Lento crecimiento y caída del bienestar en la economía de Baja California Juan Manuel Ocegueda Hernández, Alejandro Mungaray Lagarda, Rogelio Varela Llamas, Ramón Amadeo Castillo Ponce, Antonio de Jesús Rosas Valenzuela, Natanael Ramírez Angulo, Rolando Daniels Pinto, Paulo Alfonso Carrillo Regino, Pedro Antonio Ramonetti Vega, Rosalba Fabiola Rodríguez Cerón, Sylvia Mónica Pérez Núñez, Ana Bárbara Mungaray Moctezuma, Belem Dolores Avendaño Ruiz, Gilberto Martínez Sidón, Ana Isabel Acosta Martínez, Mayra Yesenia Nava Rubio, Roberto Iván Fuentes Contreras, Martín Ramírez Urquidy, Germán Osorio Novela, Emilio Hernández Gómez, 2019-08-23 La profunda crisis de 2008 cambió por completo la relación entre sectores poblacionales y empresariales, compañías nacionales y extranjeras -grandes y pequeñas-, y entre empresarialidad y trabajo asalariado. Con la homologación del IVA y del salario, Baja California dejó de ser tratada diferente -a pesar de su vecindad fronteriza con California-, lo que trajo como consecuencia una falta de crecimiento en la entidad, desmotivó la llegada de inversiones externas y provocó que el estado cayera al lugar 25 en competitividad a nivel nacional. El crecimiento del comercio informal ha dado lugar a un panorama de desigualdad, con un ingreso per cápita 10% inferior al presentado en 2008. De esta forma, para el año 2016 se tiene que 30% de los bajacalifornianos con mayores ingresos

concentró tan sólo 10%. Más aún, el 10% más rico y el 10% más pobre concentran, respectivamente, 32% y 2.2% de la riqueza. Aunado a ello, la economía informal ya concentra a alrededor de 40% de la población ocupada, debido a que el privilegiado sector moderno de exportación ha dejado de generar empleos decentes. En este sentido, la reciente política pública ha asumido la responsabilidad de crear un nuevo escenario para recuperar la economía de bienestar en Baja California, donde el derecho del trabajo decente para proveerse de bienestar a través de sus remuneraciones sea tan apreciado como el del capital para obtener ganancias razonables que premien su inversión, y el de los emprendedores de cualquier nivel económico y social para allegarse por sí mismos de ingresos. Un aumento salarial, la disminución del IVA e ISR, y la homologación de precios de energéticos apuntan en esa dirección.

La priorización en salud paso a paso Catalina Gutiérrez Sourdis, Mariana Barraza Lloréns, Eduardo González Pier, Ursula Giedion, Denizar Vianna Araujo, Marcella Distrutti, Flavia Tavares Silva Elias, Ana Lucía Muñoz, Oscar Cañón, 2018-04-30 Esta monografía utiliza un enfoque sistémico para abordar la priorización explícita en salud, lo que facilita la comprensión de los procesos que la integran, los actores que involucra y su relación con las diferentes políticas públicas que deben ser articuladas e implementadas de una manera armónica. El documento ofrece, en primer lugar, un marco conceptual y seguidamente presenta las instituciones y los actores de cada proceso relacionado con la priorización, sus funciones y responsabilidades y los criterios y reglas que rigen cada paso en tres países de Latinoamérica: Brasil, Colombia y México. A continuación se evalúan y comparan los sistemas de priorización de estos tres países según criterios de coherencia, eficacia y eficiencia, solidez técnica, transparencia y legitimidad. Finalmente, se ofrece una serie de recomendaciones que pueden ser de utilidad para aquellos países que todavía no hayan iniciado sus procesos de priorización en salud o que estén en proceso de construirlos o mejorarlos.

Food Product Optimization for Quality and Safety Control Juan Carlos Contreras-Esquivel, Laxmikant S. Badwaik, Porteen Kannan, A. K. Haghi, 2020-11-25 This new book discusses food quality and safety standards that are critically important for both developed and developing economies, where consumer safety is among the primary issues to be considered in food supply chain management. The editors consider that food safety is a multi-faceted subject, using microbiology, chemistry, standards and regulations, and risk management to address issues involving bacterial pathogens, chemical contaminants, natural toxicants, additive safety, allergens, and more; hence, the volume emphasizes the interrelationship between these areas and their equal importance in food production. With chapters from researchers from around the world, this book looks at critically important advances and topics in technology that has become indispensable in controlling hazards in the modern food industry. The varied topics include the role of mineral content of soils in food safety, microwave-assisted extraction of phenolic compounds, foodborne pathogenic anaerobes, enzymatic modification of ferulic acid content, and more.
