Reinterpreting Tlön, Uqbar, Orbis Tertius: On the Antirealism Tendency in Modern Physics , Borges has a rare ability to put wild ideas into detective stories with reporting style. At least that is the impression that we got on his short stories. In particular, one of his short story is worth noting: Tlön, Uqbar, Orbis Tertius. The story told us about a mysterious country called Uqbar, in apparently an unofficial reprint of Encyclopedia Britannica. It also tells about Tlön, a mysterious planet, created purely by imaginative minds. While this story clearly criticizes Berkeley view and may be not related to our daily reality, a reinterpretation of this story leads us to a long standing discourse in the philosophy of science: to how extent the entire modern physics follow such a Berkeley-antirealism tendency? This paper is intended to bring this subject into our attention. We will also discuss shortly on antirealism in certain trends in theoretical physics and cosmology.

The Palgrave Handbook of Global Politics in the 22nd Century Laura Horn,Ayşem Mert,Franziska Müller,2023-01-01 This handbook offers a unique approach to the question: How do scholars write the future of global politics? Written in futur antérieur style, around the 200-year anniversary of the birth of International Relations (IR) as an academic discipline, the contributions engage in world-building and imagine different futures of IR. Set in a multiverse, 23 chapters draw on a range of possible themes and imaginaries, for instance post-pandemic conditions, the Anthropocene, and not least academic practices and the role of researchers. A concluding chapter anchors these explorations in contemporary discussions. The book mirrors the format and style of existing handbooks, combining outlines and discussions of theories, structures, processes, and core issues in IR with an academic science fiction account of how these might play out over the course of the next century. In doing so, the book challenges IR and provides alternative imaginaries, rather than predicting future conditions for all humanity. The book invites readers to reflect on how thinking about the future has become an increasingly radical, but more than ever necessary act.

From Logic to Realism to Brighter Future for Humanity Victor Christianto,Florentin Smarandache,2022-07-01 This collection of articles explores a wide range of subject, from Godel's incompleteness theorem, to possible technocalypse and neutrofuturology. Articles on historical debates on irrational number to electroculture, on vortex particle, or on different Neutrosophic applications are included.

Let the Wind blow: Physics of Wave and Only Wave Victor Christianto,Florentin Smarandache,2018 In this book, we try

to make our case through examples in different fields of science, including missiology, ecclesiology,¹⁰ and also medicine and economics theorizing. We try to be (almost) everything for everyone, while keep being humble as two unprofitable servants. That way we would quote the title of Borges' short story: Everything and nothing.

Paul Ricoeur's Idea of Reference Sanja Ivic, 2018-11-26 This book investigates the importance of Ricoeur's hermeneutics and poetics in rethinking humanities. In particular, Ricoeur's insights on reference as refiguration and his idea of interpretation as a triadic process (which consists of mimesis 1 - prefiguration, mimesis 2 - configuration, and mimesis 3 - refiguration) will be applied to philosophy of science and to literary and historical texts. It will be shown that Ricoeur's idea of emplotment can be extended and applied to scientific, literary and historical texts. This multidisciplinary research will include philosophy of science, metaphysics, hermeneutics, and literary theory.

Liberty, Individuality, and Democracy in Jorge Luis Borges Alejandra M. Salinas, 2016-10-26 This book seeks to fill a double lacuna in Borges scholarship. For one, this scholarship has been largely developed through the lens of literary and cultural studies, and not by political theorists who bring a distinct disciplinary perspective into the reading of literary works. Secondly, mainstream interpreters have overlooked or have not analyzed enough Borges's political sympathies. This book does not evaluate if these sympathies are truthful to political and historical facts or philosophical theories; rather, she shows in which aspects and around which topics Borges finds inspiration and gives literary form to the political. His texts abound with concepts and events such as liberty, individuality, war, and revolution, and they deal with topics such as the legitimacy of authority, the limits of reason, and the principle of representation, among others. This book also addresses Borges's democratic sensitivity and his critique of populism and militarism as related to salient national and global historical events that inspired his works. Above all, it calls attention to Borges's belief in the pre-eminence of individual liberty, his rejection of political oppression, and his warning against civic indifference brought about by an isolated individualism. This book may be of interest to students and professors of politics, philosophy and literature. It may also interest literary critics and readers who want to approach Borges's works with a political rather than a literary or a cultural lens.

