Tratado de física general Ignacio González Martí,1912

Diccionario de Informatica, Telecomunicaciones y Ciencias Afines/Dictionary of Computing, Telecommunications, and Related Sciences Mario León,2004 Este diccionario que engloba unas 83.000 entradas, casi 10.000 abreviaturas y unas 6.000 definiciones y aclaraciones, es el resultado de la experiencia recopilada durante los últimos 20 años en la traducción técnica especializada en la materia y de la consulta de las principales obras aparecidas recientemente en el mercado sobre estos temas, así como de la explicación y resolución de muchas dudas por ingenieros, expertos y aplicadores de técnicas y sistemas del sector. Está destinado a técnicos, expertos, traductores profesionales, y en general, a toda persona que se relacione con la informática, la electrónica o las telecomunicaciones utilizando ambos idiomas. El diccionario justifica su carácter politécnico porque se han añadido numerosos términos de ramos afines y especializados, como por ejemplo telefonía, electromedicina, telegrafía, sistemas de armas, radiactividad, informática, termoelectricidad, radiodifusión, nucleónica, láser, televisión, electricidad, técnicas de detección, magnetismo, espectrografía, etc.

Fractales y caos en ingeniería y aplicaciones Óscar José Mesa Sánchez,2023-04-21 Los sistemas caóticos obedecen a una ley de evolución determinista, pero se pierde la capacidad de predecir, hay sensibilidad a las condiciones iniciales. Sin embargo, hay regularidades importantes: la estructura geométrica, las densidades invariantes y la ley de grandes números. Los dos ejemplos del atractor de Lorenz y la parábola logística sirven para exponer fundamentos, como sensibilidad a condiciones iniciales, exponentes de Lyapunov y atractores extraños. Se termina con los teoremas ergódicos y las distribuciones invariantes. El libro presenta una colección de aplicaciones: la teoría orbital de las glaciaciones, los cambios abruptos en la circulación oceánica, el fenómeno de El Niño-Oscilación del Sur, las retroalimentaciones en hidrología, el mundo de las margaritas y el movimiento browniano.
