China's New Era Annie Luman Ren, Ben Hillman, 2024-06-06 According to Communist Party discourse, China's 'New Era' began when Xi Jinping was anointed Party boss in 2012. The shape of this New Era became eminently clear in 2023 when Xi commenced his third five-year term as General Secretary of the Party, a fortification of one-man authoritarian rule unprecedented in post-Mao China. Under Xi, the Party has expanded its influence over government, the economy and society. The Party-State is now more Party than State. The year 2023 saw other 'new eras' for China as well. Despite initial optimism sparked by the end of COVID-19 restrictions in late 2022, the Chinese economy in 2023 was buffeted by continuing property sector woes, record unemployment, and an unfolding local government debt crisis. Globally, China adopted a series of new and ambitious diplomatic initiatives to woo the Global South and amplify its voice on the world stage. The China Story Yearbook 2023: China's New Era provides informed perspectives on these and other important stories that will resonate for years to come.

China & ANU William Sima, 2015-12-18 The Pacific War and its aftermath radically transformed Australian perceptions of what was then called the 'Near North'. Many recognised that in the postwar world Australia's strategic interests and economic fortunes called for a new understanding of Asia and the Pacific. China loomed large in these calculations. Based on extensive research and featuring rare archival documents and photographs, China & ANU introduces the diplomats, adventurers and scholars who contributed to Australia's engagement with China, the 'Chinese Commonwealth' and our region from the 1940s-1950s. In particular, this book focusses on the interconnection between Australia's first diplomat-scholars in China and the founding of Chinese Studies at the newly established Australian National University.

China in Australasia James Beattie, Richard Bullen, Maria Galikowski, 2019-04-18 Drawing on expertise in art history, exhibition studies and cultural studies as well as politics and international relations, China in Australasia presents significant new perspectives on the role of art in the cultural diplomacy of the People's Republic of China. The book tells the forgotten story of the loan, exchange, and gifting of Chinese art, museum exhibitions—and the use of Chinese arts more broadly—in growing diplomatic relations with Australia and New Zealand, from 1949 to the present day. Its scope includes pre-modern,

modern and contemporary sculpture, painting and peasant art, as well as ancient artefacts, performance arts and gardens. In considering the geopolitical connections opened by the arts, this book presents new insights into some of the ways in which China, often in conjunction with local supporters, sought to present itself to the people of Australia and New Zealand. It also considers how, for their part, New Zealanders and Australians worked to expand understandings of their powerful northern neighbour within changing political contexts. The first of its kind, this book-length interdisciplinary study of Chinese soft diplomacy in Australasia will be invaluable to students and scholars of Chinese studies, cultural diplomacy, museum studies and art history.

Female Chinese Bankers in the Asia Pacific Wai-wan Vivien Chan, 2020-09-01 This book explores the simultaneous Asianisation and feminisation of mid-level management in the financial services sector in world and global cities in the Asia-Pacific. Chan draws on 50 in-depth interviews with ethnically Chinese female professionals working in middle or upper management positions in Sydney, Hong Kong, Shanghai and four other cities in Australia and China. She analyses the interplay between geographical location, gender and career mobility. Growing numbers of transnational Chinese live and work in major cities in developed countries. In this context, a new social, economic ecosystem is being created for and by female professionals working in an elite sector of the service industry across the Asia-Pacific region. Chan examines the nature of this ecosystem through an examination of the lives and work of such women – their role in forming multinational networks in financial service firms, their collective work situation, their daily challenges, and their coping strategies in the workplace and at home. A compelling comparative study, which will be of great interest to scholars and students looking at the role of gender and ethnicity in globalisation.

Justice Flora Sapio, Susan Trevaskes, Sarah Biddulph, Elisa Nesossi, 2017-07-27 Claims about a pursuit of justice weave through all periods of China's modern history. But what do authorities mean when they refer to 'justice' and do Chinese citizens interpret justice in the same way as their leaders? This book explores how certain ideas about justice have come to be dominant in Chinese polity and society, and how some conceptions of justice have been rendered more powerful and legitimate than others. This book's focus on 'how' justice works incorporates a concern about the processes that lead to the making, un-making and re-making of distinct conceptions of justice. Investigating the processes and frameworks through which certain ideas about justice have come to the political and social forefront in China today, this innovative work explains how these ideas are articulated through spoken performances and written expression by both the party-state and its citizenry.

