Hacia un nuevo paradigma del espacio público sostenible Mariella Laura García Aurich, Carla Rosario Escalante Medina, Carlos Germán Paredes García, 2025-05-21 Este libro es el resultado de un arduo proceso de investigación, reflexión y compromiso con la construcción de un nuevo paradigma para el espacio público sostenible. Más que el resultado de una investigación, este libro representa el testimonio de un esfuerzo colectivo, guiado por la convicción de que es posible construir espacios más humanos, sostenibles y vibrantes, donde la vida urbana y el entorno natural convivan en armonía.

Planeación urbana y regional Rosa Imelda Rojas Caldelas, 2005

Socioecosistemas urbanos Duque Gutiérrez, Maritza, 2020-07-15 En este libro el lector podrá encontrar las herramientas para hacer un acercamiento al ordenamiento territorial con base socioecológica, es decir un territorio pensado a partir de los límites biogeofísicos y diseñado con el fin último de promover el bienestar humano. Es un texto que puede ser usado por estudiantes que requieren conceptos base para iniciar su acercamiento al entendimiento de las relaciones humanos-naturaleza, así como por los tomadores de decisiones, ya que se presentan los pasos a tener en cuenta para un ordenamiento territorial. La obra presenta situaciones aplicadas a la ciudad de Bogotá, ya que esta se erige como uno de los mejores laboratorios latinoamericanos, pues sus tendencias siguen, y cada vez más rápido, las direcciones de muchas metrópolis a nivel mundial en el marco del Antropoceno.

Hacia ciudades y territorios inteligentes, resilientes y sostenibles Asociación Sostenibilidad Y Progreso De Sociedades, Luis M Jiménez Herrero, 2016-11-14 El final del presente decenio y el próximo van a ser decisivos para orientar el rumbo de los generalizados procesos de urbanización, identificados como una de las principales megatendencias mundiales. Estamos en un momento histórico para entender que las ciudades y los territorios son elementos críticos de la transición hacia la sostenibilidad local y global. Como partes de la solución y del problema, las zonas urbanas y sus entornos tienen capacidades para rediseñar la política urbana y regional con un enfoque integrado y sostenible a fin de abordar con esperanza

