History of Universities Mordechai Feingold,2004-04-08 Volume XIX/1 of History of Universities contains the customary mix of learned articles, book reviews, conference reports and bibliographical information, which makes this publication such an indispensable tool for the historian of higher education. Its contributions range widely geographically, chronologically, and in subject-matter. The volume is, as always, a lively combination of original research and invaluable reference material.

Advances in Clinical Chemistry ,2010-11-23 Volume 47 in the internationally acclaimed Advances in Clinical Chemistry contains chapters submitted from leading experts from academia and clinical laboratory science. Authors are from a diverse field of clinical chemistry disciplines and diagnostics, ranging from basic biochemical exploration to cutting-edge microarray technology. - Leading experts from academia and clinical laboratory science - Volume emphasizes novel laboratory advances with application to clinical laboratory diagnostics and practical basic science studies

Glutathione Leopold Flohe,2018-08-29 This is the first serious attempt to synthesize all that became known of glutathione over the last three decades. The book contains an update of glutathione biosynthesis with special emphasis on its

regulation in adaptive stress responses. Other chapters review glutathione transport systems and glutathione peroxidases and their differences in substrate specificities and localization. Further contributions center on the diversified roles of different glutathione-S-transferases and the roles of nitrosogluthathione and glutaredoxins - a subfamily of redoxins. The book closes with discussions of the analogous or homologous thiol metabolism in pathogens and the potential suitability of involved enzymes as drug targets. Key selling features: Summarizing the way glutathione is involved in stress responses Compiling the multiple ways glutathione affects inflammatory responses Disclosing how glutathione dampens programmed cell death such as ferroptosis Exploring the enigma of how enzymes accelerate glutathione-dependent processes Discussing how detoxification and redox regulation is mediated by glutathionylation Reviewing the ways glutaredoxins catalyze protein disulfide reduction Highlighting the medical impact of glutathione-related metabolic pathways Illustrating the role thiol metabolism of pathogens might play in drug discovery Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution (CC-BY) 4.0 license.

Topics in Acute and Chronic Pancreatitis L.A. Scuro, A. Dagradi, G.P. Marzoli, P. Pederzoli, G. Cavallini, C.

Banterle, 2012-12-06 The increasing incidence of both chronic pancreatitis and pancreatic cancer was the primary impetus for the organization of this meeting, an additional factor being the widespread existence of pancreatic disease within Italy itself. It is well known that the treatment of chronic and particularly of acute pancreatitis is still a matter of controversy, and it seemed useful to compare our own experience with that of other centers working in the same field. Consequently, in addition to numerous Italian specialists in the field, doctors from the Federal Republic of Germany, Denmark, Great Britain, France, and Austria were invited to attend the meeting. The symposium lasted two days and comprised eight sessions dealing with the anatomy and physiology of the pancreas and the pathophysiology, diagnosis, and treatment of pancreatic diseases. A central feature of the discussion on the surgical treatment of chronic pancreatitis was the debate between those who favor the use of drainage and those who believe resection to be the best treatment. Finally, I would like to thank Dr. Cavallini and Dr. Pederzoli very much for their help in organizing the meeting and also the local authorities for their aid. Professor Adamo

Dagradi Director of the Institute of Clinica Chirurgica, Verona Opening Address I am pleased to welcome all participants and particularly the guests from abroad, to this meeting on the clinical evaluation of pancreatitis.

Plants in 16th and 17th Century Fabrizio Baldassarri,2023-07-04 In the pre-modern times, while medicine was still relying on classical authorities on herbal remedies, a new engagement with the plant world emerged. This volume follows intertwined strands in the study of plants, examining newly introduced species that captured physicians' curiosity, expanded their therapeutic arsenal, and challenged their long-held medical theories. The development of herbaria, the creation of botanical gardens, and the inspection of plants contributed to a new understanding of the vegetal world. Increased attention to plants led to account for their therapeutic virtues, to test and produce new drugs, to recognize the physical properties of plants, and to develop a new plant science and medicine.

