Bresnan, 2021-12-27 Awakening: An Introduction to the History of Eastern Thought provides the reader with a thorough and valuable overview of the historical development of the major Eastern religious and philosophical traditions, primarily in India, China, and Japan. The book is written in an engaging style that contains a variety of anecdotes, analogies, definitions, and supporting quotes from primary and secondary sources. Awakening helps the reader to recognize the interrelationships that exist among the various traditions, to appreciate the relevance of these traditions to the concerns of modern times, and to understand the major issues of interpretation regarding these traditions. Understanding Eastern Philosophy Ray Billington, 2002-01-04 *Understanding Eastern Philosophy* provides an accessible critical introduction to how some of the key philosophies of the East compare with those in the West. Starting from a discussion of the problems of distinguishing between religions and philosophies, Ray Billington presents a clear picture of the key tenets behind Hinduism, Buddhism, Taoism, Jainism and Confucianism. Moving on to compare the key themes of religious philosophy that cut across East and West, such as a belief in God, the soul, moral decision-making, nature and authority, *Understanding Eastern Philosophy* presents a fascinating and controversial picture of the contribution theistic religions have to make. With its belief in a personal God bestowing a particular version of 'truth', Ray Billington concludes that the universal mysticism characteristic of Eastern thought provides a more realistic and rewarding path than is commonly supposed in the West. *Understanding Eastern Philosophy* assumes no prior knowledge of religion or philosophy.

To understand how changes in society occurred, and will continue to change, one has to have a basic understanding of the laws of physics and chemistry. *Physical Chemistry: Multidisciplinary Applications in Society* examines how the laws of physics and chemistry (physical chemistry) explain the dynamic nature of the Universe and events on Earth, and how these events affect the evolution of society (multidisciplinary applications). The ordering of the chapters reflects the

ending with Zurvan. The main philosophical trends and thinkers in each geographical area are featured, with an emphasis on endtemporany developments and movements. The A-Z structured encyclopedia emphasizes that Asian philosophy is not merely an ancient form of thought but that it is a living philosophy, with roots in the past, and also a potent and animate presence today.