los desafíos sistémicos y los fenómenos globales como el cambioclimático. La transición urbana y territorial en la era del Antropoceno y el Cambio Global precisa ajustes proactivos y adaptativos de los socioecosistemas urbanos y las regiones en el denominado 'siglo metropolitano'. El libro está distribuido en 7 partes que abordan diferentes temáticas de interés en las ciudades: La transición urbana y territorial frente al cambio global y las megatendencias mundiales. Las bases para definir ciudades y territorios con inteligencia, sostenibilidad y resiliencia en busca de la convivencia. Perspectiva sistémica y la gestión del metabolismo urbano. Criterios de ecoeficiencia, morfología, movilidad e impacto ambiental en la gestión urbana. Gestión de la sostenibilidad y la resiliencia en un contexto territorial. Agendas estratégicas y marcos de referencia para los nuevos paradigmas urbanos. Modelos avanzados de gobernanza local: nuevas capacidades y responsabilidades de las sociedades y de los gobiernos urbanos y regionales. A lo largo de, este texto se abordan los desafíos de los nuevos paradigmas urbanos donde se deben encuadrar coherentemente las políticas, las normativas, los sistemas de planificación, gestión y gobernanza participativa de las ciudades y las regiones. Así, se resalta el enfoque integrado de la dimensión urbana en un marco territorial, al tiempo que se enfatiza la relación de las ciudades y de los territorios, insistiendo en los nexos urbano-rurales para mejorar la sostenibilidad y la resiliencia local-regional. La gestión de los socioecosistemas urbanos y los territorios se tiene que plantear desde un enfoque de sistemas considerando el metabolismo de las modernas ciudades y los factores de ecoeficiencia relacionados con la morfología urbana, la movilidad y el mayor impacto ambiental de los patrones urbanos dispersos frente a compactos, que son mucho más eficientes y sostenibles. El libro se publica en un momento oportuno, justo después de la Conferencia HABITAT III, señalando la importancia estratégica de las zonas urbanas, en su empeño por dominar el planeta, para trazar y afrontar colectivamente el futuro en el marco de un desarrollo humano sostenible. Es una obra profunda con contenidos de máxima actualidad que debe ser de interés para el mundo académico, para profesionales involucrados con la planificación de la gestión urbana y para el gobierno a nivel local, así como también para todos aquellos estudiosos de los procesos de sostenibilidad aplicada a la dimensión urbana y territorial. Las ciudades y territorios, donde viven, trabajan y sueñan las personas, requieren formas de gestión y gobernanza inteligentes, resilientes y sostenibles, pero también necesitan más sabiduría para crear lugares habitables y convivenciales. Desarrollo sostenible Luis M. Jiménez Herrero, 2017-06-29 La humanidad se encuentra ante un cambio global en la llamada era del Antropoceno. Para hallar salidas a esta crisis planetaria y de civilización, que estamos generando y padeciendo, todo indica que hay que concebir la sostenibilidad de forma integral y plantear el desarrollo sostenible no como una doctrina o un modelo definido, sino como un conjunto de procesos de cambio abierto y equilibrios dinámicos y resilientes de permanente aprendizaje, que marcan las trayectorias de los sistemas socioecológicos. Las sociedades del siglo XXI se enfrentan a una gran transición socioeconómica-ecológica mediante una familia de transiciones a gran escala. Se perciben distintos escenarios para aspirar a la sostenibilidad global. Conocemos las tendencias actuales pero no sabemos el destino final: puede ser una evolución gradual o saltos en puntos de bifurcación imprevistos. Gobernar las grandes transiciones sociourbanas, técnico-económicas y político-institucionales en clave de sostenibilidad permitiría garantizar la coevolución entre los sistemas humanos y la biosfera, dando un nuevo sentido al progreso. Este libro profundiza en el análisis de la integración de los principios de la sostenibilidad que dan lugar a la opción social definida como desarrollo sostenible, especialmente desde un enfoque coevolutivo. En la parte primera del libro se analizan las fuerzas motrices que impulsan el cambio global y los procesos de insostenibilidad del modelo dominante. En la parte segunda se aborda la multidimensionalidad del paradigma sostenibilista y de la ciencia de la sostenibilidad, incorporando los nuevos indicadores que señalan la buena dirección de un tránsito sostenible. En la parte tercera se estudian las estrategias de cambio y las grandes transiciones de las sociedades modernas hacia un futuro común. La obra finaliza con una reflexión profunda sobre la coevolución del sistema humano y el sistema natural dentro del sistema global.

New Global Cities in Latin America and Asia Pablo Baisotti, 2022-04-19 *New Global Cities in Latin America and Asia: Welcome to the Twenty-First Century* proposes new visions of global cities and regions historically considered “secondary” in the international context. The arguments are not only based on material progress made by these metropolises, but also on the growing social difficulties experienced (e.g., organized crime, drug trafficking, slums, economic inequalities). The book illustrates the growth of cities according to these problems arising from the modernity of the new century, comparing Latin American and Asian cities. This book analyzes the complex relationships within cities through an interdisciplinary approach, complementing other research and challenging orthodox views on global cities. At the same time, the book provides new theoretical and methodological tools to understand the progress of “Third World” cities and the way of understanding “globality” in the 21st century by confronting the traditional views with which global cities were appreciated since the 1980s. Pablo Baisotti brings together researchers from various fields who provide new interpretative keys to certain cities in Latin

America and Asia.

Social, Political, and Religious Movements in the Modern Americas Pablo A. Baisotti, 2021-12-30 This volume explores several notable themes related to social, political, and religious movements in Latin America and offers insightful historical perspectives to understand national, regional, and global issues from the beginning of the twentieth century to the present day. This volume's collected chapters focus on the Latin American society and are divided into three sections. The first section, Social, presents some cultural, demographic, and urban changes that have occurred with increasing frequency in Latin America from the early twentieth century onward. The second section, Political, shows migratory, political, and identity movements that in recent decades have re-emerged with force. Finally, the third section, Religious, analyzes various Latin American religious visions with their particular characteristics. From the religious hegemony of Catholicism, a change in the religious panorama in the last decades can be seen intermingled with politics, history, and society.

