Massive Open Online Courses Paul Kim, 2014-11-20 Are MOOCs a catalyst for reimagining education, a sign of the increased corporatization of the education sector, or merely a well-publicized but passing trend? *Massive Open Online Courses* shares insights from multiple stakeholders on what MOOCs are now and could eventually become, providing those in higher education as well as K-12, military, government, and corporate training with an authoritative source on a wide range of key issues surrounding MOOCs. MOOCs, or Massive Open Online Courses, are a disruptive technology currently forcing a serious reconceptualization of accreditation, assessment, motivation and retention, technology-based instruction, and the overall student experience. In this timely volume, Paul Kim brings together experts from higher education, business, law, learning analytics and other relevant areas to provide an evenhanded, research-based positioning of MOOCs within the existing educational technology landscape and a base for understanding whether they could reshape the future of education.

What Teachers Need to Know About Assessment and Reporting Phil Ridden, Sandy Heldsinger, 2014-05-01 What

Teachers Need to Know About Assessment and Reporting is a response to the pressures on teachers and schools to not only improve the quality of teaching, but to demonstrate improved outcomes. Many teachers apply assessment approaches which are familiar from their own education or that are learnt from peers. This book seeks to fill the gap in teacher knowledge about assessment and reporting and to provide practical support in this area for teachers and school leaders. It explores the various purposes of assessment along with practical guidance on creating and scoring assessments, interpreting and using data, and reporting the results to various audiences for various purposes.

Applications of Rasch Measurement in Learning Environments Research Robert F. Cavanagh, Russell F.

Waugh, 2011-11-12 Major advances in creating linear measures in education and the social sciences, particularly in regard to Rasch measurement, have occurred in the past 15 years, along with major advances in computer power. These have been combined so that the Rasch Unidimensional Measurement Model (RUMM) and the WINSTEPS computer programs now do statistical calculations and produce graphical outputs with very fast switching times. These programs help researchers produce unidimensional, linear scales from which valid inferences can be made by calculating person measures and item difficulties on the same linear scale, with supporting evidence. These computer programs are now available to all Learning Environment researchers. This book includes 13 Learning Environment research papers using Rasch measurement applied at the forefront of education with an international flavour. The contents of the papers relate to: (1) high stakes numeracy testing in Western Australia; (2) early English literacy in New South Wales; (3) the Indonesian Scholastic Aptitude Test; (4) validity in Learning Environment investigations; (5) factors influencing the take-up of Physics in Singapore; (6) state-wide authentic assessment for Years 11-12; (7) talented and gifted student perceptions of the learning environment; (8) disorganisation in the classroom; (9) psychological services in learning environments; (10) English teaching assistant roles in Hong Kong; (11) learning Japanese as a second language; (12) engagement in classroom learning; and (13) early cognitive development in children. This book would be of interest to all educators and educational administrators, to Learning Environment researchers and PhD students, and should be available in all university libraries where the universities have education schools or faculties. -Russell Waugh-

Food Security in the Developing World Muhammad Khalid Bashir, Steven G. M. Schilizzi, Ghaffar Ali, 2024-02-12 An introduction to the urgent global question of how to feed the hungry Global food production has never been more abundant, yet nearly a billion people worldwide suffer from malnutrition, virtually all of them in the developing world. Food security in these countries is a global humanitarian issue which becomes more urgent with every passing year. There is a vital need to understand the nature and causes of food scarcity in developing countries in order to see to it that our global bounty reaches the hungry people who need it. Food Security in the Developing World offers a comprehensive single-volume introduction to the subject. It focuses on three core issues—food availability, food accessibility, and food utilization—in order to produce a

rounded picture of the causes and possible solutions for food scarcity. Thorough and accessible, it promises to help researchers and policymakers address this growing humanitarian crisis in a reasoned and targeted way. Food Security in the Developing World readers will also find: Future-oriented approach which continuously highlights paths forward Detailed discussion of topics including climate change and agricultural productivity, price volatility, diet and nutrition, and many more Examples and case studies drawn from across the developing world, including Sudan, Uganda, Nepal, and Afghanistan Food Security in the Developing World is ideal for food scientists and technologists, students in programs related to food science, development studies, geography, and related subjects, and policymakers working in food production and distribution.
