A Vindication of the Redhead Brenda Ayres, Sarah E. Maier, 2021-12-14 A Vindication of the Redhead investigates red hair in literature, art, television, and film throughout Eastern and Western cultures. This study examines red hair as a signifier, perpetuated through stereotypes, myths, legends, and literary and visual representations. Brenda Ayres and Sarah E. Maier provide a history of attitudes held by hegemonic populations toward red-haired individuals, groups, and genders from antiquity to the present. Ayres and Maier explore such diverse topics as Judeo-Christian narratives of red hair, redheads in Pre-Raphaelite paintings, red hair and gender identity, famous literary redheads such as Anne of Green Gables and Pippi Longstocking, contemporary and Neo-Victorian representations of redheads from the Black Widow to The Girl with the Dragon Tattoo, and more. This book illuminates the symbolic significance and related ideologies of red hair constructed in mythic, religious, literary, and visual cultural discourse.

SuperPower: The Ability to Fly or to Become Invisible: The Golden Eagle Has Yielded (Book #3) Roger E Pedersen, 2023-11-11 The Third Book of the SuperPower Series "SuperPower The Ability to Fly or to Become Invisible: The Golden Eagle has Yielded" begins at the memorial service for the Steele brothers. The Martin twins and their paramours pay their respects to their adversaries who died in front of them on their way to a life-time incarceration. Encountering the treachery and blatant lies from the Steele family, Myrena Gorgona a SuperPower SuperModel forms a new feminine SuperPower organization she calls the "Lemnian Deeds Federation." She opposes the two male dominated, operated SuperPower groups: the DODGE (Department of Defense Genetically Engineered) Initiative and the 'Golden Eagle' Organization. The Lemnian Deeds welcomes all SuperPowered individuals and non-SuperPower females as the non-SuperPower males survive as domesticated servants. -How does the DODGE Initiative and their adversary the 'Golden Eagle' Organization deal with Myrena Georgia and her new 'Lemnian Deeds' Federation? -Follow the new recruits of the 'Lemnian Deeds' Federation having new SuperPower abilities and experiences. -Does the old adage "the enemy of my enemy is my

friend" hold true?

Science and Art Antonio Sgamellotti, Brunetto Giovanni Brunetti, Costanza Miliani, 2020-02-24 Science and art are increasingly interconnected in the activities of the study and conservation of works of art. Science plays a key role in cultural heritage, from developing new analytical techniques for studying the art, to investigating new ways of preserving the materials for the future. For example, high resolution multispectral examination of paintings allows art historians to view underdrawings barely visible before, while the use of non-invasive and micro-sampling analytical techniques allow scientists to identify pigments and binders that help art conservators in their work. It also allows curators to understand more about how the artwork was originally painted. Through a series of case studies written by scientists together with art historians, archaeologists and conservators, *Science and Art: The Painted Surface* demonstrates how the cooperation between science and humanities can lead to an increased understanding of the history of art and to better techniques in conservation. The examples used in the book cover paintings from ancient history, Renaissance, modern, and contemporary art, belonging to the artistic expressions of world regions from the Far East to America and Europe. Topics covered include the study of polychrome surfaces from pre-Columbian and medieval manuscripts, the revelation of hidden images below the surface of Van Gogh paintings and conservation of acrylic paints in contemporary art. Presented in an easily readable form for a large audience, the book guides readers into new areas uncovered by the link between science and art. The book features contributions from leading institutions across the globe including the Metropolitan Museum of Art, New York; Art Institute of Chicago; Getty Conservation Institute; Opificio delle Pietre Dure, Firenze; National Gallery of London; Tate Britain; Warsaw Academy of Fine Art and the National Gallery of Denmark as well as a chapter covering the Thangka paintings by Nobel Prize winner Richard Ernst.

The Controversy of Renaissance Art Alexander Nagel, 2011-09 Sansovino successively dismantled and reconstituted the categories of art-making. Hardly capable of sustaining a program of reform, the experimental art of this period was succeeded by a new era of cultural codification in the second half of the sixteenth century. --

The Phenomenology of Paint Adam Geczy, 2025-05-29 Analyzing the different modes of appearance and application of the

most ubiquitous medium in art and ritual, this book examines the aesthetics, anthropology, ethnography and history of paint. The result is a clearly articulated account of both the materiality and phenomenology of paint, as substance and idea. Beginning with paint as ritual in prehistoric and ancient times, it discusses the provenance, politics and chemistry of pigments, the role of concealment and beautification as paint is applied to bodies, the stories and practices of hiding paint by artists, and efforts to isolate paint as an essential quantity, ending on the philosophical question as to whether paint is separable from colour. A phenomenology of paint is in many respects an ontology of the ways we seek to represent and mediate our existence: it is the medium for both covering (house paint, make-up) to revealing (art). By exploring paint in a multitude of roles, from bodily substances to chemical engineering, this study provides a fresh understanding of ritual and representation through this medium that reveals through covering.

The Art of Scripture The National Gallery, 2025-09-18 From the majesty of Genesis to the mystery of Revelation, the Bible contains some of the world's most powerful stories and sublime wisdom. It is also the inspiration for some of the greatest pictures ever painted. Adam and Eve in the Garden of Eden, Moses and the exodus from Egypt, Samson betrayed by Delilah, David slaying Goliath, the beauty of Bathsheba, the wisdom of Solomon: these are among the dramatic scenes and memorable characters in the Old Testament, portrayed here by artists such as Poussin, Rembrandt and Rubens. In the New Testament, the figure of Jesus takes centre stage, with his compelling parables and miracles depicted by artists such as Caravaggio, Duccio, El Greco, Raphael, Titian and Velazquez. Together, these words and paintings convey a profound sense of the sacred. Both may go back many hundreds of years, and yet they still have the power to move and inspire us today.

Artists' Letters Michael Bird, 2019-10-22 Artists' Letters is a treasure trove of carefully selected letters written by great artists, providing the reader with a unique insight into their characters and a glimpse into their lives. Arranged thematically, it includes writings and musings on love, work, daily life, money, travel and the creative process. On the theme of friendship, for example, letters provide evidence of a creative community between peers, with support and mutual appreciation that helps to dispel the myth of the artist as solitary genius. Letters between Vincent van Gogh and Paul Gauguin show an ongoing conversation and exchange of ideas. We see mutual admiration between Claude Monet and Berthe Morisot, and Picasso's quick notes to Jean Cocteau illustrate their closeness. Correspondence, some of which includes sketches and drawings, is reproduced with the transcript and some background and contextual information alongside. The book brings together a collection of treasures found in letters, which in our digital age are an increasingly lost art.
