Cruisicology David Cashman, Philip Hayward, 2020-10-05 Since the 1990s the cruise industry has become one of the largest employers of musicians in the world. Thousands of professional musicians work on cruise ships daily, entertaining millions of passengers. *Cruisicology: The Music Culture of Cruise Ships* provides the first in-depth account of the culture and the industrial determinants of cruise ship music. Based on interviews with working musicians and coauthor David Cashman's experience as a cruise ship musician, this book investigates how music is organized and made onboard a cruise ship. David Cashman and Philip Hayward study the working life of musicians, why and how corporate shipping lines include music onboard their vessels, the history of musicians on passenger shipping, and the likely future directions of musical entertainment within the industry. Cashman and Hayward illustrate the positive and negative experience of artists making music every day in confined spaces with close proximity to their audiences.

**Outside the Jukebox** Scott Bradlee, 2025-05-01 From the creator of the sensation Postmodern Jukebox -- with millions of fans globally -- comes an inspirational memoir about discovering what you love and turning it into a creative movement. With student loan debt piling up and no lucrative gigs around the corner, Scott Bradlee found himself in a situation all too familiar to struggling musicians and creative professionals, unsure whether he should use the little income he had to pay his rent or to avoid defaulting on his loans. It was under these desperate circumstances that Bradlee began experimenting, applying his passion for jazz, ragtime, and doo wop styles to contemporary hits by singers like Macklemore and Miley Cyrus--and suddenly an idea was born. Today, Postmodern Jukebox -- the rotating supergroup devoted to period covers of pop songs, which Bradlee created in a basement apartment in Queens, New York--is a bona fide global sensation, having collected more than three million subscribers on YouTube while selling out major venues around the world and developing previously unknown talent into superstar singers. From its Etta James-inspired rendition of Radiohead's Creep to its New Orleans jazz interpretation of Meghan Trainor's All About That Bass, the group has established a sound like no other, crafting hits as exquisitely sublime as they are humorously absurd. But it wasn't always as easy as the YouTube videos make it look. As he worked to establish Postmodern Jukebox, Bradlee struggled through the obstacles that every self-employed artist or entrepreneur with a vision faces: how to collaborate successfully on teams with divergent visions, how to outrun the naysayers, how to chase the next innovation when your reputation makes others start to pigeonhole you, and so many of the

other challenges lining the path to success. Taking readers through the false starts, hilarious backstage antics, and unexpected breakthroughs of Bradlee's journey from a lost musician to a musical kingmaker -- and presenting all the entrepreneurial insights he learned along the way -- *Outside the Jukebox* is an inspiring memoir about how one musician found his rhythm and launched a movement that would forever change our relationships to our favorite songs.

*Managing Projects in Africa* Project Management Journal,2013-01-30 This special issue of the Project Management Journal presents a collection of six articles on managing projects in Africa. Providing a window into the important project activity taking place there, these articles extend both the empirical and theoretical understanding of the African project context and contribute to improving practice. Each article makes a unique contribution to either our understanding of the African project context or project management in general, and sometimes to both. After an introduction to the African project context at the start of the 21st century, the articles explore: three different countries as well as multinational projects; for-profit, public sector, and development aid projects; infrastructure and information and communication technology; project governance as well as project management; and partnering challenges.

**Project Management and Engineering Research** José Luis Ayuso Muñoz,José Luis Yagüe Blanco,Salvador F. Capuz-Rizo,2017-03-06 This book gathers the best papers presented at the 19th International Congress on Project Management and Engineering, which was held in Granada, Spain in July 2015. It covers a range of project management and engineering contexts, including: civil engineering and urban planning, product and process engineering, environmental engineering, energy efficiency and renewable energies, rural development, information and communication technologies, safety, labour risks and ergonomics, and training in project engineering. Project management and engineering is taking on increasing importance as projects continue to grow in size, more stakeholders become involved, and environmental, organisational and technological issues become more complex. As such, this book offers a valuable resource for all professionals seeking the latest material on the changing face of project management.

**Teaching and Learning at Business Schools** Pär Mårtensson,Magnus Bild,2016-04-01 Business schools are facing ever increasing internationalization: students are far less homogenous than before, faculty members come from different countries, and teaching is carried out in second (or even third) languages. As a result business schools and their teachers wrestle with new challenges as these changes accelerate. *Teaching and Learning at Business Schools* brings together contributions from business school managers and educators involved in the International Teachers Programme; a faculty

development programme started by Harvard Business School more than 30 years ago and now run by a consortium of the London Business School, Manchester Business School, Kellogg, Stern School of Business, INSEAD, HEC Paris, IAE Aix-en-Provence, IMD, SDA Bocconi Milan and Stockholm School of Economics. The book tackles themes both within the classroom - teaching across different contexts and cultures - and outside the classroom - leading and developing business schools, designing and running programmes, developing faculty members. The authors provide direction, ideas and techniques for transforming business education that are accessible to everyone.

