Las mujeres en el sistema educativo II Boix Teruel, Montserrat, Savall Ceres, Juana, Vaillo Rodríguez, María, 2009 El objetivo de esta colección es conocer y difundir datos actualizados sobre la presencia de las mujeres en la educación, sin desvincular el presente del pasado, resaltando interpretaciones que muestran libertad femenina y aportando información sobre las numerosas mujeres que, a lo largo de la historia y en el presente, han realizado interesantes aportaciones a la pedagogía, la mayoría de ellas con un claro origen en la propia práctica educativa. La experiencia es, pues, un referente principal dentro de sus ideas y apuestas pedagógicas. En la actualidad, este modo de hacer está presente entre muchas maestras y profesoras cuya prioridad es prestar atención a la singularidad de cada niño y de cada niña, dando espacio a sus deseos de saber y crecer y tomando como guía la educación primera que recibimos de cada madre. Hoy esta práctica docente es cada vez más sensible gracias a la incorporación de profesoras a todos los niveles del sistema educativo, a la presencia cada vez más numerosa de alumnas en las aulas y a la existencia de hombres que están reconociendo ya el saber de las mujeres.

Nine Centuries of Spanish Literature (Dual-Language) Seymour Resnick, Jeanne Pasmantier, 2012-10-31 This rich sampling of Spanish poetry, prose, and drama includes more than seventy selections from the works of more than forty writers, from the anonymous author of the great medieval epic The Poem of the Cid to such 20th-century masters as Miguel de Unamuno. The original Spanish text of each work appears with an excellent English translation on the facing page. The anthology begins with carefully selected passages from such medieval classics as The Book of Good Love by the Archpriest of Hita and Spain's first great prose work, the stories of Count Lucanor by Juan Manuel. Works by writers of the Spanish Renaissance follow, among them poems by the Marqués de Santillana and excerpts from the great dialogue novel La Celestina by Fernando de Rojas. Spain's Golden age, ca. 1550-1650, an era which produced its great writers, is represented by the mystical poems of St. Teresa, passages from Cervantes' Don Quixote and scenes from Tirso de Molina's The Love-Rogue, the drama that introduced the character of Don Juan to the world, along with other well-known works of the period. A cavalcade of stirring poems, plays and prose selections represent Spain's rare literary achievements of the 18th, 19th and 20th centuries. The translations were chosen for their accuracy and fidelity to the originals. Among the translators are Lord

Byron, Henry Wadsworth Longfellow, Edward Fitzgerald and John Masefield. As a treasury of masterly writing, as a guide for the student who wants to improve his or her language skills and as a compact survey of Spanish literature, this excellent anthology will provide hours of pleasure and fruitful study.

McGraw-Hill Encyclopedia of World Drama McGraw-Hill, inc,1984 Ranging from the earliest drama to the theater of the 1980's this encyclopedia includes coverage of national drama and theater around the world, theater companies, and musical comedy. Arrangement of the 1,300 entries is alphabetically by name or subject with nearly 950 of these devoted to individual playwrights and their works.

Optimal Control and Estimation Robert F. Stengel,1994-09-20 An excellent introduction to optimal control and estimation theory and its relationship with LQG design. . . . invaluable as a reference for those already familiar with the subject. — Automatica. This highly regarded graduate-level text provides a comprehensive introduction to optimal control theory for stochastic systems, emphasizing application of its basic concepts to real problems. The first two chapters introduce optimal control and review the mathematics of control and estimation. Chapter 3 addresses optimal control of systems that may be nonlinear and time-varying, but whose inputs and parameters are known without error. Chapter 4 of the book presents methods for estimating the dynamic states of a system that is driven by uncertain forces and is observed with random measurement error. Chapter 5 discusses the general problem of stochastic optimal control, and the concluding chapter covers linear time-invariant systems. Robert F. Stengel is Professor of Mechanical and Aerospace Engineering at Princeton University, where he directs the Topical Program on Robotics and Intelligent Systems and the Laboratory for Control and Automation. He was a principal designer of the Project Apollo Lunar Module control system. An excellent teaching book with many examples and worked problems which would be ideal for self-study or for use in the classroom. . . . The book also has a practical orientation and would be of considerable use to people applying these techniques in practice. — Short Book Reviews, Publication of the International Statistical Institute. An excellent book which guides the reader through most of the important concepts and techniques. . . . A useful book for students (and their teachers) and for those practicing engineers who require a comprehensive reference to the subject. — Library Reviews, The Royal Aeronautical Society.
