

Aloo Argentina Call Center Crdoba

C. A. Clark,J. W. Moyer

World Potato Congress Scientific Committee,2000-09-01 In September 2000 the fourth World Potato Congress (WPC) took place in The Netherlands, one of the world's smaller countries although certainly not small in potatoes. The aim of the Congress was not only to provide information on a wide variety of potato-related issues, but more ultimately to bridge the gap between science and practice (cultivation, industry, research and trade). Contributors from all parts of the world give their view on the different aspects of the complete potato chain, from pre-basic material up to potato processing. The proceedings include a WEB-enabled CD ROM. This CD ROM gives the opportunity to download the latest information of the World Potato Congress from the Internet and to visit relevant research institutes and companies.

Nature(s) in Construction María Lelia Pochettino,Aylen Capparelli,Pablo C. Stampella,Diego Andreoni,2024-09-14 This book provides the state of the art of ethnobiology in Argentina and related Latin American countries, highlighting timely trends and topics. It synthesizes studies resulting from the III Jornadas Argentinas de Etnobiología y Sociedad (III JAES—3rd Argentinian Meeting of Ethnobiology and Society), convened in La Plata in 2021. As a relatively new academic development, ethnobiology integrates approaches from different points of view, such as biology, anthropology, geography, history, linguistics, and, in a crucial recent advance, local perspectives. Consequently, this volume contains 33 contributions from 86 authors of different countries, orientations, and disciplines—but all related to interrelationships between people/s and the natural environment. Chapters cover a diverse array of topics, ranging from biocultural relationships and their historical construction through time to conservation of biocultural and agrobiodiversity, ethnomycology, ethnophycology, and meliponiculture and beyond. The volume's main goal is to propitiate the preservation of biocultural diversity through the application of ethnobiological wisdom in a global context characterized by the accelerated loss of traditional knowledge. The contributions aim to transcend the nature/culture dichotomy, emphasizing the inextricable relationship between communities and their environment and the importance of acting jointly in the construction of the inhabited landscape and local identity.

The Quinoa Genome Sandra M. Schmöckel,2021-02-04 This book focuses on quinoa, providing background information on its history, summarizing recent genetic and genomic advances, and offering directions for future research. Meeting the caloric and nutritional demands of our growing population will not only require increases in overall food production, but also the development of new crops that can be grown sustainably in agricultural environments that are increasingly susceptible to degradation. Quinoa is an ancient crop native to the Andean region of South America that has recently gained international attention because its seeds are high in protein, particularly in essential amino acids. Quinoa is also highly tolerant of abiotic stresses, including drought, frost and salinity. For these reasons, quinoa has the potential to help address issues of food security – a potential that was recognized when the United Nations declared 2013 the International Year of Quinoa. However, more effort is needed to improve quinoa agronomically and to understand the mechanisms of its abiotic stress tolerance; the recent development of genetic and genomic tools, including a reference genome sequence, will now help accelerate research in these areas.
