The New Cool Neal Bascomb, 2012-03-06 That Monday afternoon, in high-school gyms across America, kids were battling for the only glory American culture seems to want to dispense to the young these days: sports glory. But at Dos Pueblos High School in Goleta, California, in a gear-cluttered classroom, a different type of “cool” was brewing. A physics teacher with a dream – the first public high-school teacher ever to win a MacArthur Genius Award -- had rounded up a band of high-I.Q. students who wanted to put their technical know-how to work. If you asked these brainiacs what the stakes were that first week of their project, they’d have told you it was all about winning a robotics competition – building the ultimate robot and prevailing in a machine-to-machine contest in front of 25,000 screaming fans at Atlanta’s Georgia Dome. But for their mentor, Amir Abo-Shaer, much more hung in the balance. The fact was, Amir had in mind a different vision for education, one based not on rote learning -- on absorbing facts and figures -- but on active creation. In his mind’s eye, he saw an even more robust academy within Dos Pueblos that would make science, technology, engineering, and math (STEM) cool again, and he knew he was poised on the edge of making that dream a reality. All he needed to get the necessary funding was one flashy win – a triumph that would firmly put his Engineering Academy at Dos Pueblos on the map. He imagined that one day there would be a nation filled with such academies, and a new popular veneration for STEM – a “new cool” – that would return America to its former innovative glory. It was a dream shared by Dean Kamen, a modern-day inventing wizard – often-called “the Edison of his time” – who’d concocted the very same FIRST Robotics Competition that had lured the kids at Dos Pueblos. Kamen had created FIRST (For Inspiration and Recognition of Science and Technology) nearly twenty years prior. And now, with a participant alumni base approaching a million strong, he felt that awareness was about to hit critical mass. But before the Dos Pueblos D’Penguineers could do their part in bringing a new cool to America, they’d have to vanquish an intimidating lineup of “super-teams” – high-school technology goliaths that hailed from engineering hot spots such as Silicon Valley, Massachusetts’ Route 128 technology corridor, and Michigan’s auto-design belt. Some of these teams were so good that winning wasn’t just hoped for every year, it was expected. In *The New Cool*, Neal Bascomb manages to make even those who know little about – or are vaguely suspicious of – technology care passionately about a team of kids questing after a different kind of glory. In these kids’ heartaches and headaches – and yes, high-five triumphs -- we glimpse the path not just to a new way of educating our youth but of honoring the crucial skills a society needs to prosper. A new cool.

By Red Neck Crick Ivan Pasztor,2011-05 This book is a work of fiction, but it predicts a Happening or Event that I can guarantee will occur. And the way I know is that it has already occurred several times. Never has the Earth, or the people on it, been so ill-prepared to deal with it. And never has it been so long-overdue as it is now. What if, in a year, a few years, or your lifetime, but within a 24 hour duration, an Event occurred that destroyed nothing, and killed no people, at least directly, but changed the Earth so drastically and overwhelmingly, your mind would marvel at its occurrence, but dread its ramifications? What if the Event took us literally back in time, leveled the playing field for all religions and societies, made all men and women equal, and made money, power, and military force if not non-existent, than practically useless as a means of manipulation? Who would be best equipped to carry on in this New Age, this Brave New World? Would you?

Political Tribalism in America Timothy J. Redmond,2022-10-27 The democratic ideal demands that the citizenry think critically about matters of public import. Yet many Democrats and Republicans in the United States have fallen short of that standard because political tribalism motivates them to acquire, perceive and evaluate political information in a biased manner. The result is an electorate that is more extreme, hostile and willing to reject unfavorable democratic outcomes. In this work, the author provides a host of actionable strategies that are designed to reduce the influence of political tribalism in our lives. The text includes instructions for plumbing the depths of political views; evaluating sources of political information; engaging in difficult political conversations; appraising political data; and assessing political arguments. The first of its kind, this how-to guide is a must-read for partisans who want to become more critical political thinkers.