China's Digital Nationalism Florian Schneider, 2018-08-16 Nationalism, in China as much as elsewhere, is today adopted, filtered, transformed, enhanced, and accelerated through digital networks. And as we have increasingly seen, nationalism in digital spheres interacts in complicated ways with nationalism on the ground. If we are to understand the social and political

complexities of the twenty-first century, we need to ask: what happens to nationalism when it goes digital? In *China's Digital Nationalism*, Florian Schneider explores the issue by looking at digital China first hand, exploring what search engines, online encyclopedias, websites, hyperlink networks, and social media can tell us about the way that different actors construct and manage a crucial topic in contemporary Chinese politics: the protracted historical relationship with neighbouring Japan. Using two cases, the infamous Nanjing Massacre of 1937 and the ongoing disputes over islands in the East China Sea, Schneider shows how various stakeholders in China construct networks and deploy power to shape nationalism for their own ends. These dynamics provide crucial lessons on how nation states adapt to the shifting terrain of the digital age and highlight how digital nationalism is today an emergent property of complex communication networks.

China's Changing Economy Curtis Andressen, 2016-05-20 One of the most dramatic events in the global economy over the past few decades has been the rise of China as a global economic power. From humble beginnings in the late 1970s, the policy shift in China from a planned to market economy has led to economic growth of tremendous speed. This book examines the changes taking place in China's economy today and the impacts of these changes in China and abroad. The central theme is that the rapid economic growth has come at a cost, as many problems have emerged as a result in China's economy and society, including a dramatic rich-poor gap, labour issues, problems in the banking sector and severe inflation in the cost of housing, as well as challenges with respect to China's external trade. The Chinese government recognizes these problems and is taking steps to rebalance its economy and society. The book takes a political economy perspective in order to investigate the interplay between the political system in China and the way in which the economy is structured, and the manner in which economic changes take place. Demonstrating that in order for China to achieve sustained economic growth and social improvement it must undertake serious policy changes, it also highlights that if countries are going to deal with China in a stable and productive manner, a thorough understanding of key contemporary developments in that country is vital. Covering a range of the most pertinent issues facing China today, this book will be of interest to students and scholars of Chinese Economics, Economic Development and Political Economy.

Making China Modern Klaus Mühlhahn, 2019-01-14 Klaus Mühlhahn situates modern China in the nation's long, dynamic tradition of overcoming adversity and weakness through creative adaptation—a legacy of crisis and recovery that is apparent today in China's triumphs but also in its most worrisome trends. Mühlhahn's panoramic survey rewrites the history of modern China for a new generation.

The Shortest History of China Linda Jaivin, 2021-09-28 Journey across epic China—through millennia of early innovation to modern dominance. The Shortest History books deliver thousands of years of history in one riveting, fast-paced read. As we enter the “Asian century,” China demands our attention for being an economic powerhouse, a beacon of rapid modernization, and an assertive geopolitical player. To understand the nation behind the headlines, we must take in its

vibrant, tumultuous past—a story of “larger-than-life characters, philosophical arguments and political intrigues, military conflicts and social upheavals, artistic invention and technological innovation.” The Shortest History of China charts a path from China’s tribal origins through its storied imperial era and up to the modern Communist Party under Xi Jinping—including the rarely told story of women in China and the specters of corruption and disunity that continue to haunt the People’s Republic today. A master storyteller and exacting historian, Linda Jaivin distills this vast history into a short, riveting account that today’s globally minded readers will find indispensable. The Shortest History books deliver thousands of years of history in one riveting, fast-paced read. #1 Bestseller in Student Travel Guides

Unequal China Wanning Sun,Yingjie Guo,2013 This book offers a comprehensive account of inequality in China from an interdisciplinary perspective. It both draws on, and speaks to, the existing body of literature that is generated mainly in the fields of economics and sociology, whilst extending its scope to also examine the political, social, moral and cultural dimensions of inequality. Each chapter addresses the question of inequality from a specific context of research, including housing, health care, social welfare, education, migration, land distribution, law, gender and sexuality.

