A team of high-profile contributors each present a concise overview of their particular field of expertise, detailing key procedures & challenging students to engage with current & topical debates.

Prison Food An-Sofie Vanhouche, 2022-06-11 Based on the lived experiences of incarcerated persons and staff, this book explores the symbolic significance of prison foodways to normalization, autonomy, identity construction, power, group formation and security. The book also traces the rationalization(s) that policy makers attach to prison food, from the water and bread diet of the 18th century, the contested abolition of alcohol consumption, to the current fear surrounding the spread of COVID-19 through food distribution in prisons. The argument is developed that prison food policies have always reflected how Belgian governments have treated imprisoned persons. The emphasis on Belgian prisons and the discussions on prison foodways situated on a micro and macro level add a unique flavour to prison food scholarship by providing a deeper understanding of a penal culture outside the dominant tradition of Anglo-Saxon and Nordic studies. Consequently, the book provides a nuanced conception of prison foodways for penologists, sociologists, those with interests in wider prison policy, and those working on the socio-cultural role of food in closed environments.

Crime Prevention, Migration Control and Surveillance Practices Veronika Nagy, 2018-10-03 EU expansion has stoked fears that criminals from the East may abuse freedom of movement to exploit the benefit systems of richer states. This book examines the way in which physical state borders are increasingly being replaced by internal border controls in the form of state bureaucracies as a means of regulating westward migration. The work examines the postmodern effect of globalisation and how ontological anxieties contribute to securitisation and social sorting in Western countries. It discusses the changes in control societies and how targeted surveillance as a geopolitical tool leads to new digitalised mechanisms of population selection. The book presents a casestudy of Roma migrants in the UK to examine the coping strategies adopted by those targeted. The book also critically evaluates the limitations of digitalised bureaucratic systems and the dangers of reliance on virtual data and selection methods.

Technocrime Stéphane Leman-Langlois, 2013-05-13 This book is concerned with the concept of 'technocrime'. The term encompasses crimes committed on or with computers - the standard definition of cybercrime - but it goes well beyond this to

convey the idea that technology enables an entirely new way of committing, combating and thinking about criminality, criminals, police, courts, victims and citizens. Technology offers, for example, not only new ways of combating crime, but also new ways to look for, unveil, and label crimes, and new ways to know, watch, prosecute and punish criminals. Technocrime differs from books concerned more narrowly with cybercrime in taking an approach and understanding of the scope of technology's impact on crime and crime control. It uncovers mechanisms by which behaviours become crimes or cease to be called crimes. It identifies a number of corporate, government and individual actors who are instrumental in this construction. And it looks at the beneficiaries of increased surveillance, control and protection as well as the targets of it. Chapters in the book cover specific technologies (e.g. the use of CCTV in various settings; computers, hackers and security experts; photo radar) but have a wider objective to provide a comparative perspective and some broader theoretical foundations for thinking about crime and technology than have existed hitherto. This is a pioneering book which advances our understanding of the relationship between crime and technology, drawing upon the disciplines of criminology, political science, sociology, psychology, anthropology, surveillance studies and cultural studies.

Drones and Unmanned Aerial Systems Aleš Završnik, 2015-12-23 This book tackles the regulatory issues of Unmanned Aerial Systems (UAS) or Remotely-Piloted Aerial Systems (RPAS), which have profound consequences for privacy, security and other fundamental liberties. Collectively known as “drones,” they were initially deployed for military purposes: reconnaissance, surveillance and extrajudicial executions. Today, we are witnessing a growth of their use into the civilian and humanitarian domain. They are increasingly used for goals as diverse as news gathering, aerial inspection of oil refinery flare stacks, mapping of the Amazonian rain-forest, crop spraying and search and rescue operations. The civil use of drones is becoming a reality in the European Union and in the US. The drone revolution may be a new technological revolution. Proliferation of the next generation of “recreational” drones show how drones will be sold as any other consumer item. The cultural perception of the technology is shifting, as drones are increasingly being used for humanitarian activities, on one hand, but they can also firmly be situated in the prevailing modes of postmodern governance on the other hand. This work will be of interest to researchers in Criminology and Criminal Justice interested in issues related to surveillance, security, privacy, and technology. It will also provide a criminological background for related legal issues, such as privacy law, aviation law, international criminal law, and comparative law.

The Oxford Handbook of Interdisciplinarity Robert Frodeman, Julie Thompson Klein, Roberto Carlos Dos Santos Pacheco, 2017-01-26 Interdisciplinarity has become as important outside academia as within. Academics, policy makers, and the general public seek insights to help organize the vast amounts of knowledge being produced, both within research and at all levels of education. The second edition of *The Oxford Handbook of Interdisciplinarity* offers a thorough update of this major reference work, summarizing the latest advances within the field of inter- and transdisciplinarity. The collection is

distinguished by its breadth of coverage, with chapters written by leading experts from multiple networks and organizations. The volume is edited by respected interdisciplinary scholars and supported by a prestigious advisory board to ensure the highest quality and breadth of coverage. The Oxford Handbook of Interdisciplinarity provides a synoptic overview of the current state of interdisciplinary research, education, administration and management, and of problem solving-knowledge that spans the disciplines and interdisciplinary fields. The volume negotiates the space between the academic community and society at large. Offering the most broad-based account of inter- and transdisciplinarity to date, its 47 chapters provide a snapshot of the state of knowledge integration as interdisciplinarity approaches its century mark. This second edition expands its coverage to discuss the emergence of new fields, the increase of interdisciplinary approaches within traditional disciplines and professions, new integrative approaches to education and training, the widening international presence of interdisciplinarity, its increased support in funding agencies and science-policy bodies, and the formation of several new international associations associated with interdisciplinarity. This reference book will be a valuable addition to academic libraries worldwide, important reading for members of the sciences, social sciences, and humanities engaged in interdisciplinary research and education, and helpful for administrators and policy makers seeking to improve the use of knowledge in society.

