**The Routledge Companion to Digital Humanities and Art History** Kathryn Brown,2020-04-15 The Routledge Companion to Digital Humanities and Art History offers a broad survey of cutting-edge intersections between digital technologies and the study of art history, museum practices, and cultural heritage. The volume focuses not only on new computational tools that have been developed for the study of artworks and their histories but also debates the disciplinary opportunities and challenges that have emerged in response to the use of digital resources and methodologies. Chapters cover a wide range of technical and conceptual themes that define the current state of the field and outline strategies for future development. This book offers a timely perspective on trans-disciplinary developments that are reshaping art historical research, conservation, and teaching. This book will be of interest to scholars in art history, historical theory, method and historiography, and research methods in education.

*Crafting Heritage: A Journey through India's Artistic Traditions* Satakshi Choudhary,Dr Sushil Kumar,Dr Poonam Bhagchandani,Ashima Banker,Dr Shalini Gaur,Aakanksha,Shivani Chandra,2024-02-20 This book, *Crafting Heritage: A Journey through India's Artistic Traditions*, captures the spirit of the traditional crafts of the nation and acts as a bright mosaic in the kaleidoscope of India's cultural legacy. We find ourselves entwined in the elaborate stories of Madhubani

Paintings, the ageless appeal of Pashmina Shawls, the delicate craftsmanship of Nirmal Toys, and the rustic beauty of Bamboo Handicrafts as we set out on this adventure. Every chapter serves as a window into the generations-old workmanship, demonstrating the tenacity and inventiveness of Indian craftspeople. We extend an invitation to readers to journey through the historical passages described in the introduction of this book, where Bidriware gleams as a brilliant Deccan heritage and Blue Pottery reflects the cultural interchange along old trade routes. Through delving into the chapters on Cane and Bamboo Weaving, Marble Stone Craft, Saris and Silk, Bandhani, Warli Painting, and other related topics, we uncover the connections that link customs with creativity, legacy with modern significance. Crafting Heritage is a celebration of the hands that define India's creative character, not just a compilation of chapters. It pays homage to the artists who work so hard to create the intricate fabric that is India's cultural heritage with every brushstroke, thread knot, and hand mould. With the aim of fostering a more profound comprehension of the narratives, methods, obstacles, and achievements that characterise India's Crafting Heritage, this book aims to preserve and appreciate these ageless crafts.

The Preservation Management Handbook Ross Harvey, Martha R. Mahard, 2014-04-10 Cultural heritage professionals—museum curators, museum professionals, archivists and librarians— work with their specialized knowledge to prioritize the needs of their collections. Preservation managers draw on experts in climate control, fire safety, pest management and more in developing the large overview of a collection and its needs. And all the special materials within the collections have their experts too. Here, in one volume, is a wide range of topic-specific expertise that comprises both an enduring text for preservation students as well as an essential one-stop reference for cultural heritage professionals—particularly those in small- to medium sized organizations where resources are limited and professional help is not always at hand. The editors introduce the reader to the essential tools and principles of a preservation management program in the twenty-first century, addressing the realities of diverse collections and materials, and embracing the challenges of working with both analog and digital collections. The sections on planning and managing a preservation program contain the basic starting point for any kind of collection, regardless of size and content. Written with the small collection in mind, the principles are nevertheless scalable and widely applicable.

**Gold: How it Shaped History** Alan Ereira, 2024-11-30 Gold is not what we think. It is usually discussed in the context of wealth and art but this book has a broader subject, so fundamental that it has been largely unremarked. Informed by a mass of recent discoveries and a South American indigenous perspective, it offers a new way of understanding the history of civilization. Gold has been coinage, treasure and adornment. But it has been much more, as the hidden driver of wars and revolutions, the rise and fall of empires and the transformation of societies. As the sun traveled east to west across the sky, gold, incorruptible and corrupting, flowed west to east, hand to hand across the world. That flow has brought empires to grow and collapse and driven plunder, conquest and colonization. It brought about wars and revolutions, empowered new

forms of arts and science and created the capitalist consumer economy that dominates us now. All the gold people ever shaped still exists, shining as new; it can be mislaid but never decays. Right from its first appearance on the west shore of the Black Sea, long before the rise of Egypt and Mesopotamia, gold crowned the first proto-king. Ever since, it has been regarded as value incarnate with transcendental power. The quantity we take has been increasing steadily for 6,500 years. Now extraction accelerates. Our gold mountain has doubled in the last fifty years. Yet its price increases faster. While the quantity doubled, its buying power multiplied by six. What does gold do that makes us want it so much? As Alan Ereira reveals in this skilfully woven narrative, gold is the hidden actor that shapes our story.