Universe in a glass of iced-water. Exploration in off-the-wall physic Victor Christianto, Florentin Smarandache, Robert Neil Boyd, 2023-09-01 Various exploration in astrophysics has revealed many breakthroughs nowadays, not only with respect to James Webb Telescope, but also recent finding related to water and ice deposits in the Moon surface. Those new findings seem to bring us to new questions related to origin of Earth, Moon and the entire Universe.

The Oxford Handbook of Jorge Luis Borges Oxford Handbooks, 2024 The Oxford Handbook of Jorge Luis Borges contextualizes the Argentine writer Jorge Luis Borges's work for a new generation of twenty-first-century readers and critics. Most known for his creative fictions that tackle literary questions of authorship as well as more philosophical notions such as multiverse theory, Borges has captivated scholars from a variety of disciplines since his emergence on the international

scene. This volume shifts the emphasis to Borges's working life, his writing processes, his collaborations and networks, and the political and cultural background of his production. It also evaluates his impact on a variety of other fields ranging from political science and philosophy to media studies and mathematics.

Journeys into Darkness James Goho, 2014-03-06 The tradition of supernatural horror fiction runs deep in Anglo-American literature. From the Gothic novels of the eighteenth century to such contemporary authors as Stephen King and Anne Rice, writers have employed horror fiction to unearth many disquieting truths about the human condition, ranging from mistreatment of women and minorities to the ever-present dangers of modern city life. In *Journeys into Darkness: Critical Essays on Gothic Horror*, James Goho analyzes many significant writers and trends in American and British horror fiction. Beginning with Charles Brockden Brown's disturbing novels of terror and madness, Goho proceeds to discuss the influence of Edgar Allan Poe's "The Fall of the House of Usher" on H. P. Lovecraft, who is treated in several penetrating essays. Lovecraft was a uniquely philosophical writer, and Goho approaches his work through the lens of existentialist philosopher Søren Kierkegaard, while also probing Lovecraft's racism as exhibited in several tales about Native Americans. Goho also discusses the Welsh writer Arthur Machen's tortured tales of suffering and evil and Algernon Blackwood's numerous stories set in the wilds of the Canadian backwoods. The book concludes with a centuries-spanning essay on the witchcraft theme in the American Gothic tradition and a comprehensive essay on Fritz Leiber's invention of the urban Gothic. In this wide-ranging study, James Goho examines the varied ways in which supernatural fiction can address the deepest moral, social, and political concerns of the human experience. *Journeys into Darkness* will be of interest to readers and scholars of horror fiction and to students of literary history and culture in general.

Crack Capitalism John Holloway, 2010-05-07 How can we rebel against the capitalist system? John Holloway argues that by creating, cracks, fractures and fissures that forge spaces of rebellion and disrupt the current economic order. John Holloway, author of the groundbreaking *Change the World Without Taking Power*, sparked a world-wide debate among activists and scholars about the most effective methods of fighting capitalism from within. From campaigns against water privatisation, to simply not going to work and reading a book instead, Holloway demands we must resist the logic of capitalism in our everyday lives. Drawing on Marx's idea of 'abstract labour', Holloway develops 33 theses that will help you create, expand and multiply 'cracks' in the capitalist system.

Digital Ego Jacob van Koksuijk, 2007

The Borges Enigma Cynthia Lucy Stephens, 2021 Borges once stated that he had never created a character: 'It's always me, subtly disguised'. This book focuses on the ways in which Borges uses events and experiences from his own life, in order to demonstrate how they become the principal structuring motifs of his work. It aims to show how these experiences, despite being 'heavily disguised', are crucial components of some of Borges's most canonical short stories, particularly from the

famous collections *Ficciones* and *El Aleph*. Exploring the rich tapestry of symmetries, doubles and allusions and the roles played by translation and the figure of the creator, the book provides new readings of these stories, revealing their hidden personal, emotional and spiritual dimensions. These insights shed fresh light on Borges's supreme literary craftsmanship and the intimate puzzles of his fictions.

