Giovanni Klaus Koenig Maria Cristina Tonelli,2020-12-21 Giovanni Klaus Koenig (1924-1989) è stato architetto, designer di mezzi di trasporto su rotaia, docente universitario, appassionato studioso di treni e di tram, critico dell'architettura contemporanea, storico dell'industrial design, intellettuale impegnato nella soluzione dei problemi della sua città, Firenze. Il tutto in anni nei quali l'attenzione critico-operativa sull'attuale era inusuale, la disciplina del design da fondare, la pratica progettuale in seno alle aziende di materiale rotabile da parte di un architetto insolita. Il testo si propone di ricostruirne la figura a specchio con il contesto cittadino e con quello nazionale sia con l'apporto di quanti l'hanno avuto come interlocutore sia con il contributo di studiosi che hanno approfondito alcuni temi della sua ricerca. L'obiettivo non si limita alla mera ricomposizione di una figura culturalmente incisiva, ma si propone di indicare allo studioso di oggi ambiti da approfondire, le 'scie fosforescenti' che ci ha lasciato in eredità.

Giacomo e me Roberta Petrignani, 2014-07-24 Esiste la vita dopo la morte? Io ne sono certa. Sono una sensitiva e da molti anni vengo contattata dalle anime dei defunti allo scopo di sostenere moralmente persone a loro vicine semplicemente “traducendo” le loro emanazioni che mi giungono sotto varie forme e mi guidano in questa coinvolgente ed eterea comunicazione. In questo piccolo volume ho cercato di descrivere le grandi e travolgenti emozioni provate durante una straordinaria esperienza vissuta nel 2009 quando, Giacomo, un bimbo trapassato di soli tre anni, mi scelse volendo confortare sua madre profondamente addolorata per la sua prematura perdita. Oltre a qualche pagina autobiografica per far comprendere a chi legge come ho sviluppato negli anni la mia sensitività, il racconto passa da episodi sorprendenti, che non possono essere ridotti a banali coincidenze ad altri in cui è difficile non commuoversi per la tenerezza ed i modi con cui l'anima di Giacomo comunica esprimendo tutta la sua natura infantile. Se il lettore riuscirà ad abbassare le naturali difese razionanti che l'uomo riserva a certi argomenti considerati tabù, potrà scorgere dietro questa storia vera, un grande progetto divino, un abbraccio caloroso che accende la fiamma del cuore e spegne l'ansia della solitudine che ognuno di noi prova quando incontra la morte. La divulgazione di questo racconto ha scopo di donazione e non di lucro .

Il Manifesto dell'architettura futurista di Sant'Elia e la sua eredità Ezio Godoli, Alessandra Pelosi, 2014-12-01 Se il centenario della nascita di Sant'Elia ha offerto “l'occasione per valutare la sua opera, e soprattutto, per distinguerla dalla poetica futurista” (Bruno Zevi), quello del manifesto Architettura futurista (1914) induce a una riflessione e a un approfondimento sui rapporti tra le idee di architettura e di città dell'architetto comasco e degli altri futuristi (Voll, Marchi, Prampolini, Sartoris, Fiorini, Mazzoni) e sulle reazioni prodotte dal suo manifesto nelle riviste e nei movimenti d'avanguardia del periodo tra le due guerre mondiali. Delineando un bilancio della fortuna critica di Sant'Elia fuori d'Italia e delle suggestioni esercitate dalle sue visioni metropolitane sugli architetti e sui movimenti di avanguardia che hanno operato nella seconda metà del secolo scorso (da Metabolism ad Archigram), questo volume intende replicare al “saggio magistrale e spietato” di Carlo Ludovico Ragghianti, in larga parte condiviso da Zevi, nel quale è sostenuta la tesi che l'architetto comasco non possa “essere considerato ‘precursore’: niente si può dedurre, dai suoi disegni, di vitale o di utile per l'esperienza architettonica e urbanistica ulteriore” (1963).

Architettura disegno modello Aa.Vv., 2011-09-30 T00:00:00+02:00 Il volume raccoglie le considerazioni e le ricerche che hanno fatto da riferimento teorico-operativo a esperienze indirizzate prevalentemente al rinnovamento della didattica della rappresentazione dell'architettura. È ormai un dato da tempo accertato che il digitale ha quasi del tutto soppiantato le tradizionali pratiche del disegno nel processo di elaborazione del progetto di architettura. Ma non è altrettanto definito il suo ruolo nella didattica della rappresentazione, non solo per lo studio dei modelli geometrici, ma anche per l'analisi dei modelli architettonici così come si possono costruire sulla base dello studio degli elaborati di progetto. Le sperimentazioni didattiche

condotte negli ultimi anni su casi di studio emblematici hanno permesso di mettere a punto una strategia coerente con l'intenzione di rivedere, alla luce delle continue innovazioni indotte dal digitale, gli statuti disciplinari del rapporto disegno/progetto. Per l'approfondimento del rapporto oggi sempre più stretto della rappresentazione con la pratica del progetto è stato determinante esaminare, a scopo esemplificativo, l'operatività progettuale di alcuni fra i principali interpreti del rinnovamento del linguaggio architettonico in Italia a cavallo degli anni Sessanta e Settanta del Novecento.

La Facoltà di architettura di Firenze fra tradizione e cambiamento Gabriele Corsani, Marco Bini, 2007 The volume comprises the proceedings of the study days in the Faculty of Architecture (29-30 April 2004) broken down into four thematic sections: The original characteristics of the Florentine school, From Higher School to Faculty, the Florentine school and the contributions from outside, Contemporary metamorphoses. The contributions focus the phases of formation and evolution of the Higher School (1926) and later Faculty (1936) of Architecture, underlining the most significant passages, starting from the initial consolidation of the didactic structure and the emergence of a Florentine school characterised by the two strands traceable to Raffaello Fanoni and Giovanni Michelucci. A parallel experience is provided by the contribution of the external teachers, in particular of the Roman school, with lively and at times conflicting approaches. The present situation, albeit with the necessary disciplinary dialectic, features a settlement of the divergences around themes of the relations between architecture, environment and landscape.