The Practice of Greater Kan and Li Mantak Chia, Andrew Jan, 2014-02-01 A guide to Taoist exercises to return to the Wu Wei state of mind and create the immortal spirit body • Includes illustrated instructions to connect astral energy with the energies of animals, children, and plants to grow the immortal fetus, or spirit body • Provides warm-up exercises and a complete daily Kan and Li routine • Explores how these advanced formulas are used for astral flight and realization of the Wu Wei state Building on the Lesser Kan and Li formulas for the development of the soul body, this book provides illustrated descriptions of the Greater Kan and Li formulas to create the immortal spirit body. Used by Taoist masters for thousands of years, these exercises are for advanced students of Taoist Inner Alchemy and mark the beginning of the path to immortality. Master Mantak Chia and Andrew Jan reveal how to use Taoist inner alchemy to harness the energies of Sun, Moon, Earth, North Star, and Big Dipper and transform them to feed the soul body and begin development of the immortal spirit body. They explain how to reverse yin and yang power through energetic work at the solar plexus, thereby activating the liberation of transformed sexual energy. They explore how to open the heart center and how to connect astral energy with the energies of animals, children, and plants to grow the immortal fetus, or spirit body. The authors provide warm-up exercises, including the Inner Smile and Fusion practices, and outline a complete daily Kan and Li routine for mental and physical health, longevity, astral flight, and realization of the Wu Wei state.

**Stealing History** Colleen Margaret Clarke, Eli Jacob Szydlo, 2017-04-17 When compared to terrorism, drugs and violent crimes that occupy the news today art is not considered as important. But, as it turns out, art and cultural crime is currently ranked as the third-largest criminal enterprise in the world. What exactly is art crime? Why does art matter? And what is law enforcement doing to prevent this crime today? Due to the misleading portrayal of art crime in the entertainment industry people have the flawed belief that art and cultural crime doesn't damage anyone in a direct way. And the truth of the matter is that this crime results in the loss of billions of dollars annually. Art and cultural crime is not simply focused on museums or private displays, the loss of art directly affects our cultural identity and history. Napoleon moved from one region to the next collecting art and sending as much as possible back to France. The Nazis looted cultural property from every territory they occupied. And there have been various cases of ISIL and ISIS destroying archaeological sites as a method of destroying any

evidence of past culture or history that disagree with their own. With the United States being the largest market for both legal and illicit artwork in the world more preventative attention from law enforcement and security is needed for our country to meet international standards and end detrimental art crimes. In *Stealing History*, Colleen Clarke and Eli J. Szydlo look at the history behind art crime, how these crimes have grown over the last half century, and what law enforcement has been involved in protecting the world from these crimes.

The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students' thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world. Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.

Transforming the Curriculum Through the Arts Robyn Gibson, Robyn Ewing, 2020-12-14 This textbook highlights the unique role that quality Arts processes and experiences can and should play across the curriculum to ensure that all learners' creativities and imaginations flourish. It provides much-needed strategies, units of work and practical resources in six arts disciplines - visual arts, literature, drama, music, dance and media arts. It is a must-read for those keen to develop research-informed, integrated, arts-rich learning and teaching strategies while also exploring each discipline. Alongside the 'four Cs' (critical thinking, communication, collaboration and creativity) the authors propose four additional 'Cs': curiosity, compassion, connection and courage as much-needed 21st century capabilities. The book speaks to the current debates on STEAM vs. STEM education, and provides an important framework for preservice and experienced classroom teachers, including arts specialists.