An Evil Premise T. Marie Vandelly,2025-08-12 From T. Marie Vandelly, author of the acclaimed horror novel Theme Music, *An Evil Premise* is a mind-bending, thrilling metanovel about possession, insanity, and the lengths a writer will go to find inspiration. When a bizarre accident leaves her sister, bestselling author Deidre Baldwin, in a coma and suffering from a grotesque skin malady, Jewel rushes to her bedside. Though the sisters are not close, she is determined to do what she can for Deidre. Staying at her sister's apartment, Jewel stumbles upon an unfinished manuscript, the one that Deidre was rushing to complete for her publisher. When Deidre's literary agent calls in a panic, Jewel—a self-published writer herself, desperate for a break—suggests she can finish it by the deadline. But the story is unsettling. It begins with a writer looking for inspiration, who finds an unclaimed manuscript. But said manuscript is just a series of protagonists who feel compelled to act out their heinous contributions to the grisly plot. Jewel is determined not to be scared off, but the novel hits a little close to home. She tries to tell herself she's being paranoid, but swears she can hear someone typing when she's not at the desk, and somehow the word count of the novel keeps going up. Her skin begins to itch. Terrified of losing her sanity, but equally terrified of losing her one shot at success, Jewel tries to find a story somewhere in the carnage, even as her rash becomes worse and she starts to have not-so-neighborly thoughts about her neighbors. Is this what happened to Deidre? Did the

manuscript drive her mad? Infect her somehow? Jewel finds herself hoping her sister never wakes up. And fearing what will happen if Deidre does ...

The Accidental Project Manager Tom Greaves, 2015-11-26 People often start working on projects almost by accident. The experience is so common in the industry they even have a name for it: The Accidental Project Manager. Author Tom Greaves has been there too and has distilled his 25 years of experience working on over 100 projects into this book for you. Tom spends less time on theory and more time presenting tried and true methods on how to manage projects, so you can get to work now. He's used his experience on projects spanning two industries as his testing ground and laboratory to invent and then perfect his innovative method for tracking the hundreds of little details on every project: called Scopelist™. Scopelist helps you organize the day to day details that need to get done right, so you can focus your time on the big issues like managing stakeholders and tradespeople, and trying to figure out what it is you are exactly building. And when you get bored of reading about project management Tom throws in a story or two (called Tom's Tales) to give you a good laugh about some of his adventures. What You'll get out of this book: - Cut your project execution time in half (versus traditional delivery methods) - Manage stakeholder expectations: ensure their needs are met before you start work - No surprises: eliminate drive-by changes to project scope (and schedule and budget) - Become a more efficient project manager: handle more projects at the same time and get noticed by upper management...

The Who Richard Bogovich, Cheryl Posner, 2024-10-09 The British rock band The Who has been hailed as the world's greatest live rock and roll act, if not the greatest rock band, period. In the band's prime, its members--Roger Daltrey, John Entwistle, Keith Moon and Peter Townshend--frequently clashed, but their conflicts also resulted in ten years of remarkable music. In 1990, The Who was inducted into the Rock and Roll Hall of Fame. Profiled here are the people who influenced,

were influenced by, or were in some other way connected with one or more members of The Who. Readers will find a vast array of entries, ranging from musicians such as Billy Idol, who took part in live performances of Tommy and Quadrophenia, and AC/DC guitarist Angus Young, who said Pete Townshend was the only guitarist ever to influence him, to behind-the-scenes people such as Glyn Johns, the English recording engineer and producer who helped create the acclaimed Who's Next (1971) and Quadrophenia (1973), and Nicky Hopkins, the much in-demand pianist who was among The Who's earliest studio collaborators. Seemingly unrelated personalities such as Muppets creator Jim Henson are in--he is believed to have modeled The Muppet Show's maniacal drummer Animal after The Who drummer Keith Moon.
