**The Wild Wisdom of Weeds** Katrina Blair,2014 The Wild Wisdom of Weeds is the only book on foraging and edible weeds to focus on the thirteen weeds found all over the world, each of which represents a complete food source and extensive medical pharmacy and first-aid kit. More than just a field guide to wild edibles, it is a global plan for human survival. When Katrina Blair was eleven she had a life-changing experience where wild plants spoke to her, beckoning her to become a champion of their cause. Since then she has spent months on end taking walkabouts in the wild, eating nothing but what she forages, and has become a wild-foods advocate, community activist, gardener, and chef, teaching and presenting internationally about foraging and the healthful lifestyle it promotes. Katrina Blair's philosophy in The Wild Wisdom of Weeds is sobering, realistic, and ultimately optimistic. If we can open our eyes to see the wisdom found in these weeds right under our noses, instead of trying to eradicate an invasive, we will achieve true food security. The Wild Wisdom of Weeds is about healing ourselves both in body and in spirit, in an age where technology, commodity agriculture, and processed foods dictate the terms of our intelligence. But if we can become familiar with these thirteen edible survival weeds found all over the world, we will never go hungry, and we will become closer to our own wild human instincts--all the while enjoying the freshest, wildest, and most nutritious food there is. For free! The thirteen plants found growing in every region across the world are: dandelion, mallow, purslane, plantain, thistle, amaranth, dock, mustard, grass, chickweed, clover, lambsquarter, and knotweed. These special plants contribute to the regeneration of the earth while supporting the survival of our human species; they grow everywhere where human civilization exists, from the hottest deserts to the Arctic Circle, following the path of human disturbance. Indeed, the more humans disturb the earth and put our food supply at risk, the more these thirteen plants proliferate. It's a survival plan for the ages. Including over one hundred unique recipes, Katrina Blair's book teaches us how to prepare these wild plants from root to seed in soups, salads, slaws, crackers, pestos, seed breads, and seed butters; cereals, green powders, sauerkrauts, smoothies, and milks; first-aid concoctions such as tinctures, teas, salves, and soothers; self-care/beauty products including shampoo, mouthwash, toothpaste (and brush), face masks; and a lot more. Whether readers are based at home or traveling, this book aims to empower individuals to maintain a state of optimal health with minimal cost and effort.

**Lessons of the Wild** Edwin L. Andersen,2009-05-13 Lessons of the Wild creates an awareness of the essential lessons that Nature teaches us, and provides a guidebook for men and women--particularly those in their forties, fifties, and sixties--

who are seeking greater significance in their lives. This book traces the traditional meaning of wilderness, blended with deep reflections and fascinating stories told by ordinary--and some extraordinary--people, whose lives were dramatically altered by their experiences in wild places. In *Lessons of the Wild*, Ed Andersen proposes that we have become estranged from the Source of our being and that the wilderness is our place of deep belonging. He calls for a rediscovery of our densely embedded affiliation with the Earth and its inhabitants. In support of this call, he offers five paired paths to wisdom, called *Habits of Wholeness*, which ultimately lead the reader to the consideration of a radical personal freedom. The book is unique in the way that it captures the elusive relationship between the outer wilderness of Nature and the inner wilderness of the human spirit. *Lessons of the Wild* is also a book about transitions--particularly in the major passages from boyhood to manhood and from the middle years to an age of wisdom. *Lessons of the Wild* is grounded in the profound conviction that wisdom can be drawn out of the wilderness and into everyday experience. And that, through Nature, we can begin to recover some of what's missing from our lives.
