Blurring organizational issues and social phenomena in the age of technology: a multidisciplinary perspective

Nemesio Castillo,Alberto Ochoa,Chlöé Malépart,2013-04-29 The predominant view in economic theory until the crisis of the '70s, argued the great enterprise was the key player in the innovation process, this was conceived as an activity that unfolded in specific areas, with clear responsibilities and predetermined objectives. This operating structure of the innovative process was functional demand model that favored the standardization of production. The innovative process was developed predominantly by firms that had a domain oligopolistic market from which they made windfall with which financed the research and development activities. In this context, the role of SMEs in the innovation process is limited to covering the portion of the market that big companies left.

Ires y venires Rodolfo Cruz Piñeiro ,Cirilia Quintero Ramírez ,2021-11-05 El libro analiza los flujos migratorios que ocurren en las ciudades tradicionales por las que se mueven los migrantes: Tijuana, Ciudad Juárez y Matamoros, pero también los nuevos espacios migratorios, como Altar, Sonora y Reynosa, Tamaulipas, así como experiencias que se viven en Nogales, Sonora, que ha tenido una constante importancia como punto de cruce, y en Piedras Negras, Coahuila, con un actual incremento de jóvenes que cruzan por este punto fronterizo. La frontera norte de México, con 3,500 kilómetros de extensión, no es homogénea, cada ciudad tiene su geografía particular, su historia y sus características socioeconómicas muy propias. Estas especificidades regionales tienen una influencia central en los movimientos migratorios que acontecen en cada ciudad, las cuales pocas veces se conocen y se toman en cuenta en los estudios sobre migración. Ires y venires recupera la experiencia de diez ciudades fronterizas como espacio migratorio, en el que no sólo se llega para cruzar al norte, sino que se puede permanecer ahí, o bien ser el punto de regreso al sur. Así pues, la migración se convierte en un fenómeno complejo en donde se registran los ires y venires de miles de personas que no sólo se mueven por sus intereses personales sino por las

características de las ciudades o bien por las políticas migratorias de Estados Unidos.

La capitalización privada de los bienes públicos Edgar E Ramírez de la Cruz, Manlio F Castillo Salas, 2020-11-01 En la Ciudad de México, como en otras urbes, se ignora la magnitud de la capitalización privada que realizan los desarrolladores inmobiliarios respecto a los bienes y servicios públicos asociados con el valor de las viviendas. Actualmente no existe información suficiente sobre los bienes y servicios públicos que se valoran en el mercado de vivienda, ni sobre la magnitud de su aportación al precio de los inmuebles. Esto provoca que la regulación fiscal de la vivienda no funcione de manera adecuada, aun cuando el uso de los instrumentos recaudatorios, junto con una correcta planeación urbana, permitiría dirigir recursos a las zonas de la Ciudad que más lo necesitan, con el fin de favorecer la equidad social. La principal aportación de la capitalización privada de los bienes públicos es la identificación de los elementos asociados con el valor de diversos tipos de vivienda media y alta, en cinco demarcaciones de la Ciudad de México, así como la estimación de la magnitud y dirección de cada variable encontrada, a través del cálculo de modelos de precios hedónicos, mediante una base de datos única, integrada con información pública y privada sobre los precios de la vivienda nueva y sus elementos asociados.

De pueblo pequeña a ciudad media Blanca Delia Vázquez Delgado, 2022-12-21 El Vínculo entre migración y procesos de urbanización se ha estudiado generalmente desde la perspectiva de las grandes ciudades, por lo que hay escasa atención en los aspectos económicos y sociales de localidades pequeñas en su tránsito hacia ciudades de mayor tamaño. Este estudio pretende contribuir a subsanar el hueco dentro del estudio de la movilidad de la población y su vínculo con los procesos de urbanización de localidades pequeñas, así como abonar el conocimiento y comprensión del fenómeno migratorio desde la perspectiva de estas ciudades. El objetivo es analizar los flujos migratorios en Ciudad Acuña, Coahuila, en un intento por comprender un esquema migratorio particular que explique las especificaciones de un pueblo pequeño ubicado en la frontera norte, el cual se convirtió en una ciudad de tamaño medio en un corto período de tiempo. La evidencia de Ciudad Acuña permite reflexionar también sobre un esquema migratorio integral, a partir del estudio de las trayectorias de las familias que en determinado momento llegaron a la ciudad en busca de empleo, y que potencialmente pueden integrarse a una experiencia de migración internacional. A través de la exploración de las trayectorias migratorias de familias de origen veracruzanas, se evidencia la posibilidad de trayectorias migratorias que vinculan la migración interna con la internacional.

Tlaxcala. Historia breve Ricardo Rendón García, 2016-08-02 Historia general del estado de Tlaxcala. Se inicia con un análisis de los grupos indígenas que dieron fundamento y sustancia a la identidad tlaxcalteca, así como de las características geográficas que condicionaron su desarrollo. Asimismo, se da cuenta del movimiento revolucionario y sus efectos en el desarrollo político, económico y social del estado hasta los años setenta, haciendo un serio intento por balancear los diversos aspectos que constituyen su historia contemporánea. El texto finaliza con una semblanza de las principales aportaciones culturales, intelectuales y artísticas que dan sustancia a la identidad tlaxcalteca.