Contradiction Linda Jaivin,Esther Sunkung Klein,Sharon Strange,2022-05-10 In the second year of the COVID-19 pandemic, the many facets of crisis—the theme of last year’s China Story Yearbook—fractured into pictures of contradiction throughout Chinese society and the Chinese sphere of influence. Contradiction: the ancient Chinese word for the concept holds within it the image of an unstoppable spear meeting an impenetrable shield. It describes a wide range of phenomena that English might express with words like conflict, clash, paradox, incongruity, disagreement, rebuttal, opposition, and negation. This year’s Yearbook presents stories of action and reaction, of motion and resistance. The theme of contradiction plays out in different ways across the different realms of society, culture, environment, labour, politics, and international relations. Great powers do not necessarily succeed in dominating smaller ones. The seemingly irresistible forces of authoritarianism, patriarchy, and technological control come up against energised and surprisingly resilient means of resistance or cooptation. Efforts by various authorities to establish monolithic narrative control over the past and present meet a powerful insistence on telling the story from an opposite angle. The China Story Yearbook: Contradiction offers an accessible take on this complex and contradictory moment in the history of China and of the world.

New Mentalities of Government in China David Bray,Elaine Jeffreys,2016-01-13 China continues to transform apace, flowing from the forces of deregulation, privatization and globalization unleashed by economic reforms which began in late 1978. The dramatic scope of economic change in China is often counterposed to the apparent lack of political change as demonstrated by continued Chinese Communist Party (CCP) rule. However, the ongoing dominance of the CCP belies the fact that much has also changed in relation to practices of government, including how authorities and citizens interact in the

management of daily life. *New Mentalities of Government in China* examines how the privatization and professionalization of 'public' service provision is transforming the nature of government and everyday life in the People's Republic of China (PRC). The book addresses key theoretical questions on the nature of government in China and documents the emergence of a range of 'new mentalities of government' in China. Its chapters focus on areas such as clinical trials, conceptualizing government, consumer activity, elite philanthropy, lifestyle and beauty advice, public health, social work, volunteering; and urban and rural planning. Offering a topical examination of shifting modes of governance in contemporary China, this book will appeal to scholars in the fields of anthropology, history, politics and sociology.

China's Power and Asian Security Mingjiang Li, Kalyan M. Kemburi, 2014-11-27 One of the most significant factors for contemporary international relations is the growth of China's economic, military, and political power. Indeed, few analysts would dispute the observation that China's power has strongly influenced the structure of the international system, major-power strategic relations, international security, the patterns of trans-border economic activities, and most importantly, the political and security dynamics in Asia in the twenty-first century. This book maps the growth of China's political, economic, and military capabilities and its impact on the security order in Asia over the coming decades. While updating the emerging power dimensions and prevailing discourse, it provides a nuanced analysis of whether the growth of Chinese power is resulting in Beijing becoming more assertive, or even aggressive, in its behavior and pursuit of national interests. It also examines how the key Asian countries perceive and react to the growth of China's power and how US rebalancing would play out in the context of Beijing's political, economic, and military power. *China's Power and Asian Security* will be of huge interest to student and scholars of Asian politics, Chinese politics, security studies and international security and international relations more generally.

China and the Global Media Landscape Gabriele Balbi, Jiang Fei, Giuseppe Richeri, 2019-07-25 In the last decade, the Chinese media have imposed themselves in the global arena and have started to become a reference point, in business and cultural terms, for other national media systems. This book explores how the global media landscape was changed by this revolutionary trend, and why and how China is now playing a key role in guiding it. It is, on the one hand, a book on how the Chinese media system continues to take inspiration and to be shaped (or remapped) by American, European and Asian media companies, and, on the other, a volume on the ways in which recent Chinese media's "going out" strategy is remapping the global media landscape. Organised into two sections, this book has eight chapters written by American, Chinese and European scholars. Focusing on different markets (such as the movie industry, the press, broadcasting, and the Internet), different regions and different actors (from Donald Trump to the Tanzania-Zambia Railway to journalists), this book provides a fresh interpretation on the main changes China has brought to the global media landscape.

