**The Honest Truth About Dishonesty** Dr. Dan Ariely, 2013-06-18 “A lively tour through the impulses that cause many of us to cheat, the book offers especially keen insights into the ways in which we cut corners while still thinking of ourselves as moral people.” — Time Dan Ariely, behavioral economist and New York Times bestselling author of *Predictably Irrational* and *The Upside of Irrationality*, returns with a thought-provoking work that challenges our preconceptions about dishonesty and urges us to take an honest look at ourselves. Does the chance of getting caught affect how likely we are to cheat? How do companies pave the way for dishonesty? Does collaboration make us more or less honest? Does religion improve our honesty? Most of us think of ourselves as honest, but, in fact, we all cheat. From Washington to Wall Street, the classroom to the workplace, unethical behavior is everywhere. None of us is immune, whether it's a white lie to head off trouble or padding our expense reports. In *The (Honest) Truth About Dishonesty*, award-winning author Dan Ariely shows why some things are easier to lie about than others; how getting caught matters less than we think in whether we cheat; and how business practices pave the way for unethical behavior, both intentionally and unintentionally. Ariely explores how unethical behavior works in the personal, professional, and political worlds, and how it affects all of us, even as we think of ourselves as having high moral standards. But all is not lost. Ariely also identifies what keeps us honest, pointing the way for achieving higher ethics in our everyday lives. With compelling personal and academic findings, *The (Honest) Truth About Dishonesty* will change the way we see ourselves, our actions, and others.

**The (Honest) Truth about Dishonesty** Dan Ariely, 2012 Ariely, a behavioral economist and a New York Times bestselling author, examines the contradictory forces that drive people to cheat and maintain honesty, in this groundbreaking look at the way people behave.

**The (honest) Truth about Dishonesty** Dan Ariely, 2013 What makes us cheat? How and why do we rationalise deception of ourselves and other people, and make ourselves 'wishfully blind' to the blindingly obvious? If you've ever wondered how a whole company can turn a blind eye to evident misdemeanours within their ranks, whether people are born dishonest and whether you can really be successful by being totally, brutally honest, then Dan Ariely has the answers.

*The Power of Ideals* William Damon, Anne Colby, 2015-04-03 Cynicism often seems a smarter choice than idealism. There are reasons for this. Politicians have disappointed us time and again; trusted institutions have proven to be self-serving and corrupt; hopes for lasting world peace repeatedly have been dashed; and social inequities persist and increase, unabated by even the grandest of charitable efforts. It is now considered foolish to think that people can be counted on to rise above their narrow self-interests to serve the broader good, or to tell the truth if it does not reflect well on the self. Supporting this bleak view of the human condition is a moral psychology that has taken increasingly cynical turns in recent years. Famous studies have shown that we have an almost unlimited potential for cruelty when placed in the wrong situations. *The Power of Ideals* presents a different vision, supported by a different kind of evidence. It examines the lives and work of six 20th century moral

leaders who pursued moral causes ranging from world peace to social justice and human rights. Using these six cases to illustrate how people can make choices guided by their moral convictions, rather than by base emotion or social pressures, authors William Damon and Anne Colby explore the workings of three virtues: inner truthfulness, humility, and faith. Through their portrayal of the noble lives of moral leaders, the authors argue that all of us--with ordinary lives--can exercise control over important life decisions and pursue ideals that we believe in.

*The Unconditionals* Andy Crocker, 2025-05-20 Five core values can help us live more fulfilled and successful lives—no matter what’s happening around us. After spending five years leading a team competing against Elon Musk and Jeff Bezos to return humans to the Moon—a once-in-a-lifetime opportunity that ended in heartbreak—aerospace engineer Andy Crocker found himself searching for what truly matters. That loss, coupled with the realization that his kids were nearly grown, sparked a desire to pass on the values he believes are essential for living a meaningful life. *The Unconditionals* is the result—a framework grounded in timeless principles to help anyone pursue personal fulfillment and well-being. The *Unconditionals* introduces five core values—love, gratitude, integrity, accountability, and endeavor—as essential for personal fulfillment and growth. Combining timeless wisdom, scientific findings, and inspiring real-life examples, it illustrates how embracing these values unconditionally can transform our lives. More than a collection of quick fixes, it guides us to overcome self-limiting beliefs, cultivate resilience, and achieve our full potential. It teaches that who we are matters more than what we achieve and provides a clear, inspiring roadmap for living a meaningful, purposeful life. Whether you’re seeking clarity, resilience, or a deeper sense of fulfillment, *The Unconditionals* is a roadmap to becoming who you're meant to be—and a guide to passing those values on to those who matter most. You can make *Unconditional* your superpower.