Perspectives on the Music of Christopher Fox Rose Dodd, 2016-07-15 Christopher Fox (1955) has emerged as one of the most fascinating composers of the post-war generation. His spirit of experimentalism pervades an oeuvre in which he has blithely created his own version of a range of contemporary musical practices. In his work many of the major expressions of European cultural activity - Darmstadt, Fluxus, spectralism, postminimalism and more - are assimilated to produce a voice which is uniquely resonant and multifaceted. In this, the first major study of his work, musicologists, composers, thinkers and practitioners scrutinize aspects of Christopher Fox's music, each exploring elements that relate to their own distinct areas of practice, tracing Fox's compositional trajectory and situating it within post-war contemporary European music practice. Above all this book addresses the question: How can one person dip his fingers into so many paint pots and yet retain a coherent compositional vision? The range of Fox's musical concerns make his work of interest to anyone who wants to study the development of so-called new music spanning the latter twentieth century into the twenty first century.

Unmaking Waste Sarah Newman, 2023-05-26 Explores the concept of waste from fresh historical, cultural, and geographical perspectives. Garbage is often assumed to be an inevitable part and problem of human existence. But when did people actually come to think of things as “trash”—as becoming worthless over time or through use, as having an end? *Unmaking Waste* tackles these questions through a long-term, cross-cultural approach. Drawing on archaeological finds, historical documents, and ethnographic observations to examine Europe, the United States, and Central America from prehistory to the present, Sarah Newman traces how different ideas about waste took shape in different times and places. Newman examines what people consider to be “waste” and how they interact with it, as well as what happens when different perceptions of trash come into conflict. Conceptions of waste have shaped forms of reuse and renewal in ancient Mesoamerica, early modern ideas of civility and forced religious conversion in New Spain, and even the modern discipline of archaeology. Newman argues that centuries of assumptions imposed on other places, times, and peoples need to be rethought. This book is not only a broad reconsideration of waste; it is also a call for new forms of archaeology that do not take garbage for granted. *Unmaking Waste* reveals that waste is not—and never has been—an obvious or universal concept.

The World in Movement , 2019-04-09 This book focuses on one of the main issues of our time in the Humanities and Social Sciences as it analyzes the impact of current global migrations on new forms of living together and the formation of identities and homes. Using a transdisciplinary and transcultural approach the contributions shed fresh light upon key concepts such as ‘hybrid-performative diaspora’, ‘transidentities’, ‘hospitality’, ‘belonging’, ‘emotion’, ‘body,’ and ‘desire’. Those concepts

are discussed in the context of Cuban, US-American, Maghrebian, Moroccan, Spanish, Catalan, French, Turkish, Jewish, Argentinian, Indian, and Italian literatures, cultures and religions.

A Global Environmental History of Coastal Dunes Joana Gaspar de Freitas, 2024-10-28 This book provides a holistic perspective on coastal dunes, highlighting new insights into present-day challenges to show that narratives, along with numbers, graphics, and computer models, have a role to play in climate change science, policymaking, and citizenship awareness. Adopting a cross-disciplinary approach, this book combines fiction, history, and science, to discuss past, present, and future ways of living in coastal areas. Dunes are hybrid environments, a combination of natural elements and human agency; they tell stories of values, traditional wisdom, institutions, empires, technology, vulnerabilities, coastal management, adaptation, and sustainability. Drawing on the past, Joana Gaspar de Freitas unpacks a diverse and fascinating history of dunes, linking knowledge, methods, and approaches from several case studies across the world, including France, Portugal, Brazil, Mozambique, New Zealand, USA, and the UK. The book connects the bio geophysics of global change with the main driver of transformation— human agency—to integrate and address nature-society issues, taking human and nonhuman agents into account. In following the choices, paths, and strategies that created today's coastal landscapes, the book generates greater awareness and understanding of how to shape coastal futures. This is an engaging, original, and, fundamentally, important book that fills a gap in our knowledge of cities, infrastructure, economies, and cultures built on shorelines. A key read for scholars, researchers, and students in environmental history, environmental science, sustainability, coastal land management, and climate change. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Commercial-No Derivatives (CC-BY-NC-ND) 4.0 International license.