The iter italicum and the Northern Netherlands Ad Tervoort,2004-12-01 The iter italicum, the peregrinatio academica to prestigious Italian universities, holds a special place in the history of late-medieval universities. Students from all over Europe flocked to the studia on the peninsula, including several well-known - but how many more unknown? - scholars and humanists from the Northern Netherlands. Nevertheless, this group of adventurous students has not yet been honoured with a monograph. This volume fills that gap. It provides the first comprehensive analysis of the nature of the iter italicum from the Northern Netherlands in the late-medieval period. Through a systematic investigation of the academic activities, background, and careers of 640 - many hitherto unknown - students, the author unravels the character of the iter italicum and its place in, and contribution to, society and culture in this transitional period for the Low Countries.

Anthropological Reformations - Anthropology in the Era of Reformation Anne Eusterschulte,Hannah Wälzholz,Günter Frank,Ute Lotz-Heumann,Barbara Mahlmann-Bauer,Johannes Schilling,Günther Wassilowsky,Siegrid Westphal,Tarald Rasmussen,Mathijs Lamberigts,Bruce Gordon,David M. Whitford,2015-10-28 The aim of the volume is to engage in an interdisciplinary discussion about the establishment and debates on anthropological concepts and their changes in the age of Reformation: How do anthropological concepts touch theological questions such as the freedom of will or the human likeness to God? In which ways is there a reflection on emotions? How is scientific knowledge received by theologians? How is contemporary thought on the conditio humana presented in literature and poetry? The volume combines selected papers of relevant experts with the research work of young graduate or postgraduate scholars. It tries to encourage a transdisciplinary, international discussion focused on exemplary case studies as well as systematic points of view. Thanks to the outstanding commitment of all participants of the conference we are able to present the results of this discussion, a rich and comprehensive spectrum of research work, which will encourage further research.

Malpractice and Medical Liability Santo Davide Ferrara,Rafael Boscolo-Berto,Guido Viel,2013-04-11 Medical responsibility lawsuits have become a fact of life in every physician's medical practice. However, there is evidence that

physicians are increasingly practising defensive medicine, ordering more tests than may be necessary and avoiding patients with complicated conditions. The modern practice of medicine is increasingly complicated by factors beyond the traditional realm of patient care, including novel technologies, loss of physician autonomy, and economic pressures. A continuing and significant issue affecting physicians and the healthcare system is malpractice. In the latter half of the 20th century, there was a major change in the attitude of the public towards the medical profession. People were made aware of the huge advances in medical technology, because health problems increasingly tended to attract media interest and wide publicity. Medicine is a victim of its own success in this respect, and people are now led to expect the latest techniques and perfect outcomes on all occasions. This burst of technology and hyper-specialization in many fields of medicine means that each malpractice claim is transformed into a scientific challenge, requiring specific preparation in analysis and judgment of the clinical case in question. The role of legal medicine becomes more and more peculiar in this judicial setting, often giving rise to erroneous interpretations and hasty scientific verdicts, but guidelines on the methodology of ascertainties and criteria of evaluation are lacking all over the world. The aim of this volume is to clarify the steps required for sequential in-depth analysis of events and consequences of medical actions, in order to verify whether, in the presence of damage, errors or non-observance of rules of conduct by health personnel exist, and which causal values and links of their hypothetical misconduct are involved.

Between Text and Tradition Pieter De Leemans, Maarten J.F.M. Hoenen, 2016-06-29 New insights into Pietro d'Abano's unique approach to translations The commentary of Pietro d'Abano on Bartholomew's Latin translation of Pseudo-Aristotle's *Problemata Physica*, published in 1310, constitutes an important historical source for the investigation of the complex relationship between text, translation, and commentary in a non-curricular part of the *corpus Aristotelicum*. As the eight articles in this volume show, the study of Pietro's commentary not only provides valuable insights into the manner in which a commentator deals with the problems of a translated text, but will also bring to light the idiosyncrasy of Pietro's approach in

comparison to his contemporaries and successors, the particularities of his commentary in light of the habitual exegetical practices applied in the teaching of regular curricular texts, as well as the influence of philosophical traditions outside the strict framework of the medieval arts faculty. Contributors Joan Cadden (University of California, Davis), Gijs Coucke (KU Leuven), Béatrice Delaurenti (École des Hautes Études et Sciences Sociales – Paris), Pieter De Leemans (KU Leuven), Françoise Guichard-Tesson (KU Leuven), Danielle Jacquart (École Pratique des Hautes Études – Paris), Christian Meyer (Centre d'Études supérieures de la Renaissance – Tours), Iolanda Ventura (CNRS – Université d'Orléans)