Project Management: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2016-06-09 Organizations of all types are consistently working on new initiatives, product lines, or implementation of new workflows as a way to remain competitive in the modern business environment. No matter the type of project at hand, employing the best methods for effective execution and timely completion of the task at hand is essential to project success. Project Management: Concepts, Methodologies, Tools, and Applications presents the latest research and practical solutions for managing every stage of the project lifecycle. Emphasizing emerging concepts, real-world examples, and authoritative research on managing project workflows and measuring project success in both private and public sectors, this multi-volume reference work is a critical addition to academic, government, and corporate libraries. It is designed for use by project coordinators and managers, business executives, researchers, and graduate-level students interested in putting research-based solutions into practice for effective project management.

**Molecular Descriptors for Chemoinformatics** Roberto Todeschini, Viviana Consonni, 2009-10-30 The number-one reference on the topic now contains a wealth of new data: The entire relevant literature over the past six years has been painstakingly surveyed, resulting in hundreds of new descriptors being added to the list, and some 3,000 new references in the bibliography section. Volume 1 contains an alphabetical listing of more than 3300 descriptors and related terms for chemoinformatic analysis of chemical compound properties, while the second volume lists over 6,000 references selected from 450 journals. To make the data even more accessible, the introductory section has been completely re-written and now contains several walk-through reading lists of selected keywords for novice users.

**Managing Networks in Project-Based Organisations** Stephen Pryke, 2017-07-05 The first book demonstrating how to apply the principles of social network analysis to managing complex projects This groundbreaking book gets project managers and students up to speed on state-of-the-art applications of social network analysis (SNA) for observing, analysing, and managing complex projects. Written by an expert at the leading edge of the SNA project management movement, it

clearly demonstrates how the principles of social network analysis can be used to provide a smarter, more efficient, holistic approach to managing complex projects. Project managers, especially those tasked with managing large, complex construction and engineering projects, traditionally have relied upon analysis and decision-making based upon hierarchical structures and vaguely defined project systems, much of which is borrowed from historic scientific management approaches. However, it has become apparent that a more sophisticated methodology is required for observing project systems and managing relationships with today's more knowledgeable and demanding clients. Social network analysis (SNA) provides just such an approach. Unfortunately, existing books on social network analysis are written primarily for sociologists and mathematicians, with little or no regard for the needs of project managers — until now. The first and only book of its kind, *Managing Networks in Project-Based Organisations*: Offers a framework and a fully-developed approach to applying SNA theory and methodologies to large, complex projects Describes highly effective strategies and techniques for managing the iterative and transient relationships between network-defining actor roles involved in the delivery of complex projects Uses numerous real-world examples and case studies of successful applications of SNA to large-scale construction and engineering projects around the world Draws on its author's decades of experience managing complex projects for demanding clients, as well as his extensive academic research in Project Management *Managing Networks in Project-Based Organisations* is an important working resource for project management professionals and consultants, especially those serving the construction and engineering industries. It is also an excellent text/reference for postgraduate students of project management and supply chain management, as well as academic researchers of project management.

East Central Europe in Exile Volume 1 Anna Mazurkiewicz, 2014-10-16 The East Central Europe in Exile series consists of two volumes which contain chapters written by both esteemed and renowned scholars, as well as young, aspiring researchers whose work brings a fresh, innovative approach to the study of migration. Altogether, there are thirty-eight chapters in both volumes focusing on the East Central European émigré experience in the nineteenth and twentieth centuries. The first volume, *Transatlantic Migrations*, focuses on the reasons for emigration from the lands of East Central Europe; from the Baltic to the Adriatic, the intercontinental journey, as well as on the initial adaptation and assimilation processes. The second volume is slightly different in scope, for it focuses on the aspect of negotiating new identities acquired in the adopted homeland. The authors contributing to *Transatlantic Identities* focus on the preservation of the East Central European identity, maintenance of contacts with the "old country", and activities pursued on behalf of, and for the sake of, the abandoned homeland. Combined, both volumes describe the transnational processes affecting East Central European

migrants.