Affordable Housing in the Urban Global South Jan Bredenoord, Paul Van Lindert, Peer Smets, 2014-06-05 The global increase in the number of slums calls for policies which improve the conditions of the urban poor, sustainably. This volume provides an extensive overview of current housing policies in Asia, Africa and Latin America and presents the facts and trends of recent housing policies. The chapters provide ideas and tools for pro-poor interventions with respect to the provision of land for housing, building materials, labour, participation and finance. The book looks at the role of the various stakeholders involved in such interventions, including national and local governments, private sector organisations, NGOs and Community-based Organisations.

Espacio público y movilidad en Culiacán Juan Carlos Rojo Carrascal, 2022-07-27 Este libro es producto de un proceso de investigación en torno a la transformación del espacio público en las ciudades durante las décadas más recientes. En especial, el análisis de dicho fenómeno se enfoca a la ciudad de Culiacán, en la que los habitantes —sobre todo aquellos que por gusto o por obligación— prescinden del uso del automóvil, han visto afectados sus hábitos de movilidad. El autor hace énfasis en la necesidad de que el espacio público recupere su categoría como lugar de encuentro en las ciudades. El texto aborda la crisis social y ambiental que enfrenta la humanidad, cada vez más urbanizada, y el creciente modelo de ciudad que se encuentra cada vez más lejos de la sostenibilidad, a la vez que ofrece una postura crítica y propone la urgencia de una nueva transformación de las ciudades hacia el camino de la sostenibilidad urbana. El siglo XX nos heredó un deterioro inédito, no solo de las ciudades sino del planeta entero. La intensificación de los efectos del cambio climático, la crisis energética, el deterioro ambiental, la crisis económica, las pandemias, migraciones y conflictos políticos, son evidencias palpables de nuestra vulnerabilidad. No obstante, el autor asegura que, aunque las ciudades provocan gran parte del problema, también podrían ser el camino de la solución.

CUADERNO URBANO 21 - ESPACIO, CULTURA, SOCIEDAD Eudene,2021-08-12 CUADERNO URBANO es una publicación científica con arbitraje internacional dirigida a la difusión de artículos y ensayos que se ocupan desde las disciplinas científicas a la cuestión urbana -en el sentido más amplio del término-, combinando trabajos de caracteres empíricos, teóricos y ensayísticos que den cuenta de problemáticas locales, regionales y universales. La intención de la publicación es favorecer y promover la generación de ensayos y artículos de jóvenes investigadores con las reglas del arbitraje científico, colaborando en la producción editorial de sus ideas, como también divulgar el aporte de científicos ya consagrados en su especialidad disciplinar. Se estudia cómo evolucionaron paralelamente las desigualdades socioeconómicas y los niveles de segregación residencial socioeconómica (SRS) en la Aglomeración Gran Buenos Aires (AGBA) en dos períodos de signo político y económico opuesto —neoliberalismo primero, progresismo después— comprendidos entre 1991-2010. El trabajo se apoya en un marco teórico que vincula desigualdades socioeconómicas, SRS y renta del suelo. Los resultados de la investigación muestran para el caso de la AGBA evidencias favorables a la hipótesis de que mejoras en la distribución de la riqueza tendrían un efecto positivo en términos de optimizar la mezcla de estratos socioeconómicos en el espacio residencial. Es además el primer estudio que aporta estimaciones sobre niveles de SRS en la AGBA sobre la base de datos del último censo de 2010. Propone una metodología original para lidiar con los problemas derivados del uso de zonas censales para medir la segregación residencial.

Bases para el diseño de la vivienda de interés social Pérez Pérez, Alex Leandro,2013-04-26 El presente libro muestra la vivienda de interés social (VIS) como un producto cuyo campo de acción fundamental es el diseño de la vivienda como espacio habitable, pero a su vez en relación con su entorno inmediato y con la ciudad, y precisamente en estas tres escalas se agrupan las variables objeto de estudio. Como cualquier investigación dentro del campo del diseño, combina métodos científicos de la investigación cuantitativa tradicional con otros propios de la investigación cualitativa como el estudio de casos.
