

The Law In Its Majestic Equality

KJ Lindholm-Leary

From Social Justice to Criminal Justice William C. Heffernan, John Kleinig, 2000-04-20 The economically deprived come into contact with the criminal court system in disproportionate number. This collection of original, interactive essays, written from a variety of ideological perspectives, explores some of the more troubling questions and ethical dilemmas inherent in this situation. The contributors, including well-known legal and political philosophers Philip Pettit, George Fletcher, and Jeremy Waldron, examine issues such as heightened vulnerability, indigent representation, and rotten social background defenses.

The Harvard Illustrated Magazine ,1910

Understanding Political Ideas and Movements Kevin Harrison, Tony Boyd, 2003-12-05 Underpinned by the work of major thinkers such as Marx, Locke, Weber, Hobbes and Foucault, the first half of the book looks at political concepts including: the state and sovereignty; the nation; democracy; representation and legitimacy; freedom; equality and rights; obligation; and citizenship. There is also a specific chapter which addresses the role of ideology in the shaping of politics and society. The second half of the book addresses traditional theoretical subjects such as socialism, Marxism and nationalism, before moving on to more contemporary movements such as environmentalism, ecologism and feminism.

Public Law Andrew Le Sueur, Maurice Sunkin, Jo Eric Murkens, 2016 Public Law Text, Cases, and Materials explores how the law works in practice. The key institutions, legal principles, and conventions that underpin the public law of the UK are brought to life through the inclusion of extracts from key sources, which are explained and critiqued by the authors.

The Future of Liberal Education Timothy Burns, Peter Lawler, 2016-04-14 Liberal Education, once the whole of American Higher Education, has been displaced by technical training and career-oriented majors. But it has also suffered from the decline in genuine liberal learning found in humanities disciplines, owing to specialization, politicization, and the adoption of new literary and psychological theories. The social sciences, too, have arguably abandoned the kind of relentless and sometimes disturbing questioning that used to constitute the core of education. In this compelling volume, thirteen college educators describe in sparkling prose what liberal education is, its place in a liberal democracy, the very serious challenges it faces in the 21st century—even from some of its alleged friends—and why it is important to sustain and expand liberal education's place in American colleges and universities. Proponents and critics of liberal education alike will benefit

from these insightful essays. This book was originally published as a special issue of Perspectives on Political Science.

Citizenship and Migration Stephen Castles, Alastair Davidson, 2020-06-30 This book argues that basing citizenship on singular and individual membership in a nation-state is no longer adequate, since the nation-state model itself is being severely eroded. It examines issues of citizenship and difference in the Asia-Pacific region.

Abortion Ian Shapiro, 2001-01-01 Includes the US Supreme Court cases on abortion. This book presents court cases in edited form for use in the undergraduate and graduate classroom in a variety of disciplines. It provides an introduction to elucidate the complexities of this controversial issue.

Craft and Consciousness Joseph Bensman, Robert Lilienfeld, Long out of print and difficult to come by, Bensman and Lilienfeld's treatise has achieved the status of an underground masterwork of sociological thought. An extended and carefully nuanced essay on the sociology of knowledge, its central argument was well defined by the authors in the first edition of 1973: It is our contention that major 'habits of mind,' approaches to the world, or in phenomenological terms, attitudes towards everyday life, and specialized attitudes, are extensions of habits of thought that emerge and are developed in the practice of an occupation, profession, or craft. We emphasize craft since we focus upon the methods of work, techniques, methodologies, and the social arrangements which emerge in the practice of a profession as being decisive in the formation of world views! That argument is advanced against the Marxist tradition that would relate the forms and content of knowledge to the position of the knower in the social, economic, and class structure of society. It avails itself of the theories and perceptions of Veblen, Mannheim, Weber, Husserl, and Alfred Schutz.

Borderline Stan Goff, 2015-02-11 What if the sanctification of war and contempt for women are both grounded in a fear that breeds hostility, and a hostility that rationalizes conquest? The anti-Gospel Christian history of war-loving and women-hating are not merely similar but two aspects of the same dynamic, argues Stan Goff, in an autobiography that spans millennia. Borderline is the historical and conceptual autobiography of a former career army veteran transformed by Jesus into a passionate advocate for nonviolence, written by a man who narrates his conversion to Christianity through feminism.

Social Inequality , 2024-06-26 This edited volume Social Inequality - Structure and Social Processes is a collection of reviewed and relevant research chapters offering a comprehensive overview of recent developments in the field of social sciences and humanities. The book comprises single chapters authored by various researchers and edited by an expert active in the social sciences and humanities research area. All chapters are complete in themselves but united under a common research study topic. This publication aims at providing a thorough overview of the latest research efforts by international authors on social sciences and humanities, and to open new research paths for further developments.

Records and Briefs of the United States Supreme Court , 1832

The Dark Side of the Left Richard J. Ellis, 1998 Political correctness, idealizing the oppressed, and an affinity for

authoritarian and charismatic leaders are all parts of what Ellis calls the dark side of the left.

