The Whole World Was Watching Robert Edelman, Christopher Young, 2019-12-10 In the Cold War era, the confrontation between capitalism and communism played out not only in military, diplomatic, and political contexts, but also in the realm of culture—and perhaps nowhere more so than the cultural phenomenon of sports, where the symbolic capital of athletic endeavor held up a mirror to the global contest for the sympathies of citizens worldwide. *The Whole World Was Watching* examines Cold War rivalries through the lens of sporting activities and competitions across Europe, Asia, Africa, Latin America, and the U.S. The essays in this volume consider sport as a vital sphere for understanding the complex geopolitics and cultural politics of the time, not just in terms of commerce and celebrity, but also with respect to shifting notions of race, class, and gender. Including contributions from an international lineup of historians, this volume suggests that the analysis of sport provides a valuable lens for understanding both how individuals experienced the Cold War in their daily lives, and how sports culture in turn influenced politics and diplomatic relations.

Kolodko, 2021-04-09 Humanity faces epoch-making challenges arising from the convergence of demographic, social, economic, ecological and political megatrends, which are additionally superimposed by the fatal COVID-19 pandemic and the new Cold War. Traditional economic thought is not able to cope with them. In the conditions of irreversible globalization, these challenges are met by the original concept of a new pragmatism – a peculiar interface between economic theory and practical economic policy for sustainable development. Grzegorz W. Kolodko, an outstanding economist with a world-wide reputation, a public intellectual, successful politician and a globetrotter who has explored the world – clearly writes what is happening in the economy and why, on its links with society and politics, environment, security, culture and technology. The work devotes due attention to the rise of China and the consequences of its global expansion. The unique interdisciplinary approach to the issues discussed makes this book a fascinating read for all professionals interested in the future of a rapidly changing world.

The Origins of the Second World War Esmonde Manning Robertson, 1971-01-21 This collection of essays deals with some of the problems posed by the origins of World War II. Was World War II part of a developing world crisis or should it be seen purely in a European context? Before 1960 general historical opinion held that World War I 'broke out', World War II was 'precipitated'. Fritz Fischer's and A.J.P Taylor's challenge to this thesis caused a controversy which made it impossible to isolate the causes of the two World Wars. Whether Hitler was an opportunist or a planner (or both) is discussed in a series of articles, the introduction to which considers the irrational element in Hitler's character and the contradictions in his policy. One author presents Hitler's attitude towards Japan and offers reasons why there was so little collusion between Germany and Japan before the end of 1937. Readers are introduced to the ideas of both American and Japanese writers as to the causes of the 'China Incident' of July 1937 and its influence on European politics. Other topics presented include Mussolini's role as an 'icebreaker' for Hitler; Chamberlain's policy of appeasement; the Rome Agreements of 1935 which caused a rift between Britain and France over Ethiopia; Hitler's attitude towards Japan; Roosevelt's movement of the U.S. Fleet; the defeat of France; the Japanese occupation of Indo-China; and other key issues. A plea for historians of the former belligerents to meet periodically in small groups to discuss research concludes this volume.
