Primary Care of the Premature Infant Dara Brodsky, Mary Ann Ouellette, 2008-01-01 Our understanding of the management of diseases in the premature infant has changed dramatically in recent years, and it can be quite difficult to remain up-to-date on changes in this highly scientific field. Dr. Brodsky and Ms. Ouellette have worked together to create a comprehensive reference that covers both the pathophysiology and epidemiology of problems occurring in premature babies in the Neonatal Intensive Care Unit, and the management of these problems once the infant has been released from the NICU to a community practice. The book emphasizes specific diseases that affect premature infants and focuses on two primary categories: background and management in the NICU, and management of specific illnesses after discharge from the NICU. Find information quickly using an up-to-date summary of the problems that are likely to affect the premature infant. Review helpful guidelines on feeding and growth, neurologic outcomes, developmental problems, retinopathy of prematurity, bronchopulmonary dysplasia, and much more. Use easy-to-follow management algorithms to help diagnose and manage common issues in premature infants after discharge. Make effective decisions about screening, immunizations, counseling of parents, and more. Help families deal with the emotional impact of caring for a premature infant. Access a list of disease-specific websites for clinicians and families.

Practical Stoma Wound and Continence Management Patricia Blackley, 1998 This book provides a guide to nursing management for the person subjected to ostomy surgery from diagnosis to discharge and moves to address the problems experienced by people with an established stoma living in the community. It provides a comprehensive view of the multi-skilled practice of stomal therapy nursing.

British Medical Journal, 1921

Holistic Stoma Care Patricia K. Black, 2000 Holistic Stoma Care is a holistic, person-centered textbook concerning the immediate nursing care of all patients with the complete range of stomas, before, during and after surgery. Special emphasis is placed on socio-cultural and psychological aspects. The book's approach is to move away from the bio-medical view point that is taught in nursing and medicine today. This enables the nurse to care for the patient as a whole, not just for the stoma. It endeavours to help the reader conceptualise the patient's idea of disease and illness and its outcome. Body image change after enterostomal surgery is transcultural, but the extent to which change affects the individual and limits their fulfillment of

social roles is culturally variable. The book is divided into sections covering areas such as bowel cancer and inflammatory bowel disease resulting in a stoma, adjuvant therapies and how, overall, they may have an effect on the patient and the current trials that the patient may be asked to enter, and the development, role, research and ethics in stoma care today. Holistic approach special emphasis on cultural considerations Full range of stoma care covered, including permanent and temporary stomas Body image with a stoma Multicultural issues
