China and the Global Business Revolution P. Nolan,2001-07-26 China has used industrial policies to try to build large corporations that can challenge those based in more advanced countries. By the late 1990s the operational mechanism of China's large firms had seen large advances. Simultaneously, a revolution has taken place in global business systems, and China's large firms are even further behind the global leaders than when they began their reforms. The WTO will require China to operate rapidly on the 'global playing field' in competition with the world's leading corporations, and this increased gap presents a deep challenge for China's business and political leaders. Peter Nolan presents here the first in-depth case studies of China's large corporations under economic reform, combined with systematic benchmarking of these firms against the world's leading corporations. The book is an unrivalled resource of information on Chinese businesses, and also leads the reader to consider the impact of China's response to its current challenges not only on China itself, but on the wider global economy.

Kookkurrenz, Kontrast, Profil Sascha Diwersy,2012-07-04 Gegenstand des vorliegenden Beitrags ist die Entwicklung eines korpusinduzierten Ansatzes für den Bereich der lexikalischen Semantik. Wir gehen aus von einer grundlegenden Unterscheidung zwischen deduktiv-taxonomischem und induktiv-systemischem Kollokationsbegriff und ordnen dabei das Konzept des kombinatorischen Profils in einen methodisch-analytischen Rahmen ein, der sowohl anhand einer innersprachlich orientierten als auch einer sprachvergleichend angelegten Fallstudie zur lexikalisch-syntaktischen Kombinatorik von handlungsdispositionsbezeichnenden Substantiven im Französischen und im Deutschen umgesetzt wird.

Coopetition Saïd Yami,Sandro Castaldo,Battista Dagnino,Frédéric Le Roy,2010-01-01 This book provides a diverse set of perspectives on the topic. It is very useful reading for anyone interested in understanding coopetition in multiple contexts. Devi R. Gnyawali, Virginia Tech, US As an original strategic management perspective, coopetition has hitherto been underexploited in analysing contemporary firm strategies and behaviours and, more generally, managerial practices and

processes. This innovative book provides both theoretical insights and empirical evidence on coopetition. Coopetition shows great interpretive and normative potential and is likely to be an increasingly important tool. This book is one of the first key contributions in shaping and systematizing a novel coopetition agenda in the field of strategy. The book argues that coopetition is neither an extension of competition theory, nor an extension of cooperative theory. It is in fact a specific and distinctive research object, which calls for dedicated theoretical investigation to develop questions for theory, method, and managerial practice. This book provides both practitioners and academic scholars with a milestone that brings together an active community of researchers expressly mobilized around the creative in-depth scrutiny of coopetition. It will greatly appeal to researchers, scholars, and graduate students of management, business strategy competitive dynamics, and international business, as well as practitioners such as managers and consultants.