**The Codex Amiatinus and its "Sister" Bibles: Scripture, Liturgy, and Art in the Milieu of the Venerable Bede** Celia Chazelle, 2019-03-27 The Codex Amiatinus and its "Sister" Bibles examines the full Bibles (Bibles containing every

scriptural text that producers deemed canonical) made at the northern English monastery of Wearmouth-Jarrow under Abbot Ceolfrith (d. 716) and the Venerable Bede (d. 735), and the religious, cultural, and intellectual circumstances of their production. The key manuscript witness of this monastery's Bible-making enterprise is the Codex Amiatinus, a massive illustrated volume sent toward Rome in June 716, as a gift to St. Peter. Amiatinus is the oldest extant, largely intact Latin full Bible. Its survival is the critical reason that Ceolfrith's Wearmouth-Jarrow has long been recognized as a pivotal center in the evolution of the design, structure, and contents of medieval biblical codices. **Art Education as a Radical Act** Sara Torres-Vega, Wendy Woon, 2024-05-20 This comprehensive volume highlights and centers untold histories of education at the Museum of Modern Art (MoMA) from 1937 to 2020, using the critical voices of artists, scholars, designers, and educators. Exploring these histories as transformative and paradigm-shifting in museum education, it elevates MoMA educators as vocal advocates for harnessing the educational power that museums inherently possess. Divided into three interlinked parts, the first sheds light on the early educational endeavors of the museum while analyzing the context of art education in the United States. The second part focuses on the tenures of Victor D'Amico and Betty Blayton, utilizing the MoMA archives as a primary resource. It includes essays by Ellen Winner, Luis Camnitzer, Susan E. Cahan, Michelle Millar Fisher, HECTOR (Jae Shin & Damon Rich), Gregory Sholette, Carol Duncan, Moreen Maser, Nana Adusei-Poku, Carmen Mörsch, Rika Burnham, Donna M. Jones, and José Ortiz. The third part presents the perspectives of William Burback, Philip Yenawine, Patterson Sims, Deborah F. Schwartz, and Wendy Woon as former MoMA Directors of Education in their own words and considers the forces that shaped their work. This timely and unique exploration ultimately aims to trace and understand the fundamental and evolving concerns of a seemingly underexamined profession constantly striving to maintain relevance in an environment marked by institutional, social, and political uncertainty. Exploring the radical acts undertaken to keep the museum true to its original promise, it delineates the paradox whereby education is both central and invisible to the identity of MoMA and museums more broadly and re-centers the conception of the museum as an educational institution. It is designed for scholars, researchers, and post-graduate students interested in arts education, visual literacy, museum studies, and communication studies.

Middle East Studies after September 11 Tugrul Keskin, 2018-05-07 Middle East Studies after September 11: Neo-Orientalism, American Hegemony and Academia will show the long-term implications of current approaches to Middle East scholarship on the internal transformation of Middle Eastern societies. It describes the complex relationship between American academia and state government: a relationship which has influenced and restructured the state, society and politics in the Middle East as well as in the United States. It engages the disciplines of Sociology, Political Science, Anthropology, History and International Studies, while maintaining the epistemological, methodological, and ontological insights of a sociological approach to the Middle East. Contributors are: Beyazit H. Akman, Mahmoud Arghavan, Dunya D.

**Sacred Views of Saint Francis** Kathleen W. Peters, John McClain, 2020 Overlooking Lago di Orta in the foothills of the Northern Italian Alps, the Renaissance-era Sacro Monte di Orta (a UNESCO World Heritage site) is spectacle and hagiography, theme park and treatise. Sacro Monte di Orta is a sacred mountain complex that extolls the life of St. Francis of Assisi through fresco, statuary, and built environment. Descending from the vision of the 16th-century Archbishop Carlo Borromeo, the design and execution of the chapels express the Catholic Church's desire to define, or, perhaps redefine itself for a transforming Christian diaspora. And in the struggle to provide a spiritual and geographical front against the spread of Protestantism into the Italian peninsula, the Catholic Church mustered the most powerful weapon it had: the widely popular native Italian saint, Francis of Assisi. *Sacred Views of Saint Francis: The Sacro Monte di Orta* examines this important pilgrimage site where Francis is embraced as a *ne plus ultra* saint. The book delves into a pivotal moment in the life of the Catholic Church as revealed through the artistic program of the Sacro Monte's twenty-one chapels, providing a nuanced understanding of the role the site played in the Counter-Reformation. The Sacro Monte di Orta was, in its way, a new hagiographical text vital to post-Tridentine Italy. *Sacred Views* provides research and analysis of this popular, yet critically neglected Franciscan devotional site. *Sacred Views* is the first significant scholarly work on the Sacro Monte di Orta in English and one of the very few full-length treatments in any language. It includes a catalogue of artists, over one hundred photographs, maps, short essays on each chapel, and longer essays that examine some of the most significant chapels in greater detail.

