*Buildings for Education* Stefano Della Torre, Massimiliano Bocciarelli, Laura Daglio, Raffaella Neri, 2019-12-30 This open access book presents theoretical and practical research relating to the vast, publicly financed program for the construction of new schools and the reorganization of existing educational buildings in Italy. This transformative process aims to give old buildings a fresh identity, to ensure that facilities are compliant with the new educational and teaching models, and to improve both energy efficiency and structural safety with respect to seismic activity. The book is divided into three sections, the first of which focuses on the social role of the school as a civic building that can serve the needs of the community. Innovations in both design and construction processes are then analyzed, paying special attention to the Building Information Modeling (BIM) strategy as a tool for the integration of different disciplines. The final section is devoted to the built heritage and tools, technologies, and approaches for the upgrading of existing buildings so that they meet the new regulations on building performance. The book will be of interest to all who wish to learn about the latest insights into the challenges posed by, and the opportunities afforded by, a comprehensive school building and renovation program.

MCM - Milan, Capital of the Modern Lorenzo Degli Esposti, 2021-04-15 MCM - Milan Capital of the Modern, edited by Lorenzo Degli Esposti, is made up of texts and images from over 300 contributors from Europe and the US, across three generations, involved in the activities of the Padiglione Architettura in EXPO Belle Arti of Vittorio Sgarbi, a programme by the Regione Lombardia hosted in the Grattacielo Pirelli during the EXPO 2015. They investigate the relationships between

modern architecture, the city of Milan (Razionalismo, reconstruction, Tendenza, Radical Design, up to current research) and the city in general, between single and specific works and the large scale of the urban territory, in the contradictions between architecture autonomy and its dependence on specific place and historical time. The idea of MCM is that each capital of the Modern brings an original version of modernity in architecture: in the specific Milanese case, this kind of Modern is characterized by the simultaneous presence of abstract, systematic and syntactic features and an ontological conception of both buildings and architectural and urban voids.