Environmental Pollution in China Daniel K. Gardner, 2018 When Deng Xiaoping introduced market reforms in the late

1970s, few would have imagined what the next four decades would bring. China's GDP has grown on average nearly 10 percent annually since, and its economy is now the second largest in the world. Forty years ago, the Flying Pigeon bicycle ruled the roads; today, China is the world's largest car market. And if forty years ago you looked out across the Huangpu River from the Bund in Shanghai, you would have seen farmland and a few warehouses and wharves; now you see the stunning, futuristic cityscape of Pudong. The material progress of the past forty years has been staggering -- a source of pride for the Chinese people, as well as a source of legitimacy for the ruling Chinese Communist Party. But that progress has come at great cost: the extreme pollution of China's air, water, and soil has taken a stark toll on human health. In *Environmental Pollution in China: What Everyone Needs to Know(R)*, Daniel K. Gardner examines the range of factors -- economic, social, political, and historical -- contributing to the degradation of China's environment. He also covers the public response to the widespread pollution; the measures the government is taking to clean up the environment; and the country's efforts to lessen its dependence on fossil fuels and develop clean sources of energy. Concise, accessible, and authoritative, this book serves as an ideal primer on one of the world's most challenging environmental crises.

China's Peasants and Workers Beatriz Carrillo, David S. G. Goodman, 2012 This unique and fascinating book explores three decades of economic change in China and the consequent transformation of class relations and class-consciousness in villages and in the urban workplace. The expert contributors illustrate how the development of the urban economic environment has led to changes in the urban working class, through an exploration of the workplace experiences of rural migrant workers, and of the plight of the old working class in the state owned sector. They address questions on the extent to which migrant workers have become a new working class, are absorbed into the old working class, or simply remain as migrant workers. Changes in class relations in villages in the urban periphery _ where the urbanization drive and in-migration has led to a new local politics of class differentiation _ are also raised. Presenting new, original field research detailing social and socio-economic change in China, this book will prove invaluable to scholars, researchers and postgraduate students with an interest Asian studies, public policy, regional and urban studies, political science or sociology.

Chinese Public Diplomacy Falk Hartig, 2015-08-27 This book presents the first comprehensive analysis of Confucius Institutes (CIs), situating them as a tool of public diplomacy in the broader context of China's foreign affairs. The study establishes the concept of public diplomacy as the theoretical framework for analysing CIs. By applying this frame to in-depth case studies of CIs in Europe and Oceania, it provides in-depth knowledge of the structure and organisation of CIs, their activities and audiences, as well as problems, challenges and potentials. In addition to examining CIs as the most prominent and most controversial tool of China's charm offensive, this book also explains what the structural configuration of these institutes can tell us about China's understanding of and approaches towards public diplomacy. The study demonstrates that, in contrast to their international counterparts, CIs are normally organised as joint ventures between international and

Chinese partners in the field of education or cultural exchange. From this unique setting a more fundamental observation can be made, namely China's willingness to engage and cooperate with foreigners in the context of public diplomacy. Overall, the author argues that by utilizing the current global fascination with Chinese language and culture, the Chinese government has found interested and willing international partners to co-finance the CIs and thus partially fund China's international charm offensive. This book will be of much interest to students of public diplomacy, Chinese politics, foreign policy and international relations in general.

Disturbances in Heaven Ivan Franceschini, Kevin Lin, Nicholas Loubere, 2017-02-16 Labour and civil society are two fundamental components of international discussions concerning China today. Whether it is the arrest of labour activists or rights lawyers, the adoption of new industrial policies, or the passing of draconian rules on non-governmental organisations, the events occurring in these areas in China often make global headlines. At the same time, in spite of the grave challenges for workers and activists, the Chinese labour movement is witnessing significant developments, with the occurrence of some of the largest strikes in decades. All of this calls for more serious analysis from both scholars and practitioners, as well for critical engagement with a broader global audience interested in forging international solidarity. It is with these aims in mind that we have compiled this *Made in China Yearbook 2016: Disturbances in Heaven*, a collection of original articles by both scholars and activists, analysing the most important trends in Chinese labour and civil society over the past year. With its unique blend of in-depth scholarly work written in a direct, accessible style, this volume will allow readers to situate events and policies related to Chinese labour and civil society in a wider context, and serve as an indispensable reference book for international activists, practitioners, and policy-makers.