*The Village Effect* Susan Pinker, 2014-08-26 In her surprising, entertaining and persuasive new book, award-winning author and psychologist Susan Pinker shows how face-to-face contact is crucial for learning, happiness, resilience and longevity. From birth to death, human beings are hard-wired to connect to other human beings. Face to face contact matters: tight bonds of friendship and love heal us, help children learn, extend our lives and make us happy. Looser in-person bonds matter, too, combining with our close relationships to form a personal village around us, one that exerts unique effects. And not just any social networks will do: we need the real, face-to-face, in-the-flesh encounters that tie human families, groups of friends and communities together. Marrying the findings of the new field of social neuroscience together with gripping human stories, Susan Pinker explores the impact of face-to-face contact from cradle to grave, from city to Sardinian mountain village, from classroom to workplace, from love to marriage to divorce. Her results are enlightening and enlivening, and they challenge our assumptions. Most of us have left the literal village behind, and don't want to give up our new technologies to go back there. But, as Pinker writes so compellingly, we need close social bonds and uninterrupted face-time with our friends and families in order to thrive--even to survive. Creating our own village effect can make us happier. It can also save our

lives.

**The Palgrave Handbook of Deceptive Communication** Tony Docan-Morgan, 2019-04-29 Deception and truth-telling weave through the fabric of nearly all human interactions and every communication context. The Palgrave Handbook of Deceptive Communication unravels the topic of lying and deception in human communication, offering an interdisciplinary and comprehensive examination of the field, presenting original research, and offering direction for future investigation and application. Highly prominent and emerging deception scholars from around the world investigate the myriad forms of deceptive behavior, cross-cultural perspectives on deceit, moral dimensions of deceptive communication, theoretical approaches to the study of deception, and strategies for detecting and deterring deceit. Truth-telling, lies, and the many grey areas in-between are explored in the contexts of identity formation, interpersonal relationships, groups and organizations, social and mass media, marketing, advertising, law enforcement interrogations, court, politics, and propaganda. This handbook is designed for advanced undergraduate and graduate students, academics, researchers, practitioners, and anyone interested in the pervasive nature of truth, deception, and ethics in the modern world.

The Business of Cyber Peter Fagan, 2024-02-23 This book examines the cybersecurity phenomenon, looking at the folklore, the hype, and the behaviour of its practitioners. A central theme is that the management of cybersecurity needs to be owned by the people running the organisation, rather than by the cybersecurity team, who frequently don't have management as a core skill. In order to effect that change, managers need to have the background and detail to challenge what they are being told, enabling them to engage in a way that will result in more appropriate outcomes for the business. This book provides that background and detail. It debunks a number of cyber-myths, and calls out basic errors in the accepted thinking on cyber. The content is strongly rooted in available research and presented in an accessible manner, with a number of business-related case studies. Each chapter in the book takes a theme such as end-user behaviours and compares the available evidence with what the industry would like to have its customers believe. The conclusion is that there is definitely a problem, and we certainly need cyber defences. Just not the ones the industry is currently selling.

*The Logic of the Spirit in Human Thought and Experience* Dana R. Wright, Keith J. White, 2014-09-18 In March 2012 a small consultation convened on the campus of Princeton Theological Seminary, where James E. Loder Jr. had served for forty years as the Mary D. Synnott Professor of the Philosophy of Christian Education. Members from the Child Theology Movement had begun to read Loder's work and they wanted to go further. So they invited former students of Loder's to meet with them for conversations about things that really mattered to them and to Loder: human beings (and especially children), the church's witness to the gospel of Jesus Christ, and discerning the work of Spiritus Creator in the postmodern world. The conversations proved rich and rewarding and some would even say they took on a life of their own--serious scholarship set to the music of the Spirit's communion-creating artistry forming new relationships, inspiring new ideas, and sustaining all of it

amid much laughter, joy, and hope. These essays, taken from the papers delivered at the consultation, are offered as a means of extending that conversation inspired by Loder's interdisciplinary practical theological science and his discernment of the logic of the Spirit. They are offered with confidence that the same Spirit continues to work in all persons who hope for the Spirit's redemptive transformation of all creation, beginning with children.

**The Intractable Dispute** Raphael Israeli, 2019-02-21 The Middle East conflict, which has been raging for a century and seems to have no end in sight, is not over territory or other assets, but is historically anchored in the Islamic tradition, which has become the preponderant faith of the Arabs. Being a qualitative factor of an either-or import from the Muslim point of view, which is today best expressed by Iran, the Muslim Brothers, Hamas, Hezbollah, and other radical Muslim movements, it is not given to negotiation and compromise, as any other political conflict, but is governed by absolutes and one-sided perspectives. Arab nationalism, Islam, and Zionism are the main political and religious movements taking center stage in this conflict. The intractable nature of the conflict has so far defied all negotiations, agreements, and peace treaties. All the proposed “peaceful” settlements have thus far remained brittle, while the fundamental issues of stereotyping, suspicion, hatred, and condescendence have remained in place, unshaken. This book confronts two contradictory ideologies and attempts to bridge them over.

