It Came from Beyond Zen! Brad Warner, 2017-09-01 Vol. 2 of Brad Warner's Radical but Reverent Paraphrasing of Dogen's Treasury of the True Dharma Eye In Japan in 1253, one of the great thinkers of his time died — and the world barely noticed. That man was the Zen monk Eihei Dogen. For centuries his main work, Shobogenzo, languished in obscurity, locked away in remote monasteries until scholars rediscovered it in the twentieth century. What took so long? In Brad Warner's view, Dogen was too ahead of his time to find an appreciative audience. To bring Dogen's work to a bigger readership, Warner began paraphrasing Shobogenzo, recasting it in simple, everyday language. The first part of this project resulted in Don't Be a Jerk, and now Warner presents this second volume, It Came from Beyond Zen! Once again, Warner uses wry humor and incisive commentary to bridge the gap between past and present, making Dogen's words clearer and more relevant than ever before.

The 52 Weeks Karen Amster-Young, Pam Godwin, 2013-11-05 Edging into forty-something, Karen and Pam found themselves in a state of stuck. They had checked off many of their major life goals—career, husband, children, friends—but they’d lost momentum. After griping over drinks one night, they came up with a plan to face their fears, rediscover their interests, try new things, and renew their relationships. They challenged themselves to try one new thing every week for a year—from test-driving a Maserati to target practice at a shooting range to ballroom dance lessons—and to blog about their journeys. They quickly realized it was harder than they ever imagined but came through it with a sense of clarity and purpose that has them itching to share the possibilities with the millions of middle-aged women out there who feel the same way about one or many areas of their lives. Getting unstuck doesn’t have to mean running a marathon, traveling the world, or ending a relationship with your partner. Through their experiences and a good dose of no-nonsense advice, Karen and Pam show readers how achieving small goals can give you a renewed sense of accomplishment and how you can keep growing, learning, and moving forward at any age. Interspersed with personal stories is expert advice from doctors, psychiatrists, artists, and even a poker diva (who also happens to be a Fortune 500 executive).

From political missteps to philosophical paradoxes, this book invites readers to laugh at the wisdom of the ages while questioning the seriousness of those who have shaped history with their words. Insanity and Genius Harry Eiss, 2014-06-02 In his book about the discovery of the structure of DNA, James Watson wrote, “So we had lunch, telling ourselves that a structure this beautiful just had to exist.” Indeed, the quest most often asked by scientists about a scientific theory is “Is it beautiful?” Yes, beauty equals truth. Scientists know, mathematicians

know. But the beauties, the truths of mathematics and science were not the truths that inspired the author as a child, and he intuitively knew that the truths he needed come from a different way of knowing, a way of knowing not of the world of logic and reason and explanation (though they have a value), but rather a way of knowing that is of the world expression, a world that enters the truths beyond the grasp of logic. That is what this book is all about. It is an exploration of the greatest minds of human existence struggling to understand the deepest truths of the human condition. This second edition updates the previous one, incorporating new publications on Van Gogh, recent discoveries in neurology, psychology, and the rapid developments in understanding DNA and biotechnology. We've come a long way already from that original discovery by Watson and his coauthor Francis Crick.

Visions of Awakening Space and Time Taigen Dan Leighton, 2008-12-31 As a religion concerned with universal liberation, Zen grew out of a Buddhist worldview very different from the currently prevalent scientific materialism. Indeed, says Taigen Dan Leighton, Zen cannot be fully understood outside of a worldview that sees reality itself as a vital, dynamic agent of awareness and healing. In this book, Leighton explicates that worldview through the writings of the Zen master Eihei Dōgen (1200-1253), considered the founder of the Japanese Sōtō Zen tradition, which currently enjoys increasing popularity in the West. The Lotus Sutra, arguably the most important Buddhist scripture in East Asia, contains a famous story about bodhisattvas (enlightening beings) who emerge from under the earth to preserve and expound the Lotus teaching in the distant future. The story reveals that the Buddha only appears to pass away, but actually has been practicing, and will continue to do so, over an inconceivably long life span. Leighton traces commentaries on the Lotus Sutra from a range of key East Asian Buddhist thinkers, including Daosheng, Zhiyi, Zhanran, Saigyō, Myōe, Nichiren, Hakuin, and Ryōkan. But his main focus is Eihei Dōgen, the 13th century Japanese Sōtō Zen founder who imported Zen from China, and whose profuse, provocative, and poetic writings are important to the modern expansion of Buddhism to the West. Dōgen's use of this sutra expresses the critical role of Mahayana vision and imagination as the context of Zen teaching, and his interpretations of this story furthermore reveal his dynamic worldview of the earth, space, and time themselves as vital agents of spiritual awakening. Leighton argues that Dōgen uses the images and metaphors in this story to express his own religious worldview, in which earth, space, and time are lively agents in the bodhisattva project. Broader awareness of Dōgen's worldview and its implications, says Leighton, can illuminate the possibilities for contemporary approaches to primary Mahayana concepts and practices.

The Ethical Chemist Jeffrey Kovac,2018-08-10 This book is an introduction to professional ethics in chemistry. After a brief overview of ethical theory, it provides a detailed discussion of professional ethic for chemists based on the view that the specific codes of conduct derive from a moral ideal. The moral ideal presented here has three parts. The first refers to the practice of science, the second to relationships within the scientific community and the third to the relationship between science and society, particularly the uses of science. The question of why a scientist should obey the professional code is discussed in terms of the virtue of reverence, after which the ethical issues unique to chemistry are identified. A method for approaching ethical problems is presented. Finally, there is a large collection of specific ethical problems, or cases, each followed by a commentary where the issues raised by that case are discussed.