*Research Handbook on Information Systems and Technology* Arti Jain, John Wang, Arun K. Yadav, 2025-08-11 This insightful Research Handbook examines the role of Information Systems & Technology (IS&T) across multiple fields including artificial intelligence, cloud computing, business intelligence and mobile communication. It discusses the ethical implications of IS&T, including risks to privacy and security, and outlines potential solutions to these challenges. Contributing authors illustrate the complex and rapidly evolving state of the field, analysing case studies that demonstrate the transformative impact of technology on global business organizations.

**Illustrated Garden Glossary** Enid Mayfield, 2025-03-10 The Illustrated Garden Glossary is a comprehensive glossary of over 1000 terms related to gardening and horticulture, each supported by superb colour illustrations to aid understanding. The topics covered include plant classification, morphology and growth; plants from seeds; propagation; soil; compost; planting systems; pruning; pests and diseases; water and more. The glossary also explores terms relating to the history of gardens, from ancient Greece and Egypt, to gardens across Asia and the Middle East, and through to our modern-day urban farms. The Illustrated Garden Glossary is a must-have reference for gardeners, plant scientists, horticulturalists, students,

libraries, ecologists and urban farmers.

New Directions for Computing Education Samuel B. Fee, Amanda M. Holland-Minkley, Thomas E. Lombardi, 2017-04-17  
Why should every student take a computing course? What should be the content of these courses? How should they be taught, and by whom? This book addresses these questions by identifying the broader reaches of computing education, problem-solving and critical thinking as a general approach to learning. The book discusses new approaches to computing education, and considers whether the modern ubiquity of computing requires an educational approach that is inherently interdisciplinary and distinct from the traditional computer science perspective. The alternative approach that the authors advocate derives its mission from an intent to embed itself within an interdisciplinary arts and science context. An interdisciplinary approach to computing is compellingly valuable for students and educational institutions alike. Its goal is to support the educational and intellectual needs of students with interests in the entire range of academic disciplines. It capitalizes on students' focus on career development and employers' demand for technical, while also engaging a diverse student body that may not possess a pre-existing interest in computing for computing's sake. This approach makes directly evident the applicability of computer science topics to real-world interdisciplinary problems beyond computing and recognizes that technical and computational abilities are essential within every discipline. The book offers a valuable resource for computer science and computing education instructors who are presently re-thinking their curricula and pedagogical approaches and are actively trying new methods in the classroom. It will also benefit graduate students considering a future of teaching in the field, as well as administrators (in both higher education and high schools) interested in becoming conversant in the discourse surrounding the future of computing education.

*History of Design and Design Law* Tsukasa Aso, Christoph Rademacher, Jonathan Dobinson, 2022-04-22 For the first time, this book provides an up-to-date history of product design and product design law covering 17 countries — Japan, Korea, China, Singapore, the United Kingdom, Germany, France, Italy, the Nordic countries (Denmark, Finland, Iceland, Norway and Sweden), Russia, the United States, Brazil and Australia — selected for their innovative or influential approach to design or design protection. Each country is the subject of two chapters — one on the history of design and the other on the history of design law — authored by experts in design and intellectual property (IP) law. This unique interdisciplinary approach explains why and how various national design protection systems (that can include design, copyright, trade mark, competition and civil laws) developed, making it an ideal book for students, researchers and lawyers. The book also serves as an international survey of different national policy and legal responses to historical developments and specific design and legal issues allowing readers to consider their advantages and disadvantages — and so is also recommended for policy and law makers, as well as organizations that administer IP rights. Topics include the subject matter of design protection; procedural and substantive requirements; design registration; infringement; and the overlap of design rights and other IP

rights. The chapters on design history provide further context to the historical development of these legal concepts by considering major design movements, key designers and iconic designs and the current state of design. The chapters highlight the connected and often complementary relationship between the two histories, not only for each country, but at the regional and international level, often as a result of government policies, trade, colonialism, immigration and globalisation. Design and design practice continue to become more global and evolve with developments in technology. At the same time, design laws are not internationally harmonized and continue to develop at the national level, with a number of significant changes occurring in recent years. This timely book shows how the lessons of the past continue to inform the future direction of design and the legal systems developed to protect it.

web mar 6 2012 the long running and  
often boring debate between  
fundamentalist believers and non  
believers is finally moved forward by  
alain de botton s inspiring new book  
which boldly argues that the  
supernatural claims of religion are  
entirely false but that it still has some  
very important things to teach the  
secular world