The Transformation of Citizenship, Volume 2 Jürgen Mackert, Bryan S. Turner, 2017-03-16 This volume *Boundaries of Inclusion and Exclusion* examines the many different and newly emerging ways in which citizenship refers to spatial, symbolic and social boundaries. Today, in the context of citizenship we face processes of inclusion and exclusion on national and supranational level but no less on the level of groups and individuals. The book addresses these different levels and discusses processes of inclusion and exclusion with regard to spatial, social and symbolic boundaries referring to such different problems as political participation, migration, or identity with regard to religion or the EU. This book will appeal to academics working in the field of political theory, political sociology and European studies.

Constructive Anarchy Jeff Shantz, 2016-05-23 *Constructive Anarchy*, the result of more than a decade of direct study within a variety of anarchist projects, provides the most wide-ranging and detailed analysis of current anarchist endeavours. The compelling discussions of anarchism and union organising, anti-poverty work and immigrant and refugee defence represent truly groundbreaking undertakings from a rising scholar of contemporary anarchism. Organised to illustrate the development of the diversity of anarchist strategies and tactics over time, the book begins with a discussion of alternative media projects before turning attention to anarchist involvement in broader community-based movements. Case studies include a discussion of anarchists and rank-and-file workplace organising, anarchist anti-borders struggles and No One Is Illegal movements in defence of immigrants and refugees since 9/11, and anarchist free schools and community centres. Jeff Shantz's analysis demonstrates serious and grounded practices rooted in anarchist organising: practices that may draw on previous traditions and practices but also innovate and experiment. The varied selection of case studies allows the author to compare groups that are geared primarily towards anarchist and radical subcultures with anarchist involvement in more diverse community-based coalitions, an approach that is otherwise lacking in the literature on contemporary anarchism.

Democracy and Revolution Vladimir I. Lenin, 2001

The Columbia Dictionary of Quotations Robert Andrews, 1993 Over 11,000 of these 18,000 quotations have never before appeared in a quotation book. Chosen not for their familiarity but for their quality and their relevance in the 1990s, these provocative quotations cover subjects from adolescence and adoption to yuppies and zoos.

(Dis)Entitling the Poor Elizabeth Bussiere, 2010-11-01 Although focused on the Warren Court, the book explores Western political thought from the seventeenth through late twentieth centuries, draws on American social history from the Age of Jackson through the civil rights era of the 1960s, and utilizes current analytic methods, particularly the new institutionalism.

Columbia Law Review, 1922

Law and Society Matthew Lippman, 2020-08-07 *Law and Society*, Third Edition, offers a contemporary overview of the

structure and function of legal institutions, along with a lively discussion of both criminal and civil law and their impact on society. Unlike other books on law and society, Matthew Lippman takes an interdisciplinary approach that highlights the relevance of the law throughout our society. Distinctive coverage of diversity, inequality, civil liberties, and globalism is intertwined through an organized theme in a strong narrative. The highly anticipated Third Edition of this practical and invigorating text introduces students to both the influence of law on society and the influence of society on the law.

Discussions of the pressing issues facing today's society include key topics such as the law and inequality, international human rights, privacy and surveillance, and law and social control. ?KEY FEATURES: An interdisciplinary approach integrates various intellectual perspectives and traditions to provide extensive coverage of the legal profession, juries, criminal courts, and racial and ethnic inequality. Gender is covered throughout the text with particular attention devoted to abortion, human trafficking, global exploitation, sexual abuse, and the role of women in the justice system. A distinction between legal myth and reality is analyzed throughout the text using contemporary media examples. International Perspective sections offer relevant cross-cultural and international studies to provide a unique global viewpoint. Test Your Knowledge questions open chapters to show students what they may and may not know prior to reading the chapters. You Decide cases are presented throughout the book to sharpen critical thinking skills by applying the chapter contents to contemporary issues--

Social Rights and Human Welfare Hartley Dean, 2015-02-20 An essential introduction to rights-based approaches in social policy, this text critically explores how social rights underpin human wellbeing. It discusses social rights as rights of citizenship in developed welfare states and as an essential component within the international human rights and human development agenda. It provides a valuable introduction for students and researchers in social policy and related applied social science, public policy, sociology, socio-legal studies and social development fields. Taking an international perspective, the first part of the book considers how social rights can be understood and critiqued in theory – discussing ideas around citizenship, human needs and human rights, collective responsibility and ethical imperatives. The second part of the book looks at social rights in practice, providing a comparative examination of their development globally, before looking more specifically at rights to livelihood, human services and housing as well as ways in which these rights can be implemented and enforced. The final section re-evaluates prevailing debates about rights-based approaches to poverty alleviation and outlines possible future directions. The book provides a comprehensive overview of social rights in theory and practice. It questions recent developments in social policy. It challenges certain dominant ideas concerning the basis of human rights. It seeks to re-frame our understanding of social rights as the articulation of human needs and presents a radical new 'post-Marshallian' theory of human rights.
