Loterías Roberto Garvía,Roberto Garvía Soto,2008 Esta investigación analiza el desarrollo histórico del mercado de loterías en España. La sociología clásica, de la misma manera que la ciencia económica, ha considerado el juego de la lotería como ejemplo de comportamiento irracional. La sociología funcionalista y de tradición marxista ha seguido esta tradición, entendiendo que el consumo de lotería está motivado por sentimientos de frustración o desesperación. La nueva sociología económica nos permite examinar el juego de la lotería desde una perspectiva diferente y considerar la medida en que las redes sociales pueden explicar pautas de consumo.
