Human-Inspired Computing and its Applications Alexander Gelbukh,Félix Castro Espinoza,Sofía N. Galicia-Haro,2014-11-05 The two-volume set LNAI 8856 and LNAI 8857 constitutes the proceedings of the 13th Mexican International Conference on Artificial Intelligence, MICA I 2014, held in Tuxtla, Mexico, in November 2014. The total of 87 papers plus 1 invited talk presented in these proceedings were carefully reviewed and selected from 348 submissions. The first volume deals with advances in human-inspired computing and its applications. It contains 44 papers structured into seven sections: natural language processing, natural language processing applications, opinion mining, sentiment analysis, and social network applications, computer vision, image processing, logic, reasoning, and multi-agent systems, and intelligent tutoring systems. The second volume deals with advances in nature-inspired computation and machine learning and contains also 44 papers structured into eight sections: genetic and evolutionary algorithms, neural networks, machine learning, machine learning applications to audio and text, data mining, fuzzy logic, robotics, planning, and scheduling, and biomedical applications.

The Poplar Genome Ilga Porth, Jaroslav Klápště, Athena McKown, 2024-05-08 This book is the first comprehensive compilation of research on state-of-the-art genomics on the most advanced model tree species including genome assemblies, insights into genomic structural features and methylation patterns, whole-genome resources used for population genomics and adaptation to climate, enabled breeding vs. classical genetics and traditional breeding, comparative genomics, and elucidations on functional genomics. The latest developments in the genomics of wood formation are particularly highlighted. Altogether, the book contains over 300 pages in over 15 chapters authored by globally reputed experts in the relevant fields of this tree crop's genomics research. This book is useful for students, teachers, and scientists in academia and governmental or private tree improvement agencies or companies interested in genetics, pathology, entomology, physiology, molecular genetics and breeding, in vitro culture and genetic engineering, land restoration, and agroforestry solutions.

Advances in Soft Computing Ildar Batyrshin, Alexander Gelbukh, Grigori Sidorov, 2021-10-20 The two-volume set LNAI 13067 and 13068 constitutes the proceedings of the 20th Mexican International Conference on Artificial Intelligence, MICAI 2021, held in Mexico City, Mexico, in October 2021. The total of 58 papers presented in these two volumes was carefully reviewed and selected from 129 submissions. The first volume, *Advances in Computational Intelligence*, contains 30 papers structured into three sections: - Machine and Deep Learning - Image Processing and Pattern Recognition - Evolutionary and Metaheuristic Algorithms The second volume, *Advances in Soft Computing*, contains 28 papers structured into two sections: - Natural Language Processing - Intelligent Applications and Robotics

Process Design Strategies for Biomass Conversion Systems Denny K. S. Ng, Raymond R. Tan, Dominic C. Y. Foo, Mahmoud M. El-Halwagi, 2016-02-08 This book covers recent developments in process systems engineering (PSE) for efficient resource use in biomass conversion systems. It provides an overview of process development in biomass conversion systems with focus on biorefineries involving the production and coproduction of fuels, heating, cooling, and chemicals. The scope includes

grassroots and retrofitting applications. In order to reach high levels of processing efficiency, it also covers techniques and applications of natural-resource (mass and energy) conservation. Technical, economic, environmental, and social aspects of biorefineries are discussed and reconciled. The assessment scales vary from unit- to process- and life-cycle or supply chain levels. The chapters are written by leading experts from around the world, and present an integrated set of contributions. Providing a comprehensive, multi-dimensional analysis of various aspects of bioenergy systems, the book is suitable for both academic researchers and energy professionals in industry.

Becoming Campesinos Christopher Robert Boyer, 2003 *Becoming Campesinos* argues that the formation of the campesino as both a political category and a cultural identity in Mexico was one of the most enduring legacies of the great revolutionary upheavals that began in 1910. The author maintains that the understanding of popular-class unity conveyed by the term campesino originated in the interaction of post-revolutionary ideologies and agrarian militancy during the 1920s and 1930s. The book uses oral histories, archival documents, and partisan newspapers to trace the history of one movement born of this dynamic—agrarismo in the state of Michoacán.

Engineered Biomaterials Rishabha Malviya, Sonali Sundram, 2023-11-26 This book highlights recent advances focusing on the synthesis methods of engineered biomaterials and their applications. The book discusses recent applications of various approaches and technology in improving the functional properties and biological activities of biopolymers. It includes two major sections: the first section introduces a range of methods which lead to materials with enhanced properties for a range of practical applications, along with the positives and limitations of the techniques. The second section covers recent trends and advances in application of engineered biomaterials that assist materials scientists and researchers in mapping out the future of these new improved materials through value addition in order to enhance their use. Contributions in the book are done by prominent researchers from industry, academia, and government/private research laboratories across the globe. The book summarizes in a fairly comprehensive manner many of the recent technical advancements in the area of biopolymers. The book is intended to serve as a reference resource in the area of polymers science.

