ABM is a term used in various contexts, often referring to Agent-Based Modeling (ABM) or Account-Based Marketing (ABM). In the context of ABM, it typically refers to a modeling approach where individual agents (representing entities like customers, companies, or organizations) interact with each other and their environment. This approach is used to simulate complex systems and predict outcomes based on the interactions of these agents. The text discusses the application of ABM in various fields, including marketing, economics, and social sciences. It mentions the use of ABM in modeling the behavior of agents in a network, the impact of different parameters on the system, and the challenges of implementing ABM in real-world scenarios.