**Sex, Lies and Politics** Philip Cowley, Robert Ford, 2019-09-12 Elections aren't just important - they are revealing. They tell us things about who we are and how we behave. Written by leading political experts, Sex, Lies and Politics reveals what really makes us tick. At once funny, revealing and shocking, it covers everything you need to know about the voters and their quirks, foibles and sexual secrets, including when they lie (often to themselves), how they are swayed by tribal loyalties (even when judging cats and celebrities), and why you should keep quiet about your Brexit vote when moving house... Combining brand-new essays with fully updated pieces from the acclaimed Sex, Lies and the Ballot Box and More Sex, Lies and the Ballot Box, this witty and thought-provoking collection is a guaranteed conversation starter. If you want to discover which party's voters have the wildest private lives, read on.

**Science Myths We Tell Ourselves** William N. Barbat, 2015-03-27 We live in an age of trusting the “experts.” But what happens when the so-called experts are wrong...and their misinformation is allowing us to destroy ourselves? In Science Myths We Tell Ourselves, William Barbat demonstrates the incorrect reasoning behind “facts” we have been taught, including the Big Bang, instant creation, continental drift, and spreading sea floors. Skeptics’ assertions that the climate is not changing are disproven by Barbat’s update of his 1973 climate study, which definitively proves that the world’s desert belts are expanding poleward, like the expansion of the Sahara Desert of North Africa, which ended the Ice Age. The recent drought in the midcontinental US, and the pervasive droughts in California and Brazil may be previews of climate disasters brought on by mankind, unless we can halt climate change by rethinking our energy protocols. We’ve been told that energy

cannot be created in nature, or by man...but the stunning central thesis of *Science Myths We Tell Ourselves* is that the “law” on which this belief is based (Helmholtz’s Energy Conservation Law) is completely untrue—in fact, it was rejected as “metaphysics” in 1847 by the Berlin Physics Society. Scientists unwilling to examine the facts continue to propagate this misinformation while ignoring the potential for unlimited, non-polluting energy from low-mass electrons. This enlightening and fascinating book will challenge what you think you know, as well as providing hope and direction for a different future.

*The Social Brain: New Insights from Social, Clinical, and Biological Psychology* Carmelo Mario Vicario, Gabriella Martino, Giuseppe Craparo, Chiara Lucifora, Paola Magnano, 2025-02-11 The growing interest in Neuroscience by social scientists and philosophers has favored the emergence of a new, multidisciplinary field: Neuroethics. This discipline addresses the study of the social cognitive principles, the neurobiological determinants and the impact on technology design and use of moral judgment, decision making, and behavior. It adopts an integrated approach which builds on a backbone of a philosophical spirit, while using the scientific method in the study of the concept of morality and its expressions, from bodily reactions to behaviors. Related topics may include social cognition, theory of mind, empathy, altruism, conformity, prejudice and discrimination, attitudes and persuasion. This collection is based on a multidisciplinary approach that relies on the cross-fertilization between disciplines such as philosophy, social psychology, social neuroscience and clinical psychology to answer a fundamental question: what does it mean to be moral animals? The research topic aims to make recent discoveries on moral behavior and social cognition accessible to a broad audience interested in how morality defines human beings, their interactions and their social world.

**Inside an Academic Scandal** Max H. Bazerman, 2025-09-09 How fraud in a published paper about honesty roiled the world of social science. In 2012 Max Bazerman, along with four coauthors, published an influential paper showing that “signing first”—that is, promising to tell the truth before filling out a form—produced greater honesty than signing afterward. In 2021, academic sleuths revealed that two of the experiments in the paper were fraudulent, triggering what would become one of the most significant academic frauds of the twenty-first century. In *Inside an Academic Scandal*, Bazerman tells the sobering story of how fraud in a published paper about inducing honesty upended countless academic careers, wreaked havoc in organizations that had implemented the idea of “signing first,” and undermined faith in academic research and publication. This vivid account offers an inside look at the replicability crisis in social science today. In intriguing detail, the book explores recent conflicts and transformations underway in the field, considers the role of relationships and trust in enabling fraud in academic research, and describes Bazerman’s own part in the scandal—what he did and didn’t do to stop the fraud in the signing-first paper, what consequences he faced, and what hard lessons he learned in the process. A compelling story of fraud and betrayal, the book provides a deep and ultimately instructive look at how academic research works—and doesn’t—in social science.