Algebra for Secure and Reliable Communication Modeling Mustapha Lahyane, Edgar Martínez-Moro, 2015-06-23 This volume contains the proceedings of the CIMPA Research School and Conference on Algebra for Secure and Reliable Communication Modeling, held from October 1-13, 2012, in Morelia, State of Michoacán, Mexico. The papers cover several aspects of the theory of coding theory and are gathered into three categories: general theory of linear codes, algebraic geometry and coding theory, and constacyclic codes over rings. The aim of this volume is to fill the gap between the theoretical part of algebraic geometry and the applications to problem solving and computational modeling in engineering, signal processing and information theory. This book is published in cooperation with Real Sociedad Matemática Española (RSME).

Psicología de la violencia Tomo I Marco Eduardo Murueta, Mario Orozco Guzmán, 2014-01-01 En América Latina se vive una etapa muy violenta desde inicios del Siglo XXI. En México, en la actualidad, cada vez hay más expresiones de delincuencia organizada y crece también la violencia impulsiva y el suicidio. Las ejecuciones colectivas e individuales como secuestro, asesinato, asalto, extorsión y fraude son también parte de las noticias cotidianas. Mucho de ello tiene relación con el narcotráfico debido al aumento desmesurado en el consumo de drogas, sobre todo en EUA. Los esfuerzos de los gobiernos para tratar de detener o abatir a los delincuentes son claramente insuficientes. Filósofos, antropólogos y psicólogos importantes han considerado que los seres humanos son agresivos por naturaleza, pero hay otros que opinan todo lo

contrario, que la agresividad es una enfermedad. En esta obra, un conjunto de destacados psicólogos de varios países latinoamericanos analizan diferentes facetas de las expresiones violentas que se viven actualmente y proponen alternativas realistas para superarlas.

North American Crop Wild Relatives, Volume 2 Stephanie L. Greene, Karen A. Williams, Colin K. Khoury, Michael B. Kantar, Laura F. Marek, 2019-03-14 The plant species that humans rely upon have an extended family of wild counterparts that are an important source of genetic diversity used to breed productive crops. These wild and weedy cousins are valuable as a resource for adapting our food, forage, industrial and other crops to climate change. Many wild plant species are also directly used, especially for revegetation, and as medicinal and ornamental plants. North America is rich in these wild plant genetic resources. This book is a valuable reference that describes the important crop wild relatives and wild utilized species found in Canada, the United States and Mexico. The book highlights efforts taken by these countries to conserve and use wild resources and provides essential information on best practices for collecting and conserving them. Numerous maps using up-to-date information and methods illustrate the distribution of important species, and supplement detailed description on the potential value these resources have to agriculture, as well as their conservation statuses and needs. There is broad recognition of the urgent need to conserve plant diversity; however, a small fraction of wild species is distinguished by their potential to support agricultural production. Many of these species are common, even weedy, and are easily overshadowed by rare or endangered plants. Nevertheless, because of their genetic proximity to agriculturally important crops or direct use, they deserve to be recognized, celebrated, conserved, and made available to support food and agricultural security. This comprehensive two-volume reference will be valuable for students and scientists interested in economic botany, and for practitioners at all levels tasked with conserving plant biodiversity.

Ethnobotany of the Mountain Regions of Mexico Alejandro Casas, José Juan Blancas Vázquez, 2023-05-31 Research in recent years has increasingly shifted away from purely academic research, and into applied aspects of the discipline, including climate change research, conservation, and sustainable development. It has by now widely been recognized that “traditional” knowledge is always in flux and adapting to a quickly changing environment. Trends of globalization, especially the globalization of plant markets, have greatly influenced how plant resources are managed nowadays. While ethnobotanical studies are now available from many regions of the world, no comprehensive encyclopedic series focusing on the world's mountain regions is available in the market. Scholars in plant sciences worldwide will be interested in this website and its dynamic content. The field (and thus the market) of ethnobotany and ethnopharmacology has grown considerably in recent years. Student interest is on the rise, attendance at professional conferences has grown steadily, and the number of professionals calling themselves ethnobotanists has increased significantly (the various societies (Society for Economic Botany, International Society of Ethnopharmacology, Society of Ethnobiology, International Society for Ethnobiology, and

many regional and national societies in the field currently have thousands of members). Growth has been most robust in BRIC countries. The objective of this new MRW on Ethnobotany of Mountain Regions is to take advantage of the increasing international interest and scholarship in the field of mountain research. We anticipate including the best and latest research on a full range of descriptive, methodological, theoretical, and applied research on the most important plants for each region. Each contribution will be scientifically rigorous and contribute to the overall field of study.
