emperor** Geoffrey Parker, 2019-06-25 Drawing on vital new evidence, a top historian dramatically reinterprets the life and reign of Holy Roman Emperor Charles V, ruler of the world's first transatlantic empire Masterly.--William Anthony Hay, Wall Street Journal Seldom does one find a work of such profound scholarship delivered in such elegant and engaging prose. Drawing deftly on an astonishing volume of documentary evidence, Parker has produced a masterpiece: an epic, detailed and vivid life of this complex man and his impossibly large empire.--Susannah Lipscomb, Financial Times Selected as a book of the year (2020) by Simon Sebag Montefiore in Aspects of History magazine The life of Emperor Charles V (1500-1558), ruler of Spain, Germany, the Netherlands, and much of Italy and Central and South America, has long intrigued biographers. But the elusive nature of the man (despite an abundance of documentation), his relentless travel and the control of his own image, together with the complexity of governing the world's first transatlantic empire, complicate the task. Geoffrey Parker, one of the world's leading historians of early modern Europe, has examined the surviving written sources in Dutch, French, German, Italian, Latin, and Spanish, as well as visual and material evidence. He explores the crucial decisions that created

and preserved this vast empire, analyzes Charles's achievements within the context of both personal and structural factors, and scrutinizes the intimate details of the ruler's life for clues to his character and inclinations. The result is a unique biography that interrogates every dimension of Charles's reign and views the world through the emperor's own eyes.