Leadership by Resentment Ruth Capriles, 2012-01-01 What do such disparate events as Occupy Wall Street, Iran's Islamic revolution and Venezuela's socialist revolution have in common? Often, resentment based on past grievances or shortcomings seems to emerge from the depths of individual and collective psyches over the course of such emotionally charged movements. This resentment, and the related philosophical concept of ressentiment, can have a profound impact on the course of history and on the role of leadership within societies. Expanding on the concept of ressentiment, this book addresses the importance of emotions in historical events. The author explores the conditions that foster the development of ressentiment, the role of leaders and followers, and the phases of the phenomenon as it encourages destructive behaviors such as murder and suicide. Often considered an incurable disease with destructive social and political repercussions, it is a core motive for acts of terrorism, revolutions, social upheavals and processes of toxic leadership. The author puts forth a model that helps to describe certain historical processes led by ressentiment, like some revolutions and terrorist acts, and to distinguish them from other movements that are usually treated as similar (e.g., independence revolutions). The book then

tackles a seemingly impossible question: Can we find a cure for this powerful and destructive impulse? With care and deliberation, the author demonstrates the power of ethical leadership, recognition and redemption as positive unifying forces during human conflicts. A philosophical endeavor to understand events from the Boston Tea Party to Occupy Wall Street, from the French revolution to Hugo Chávez's revolution in Venezuela, this book will be fascinating reading for scholars and students of the social sciences and humanities and those with a particular interest in leadership.

Operation Valhalla Friedrich Kittler, 2021-03-02 Operation Valhalla collects eighteen texts by German media theorist Friedrich Kittler on the close connections between war and media technology. In these essays, public lectures, interviews, literary analyses, and autobiographical musings, Kittler outlines how war has been a central driver of media's evolution, from Prussia's wars against Napoleon to the so-called War on Terror. Covering an eclectic array of topics, he charts the intertwined military and theatrical histories of the searchlight and the stage lamp, traces the microprocessor's genealogy back to the tank, shows how rapid-fire guns brought about new standards for optics and acoustics, and reads Thomas Pynchon's *Gravity's Rainbow* to upset established claims about the relationship between war, technology, and history in the twentieth century. Throughout, Operation Valhalla foregrounds the outsized role of war in media history as well as Kittler's importance as a daring and original thinker.

Bion and Contemporary Psychoanalysis Giuseppe Civitarese, 2017-07-06 This book examines the importance and continued relevance of *A Memoir of the Future* in understanding and applying Bion's work to contemporary psychoanalysis. Bion continued to innovate throughout his life, but the *Memoir* has been largely overlooked. Focusing on *A Memoir of the Future* is not only of deep interest in terms of the author's biography, or even only in function of a better understanding of his theoretical concepts, but can also be considered, for all intents and purposes, the final chapter of an ingenious creative enterprise. While by some it was thought as the evidence of Bion's presumed senility, this book challenges that perspective, arguing that it represents the last challenge he issued to the psychoanalytic Establishment. In each chapter, the authors explore this notion that *A Memoir* forms an essential part of Bion's theory, and that in it he establishes a new 'aesthetic' psychoanalytic paradigm. With an international list of distinguished authors, this is a key book for any analysts interested in a comprehensive understanding of Bion's work.

Money and Inflation Mehdi Chowdhury, 2024-03-23 The book goes beyond the usual understanding of money—physically, electronically or virtually expressed in terms of monetary units like dollars, pounds, gold coins, or bitcoins—and discusses how money is best conceptualised as the ability of a person/party to obtain goods and services from another person/party. This ability may originate from the access of a person/party to money in usual sense (e.g. dollars, pounds) but also via force, social norms, mutual negotiation, altruism, trust or due to human biological characteristics. As the ability to obtain goods and services from others depends on the context — what functions as money in a time and place may not function as money in

another time and place — as such money has no universal type or representation. The book explains inflation as the increased need to acquire money, that is the need to employ more physical and mental labour to create the ability to obtain a wide range of goods and services. This book provides an explanation of the post covid price hike and the cost of living crisis by taking this new theory into consideration, which will be of interest to academics, researchers, policy makers and students studying finance, monetary economics and inflation.
