Claves psicobiológicas, diagnósticas y de intervención en el autismo Julia Folch-Schulz,Jaime Iglesias Dorado,2018-01-18

El autismo comprende un espectro de trastornos del neurodesarrollo que trastocan de forma significativa los patrones de conectividad neural en el cerebro social. En función de la etiología del autismo, se producen alteraciones en procesos específicos del neurodesarrollo que a su vez se reflejan en alteraciones en las habilidades básicas de comunicación socioemocional que determinan el desarrollo cognitivo. De acuerdo con este planteamiento, en la parte primera del libro se exponen las bases psicobiológicas de los trastornos del espectro autista integrando las teorías explicativas propuestas, los factores epigenéticos, los procesos de neurodesarrollo críticos y las alteraciones en el desarrollo socioemocional características del autismo. La parte segunda se centra en el diagnóstico clínico y en la evaluación psicológica dimensional del autismo, abordando el diagnóstico diferencial temprano y los cambios que experimentan las personas con autismo a lo largo del ciclo vital, ya que en un contexto multiprofesional la evaluación psicológica de la conducta socioafectiva es crucial para diagnosticar el autismo en las primeras etapas de la vida. En la parte tercera se exponen los tratamientos y los diferentes programas de intervención con personas autistas. Tras comparar los tratamientos psicoeducativos destacando los basados en el análisis funcional de la conducta, se presentan los programas aplicados en los distintos niveles educativos y se subrayan las iniciativas de intervención orientadas a promover las habilidades socioemocionales de las personas con autismo. La expresión y el reconocimiento de emociones y las interacciones socioafectivas en el autismo son un foco de atención preferente, pues las habilidades de interacción con padres, educadores e iguales son susceptibles de entrenamiento. La educación integral en el preescolar ,2003

Educación motriz y educación psicomotriz en Preescolar y Primaria Robert Rigal,2006 Esta obra trata sobre la manera de entender el desarrollo y evolucion de la motricidad humana y, mas concretamente, en la etapa Infantil y Primaria. En el campo de la motricidad humana, se emplean habitualmente diferentes terminos para definir cada uno de los ambitos de

estudio. Los ámbitos del desarrollo motor y del desarrollo psicomotor se utilizan como sinónimos con frecuencia. Sin embargo, no son intercambiables y afectan a aspectos muy distintos del desarrollo evolutivo del niño y la niña. La educación motriz, que forma parte de la Educación Física en Primaria, pretende mejorar la coordinación motriz, ya se trate de motricidad global mediante actividades no locomotoras y locomotoras o de motricidad fina mediante actividades manipulativas. La educación psicomotriz, por su parte, pretende que se adquieran conceptos a través de las actividades de manipulación y de las acciones motoras; por esta razón interviene como condición previa o como apoyo a los primeros aprendizajes. La primera parte del libro nos muestra los elementos básicos de la educación psicomotriz y se define en ella el marco conceptual en el que ha de incluirse la educación a través de las acciones motoras. En la segunda parte, se describe el desarrollo motor del niño (motricidad global y motricidad fina), que subtiende a la formación del esquema corporal, y las características de la torpeza; también se explica la adquisición de la lateralidad. En la tercera parte, se aborda el aprendizaje de la escritura, la lectura, las matemáticas, las ciencias y la organización espacial y temporal. En cada uno de estos apartados, se presentan primeramente los principios teóricos más importantes de cada aprendizaje y luego se analizan las interacciones entre la acción motriz o los elementos del desarrollo psicomotor y este aprendizaje. En la parte final, dedicada a la didáctica, se presentan los principios de la organización de sesiones de educación motriz o de educación psicomotriz y de la evaluación de

Figuras centrales, procesos y contextos en la investigación educativa de la licenciatura en educación preescolar, 2025-04-04 La publicación de esta obra tiene el propósito de visibilizar el trabajo de investigación educativa que se hace en la Escuela Normal de Educación Preescolar “Rosario María Gutiérrez Eskildsen”. Este libro reúne una muestra representativa de trabajos de titulación de las tres modalidades que se ofrecen en las Escuelas Normales del país: Informe de prácticas, Tesis de investigación y Portafolio de evidencias. Si bien el propósito primigenio de la Escuela Normal es formar maestros para la enseñanza, esta institución tendrá que renovarse desde su interior a fin de continuar formando a las nuevas generaciones de maestros para la enseñanza, de acuerdo a las demandas actuales que surgen día con día en todos los ámbitos de la vida postmoderna. La investigación educativa es una de las alternativas que los formadores de docentes tienen para enfrentarse a los desafíos de la formación y a los cambios vertiginosos que el mundo vive hoy en día. Evaluación psicopedagógica de 0 a 6 años Vera Barros de Oliveira, Nádia Aparecida Bossa, 2001-07-15 Evaluar a niños y niñas de 0 a 6 años, mediante la observación, el análisis y la interpretación de su comportamiento supone un reto para los encargados de hacerlo. En este libro, se estudia al niño desde el punto de vista psicopedagógico considerando el juego y el dibujo como un valioso instrumento para la comprensión por los adultos: padres, profesores o demás interesados en el desarrollo infantil de los pequeños de esas edades.