Criminology in criminal justice Alexandre Chitov, 2022-04-01 On behalf of Chiang Mai University Press' editorial team, I would like to thank for your interest in this book, *Criminology in Criminal Justice* by Alexandre Chitov. In my opinion, the book comes out in the right time. In the past few years, the global communities have experienced a change in the way in which "justice" is defined. Mainly, this comes from social and cultural divides which have affected legal practices in many countries. While providing an explanation on foundational concepts and the way in which each concept derives from, the author utilizes case studies from many places which help us understand these foundational ideas in criminology in a more critical way. I hope that the endeavor in the book would benefit not only law students but also other lay people who are interested in criminology.

Video Surveillance C. William R. Webster, Eric Töpfer, Francisco Reto Klauser, Charles D. Raab, 2012 This book brings into focus the ways in which the implementation of cameras and systems, and their operation and technical features, are the product of decisions and policies made in a variety of contexts and by a variety of authorities and interested parties. It examines the cultural context in which cameras are deployed and explores how this context can shape their diffusion and use. The book places particular emphasis on studies of video surveillance in different national, institutional, cultural and linguistic settings. IOS Press is an international science, technical and medical publisher of high-quality books for academics.

Security Games Colin Bennett, Kevin Haggerty, 2012 *Security Games: Surveillance and Control at Mega-Events* addresses the impact of mega-events – such as the Olympic Games and the World Cup – on wider practices of security and

surveillance. Mega-Events pose peculiar and extensive security challenges. The overwhelming imperative is that nothing should go wrong. There are, however, an almost infinite number of things that can go wrong; producing the perceived need for pre-emptive risk assessments, and an expanding range of security measures, including extensive forms and levels of surveillance. These measures are delivered by a security/industrial complex consisting of powerful transnational corporate, governmental and military actors, eager to showcase the latest technologies and prove that they can deliver spectacular levels of security. Mega-events have thus become occasions for experiments in monitoring people and places. And, as such, they have become important moments in the development and dispersal of surveillance, as the infrastructure established for mega-events are often marketed as security solutions for the more routine monitoring of people and place. Mega-events, then, now serve as focal points for the proliferation of security and surveillance. They are microcosms of larger trends and processes, through which – as the contributors to this volume demonstrate – we can observe the complex ways that security and surveillance are now implicated in unique confluences of technology, institutional motivations, and public-private security arrangements. As the exceptional conditions of the mega-event become the norm, *Security Games: Surveillance and Control at Mega-Events* therefore provides the glimpse of a possible future that is more intensively and extensively monitored.

Biopolitics and Geopolitics of a European Border Regime in Senegal Nannette Abrahams, 2022-12-13 This publication provides a historical and ethnographic analysis about the geopolitics and biopolitics of a European securitization process with regard to Senegalese migration history. It examines the way a European border regime was externalized to Senegal in light of the West African maritime route that came to a head in 2006. Beyond a policy-dimension, this publication analyses narratives about migration and about Europe from the viewpoint of a politically engaged urban youth perspective, the Senegalese hip-hop milieu. This provides an external perception of the European Union. Nannette Abrahams is a political geographer and political scientist as well as a practitioner who worked for the German development cooperation in Uganda.

Queering Borders David A.B. Murray, 2016-05-25 In recent years, migration has moved to the forefront of national and global debates, intensifying discussions about borders, security, identity and citizenship. In this volume we ask how language and sexuality impact these discussions: how do sexuality and language contribute toward the construction and maintenance of varying scales of borders? How do sexuality and language figure in border crossings across time, space, embodied differences, and culture? The contributors to this volume, all anthropologists, demonstrate how anthropological theories, concepts and methods uniquely address the operations of sexuality and language in the making, unmaking and remaking of these borders. In this volume, terminology, discourse, language choice, and other forms of linguistic practice are at the forefront of research on transnational queer im/migrant populations, allowing us to better understand how language shapes and is shaped by queer peoples' movements across borders. Sacred Inception Marianne Delaporte, Morag Martin, 2018-06-21 This edited volume explores the intersection of spirituality with childbirth from 1800 to the present day from a comparative perspective. It illustrates how over this time period in much of the world, traditional practices, home births, and midwives have been overshadowed and undermined by male dominated obstetrics, hospitalization, and ultimately the medicalization of the birthing process itself.

Work and Migration: Case studies from Around the World Fethiye Tilbe, Elli Heikkilä, 2021-11-16 The purpose of this edited book is to look at work and migration from multiple viewpoints and illuminate challenges faced by immigrants in the labour markets around the world. It takes an approach that listens to the voices of different migrant groups in different countries, based mostly on qualitative research. In addition to the main themes of discussion centred on labour markets, this book also makes reference to a wide range of discussion topics which often intersect with employment, labour markets and the work experience of migrants. These include themes such as migrant integration, remittance transfers, relations established and maintained with home countries, legal and institutional arrangements and policy making processes in the host countries, through the concepts of employment and work. The chapters highlight immigrants' experiences both theoretically and empirically in the contributions around the world. This book, which includes the experiences of specific groups like qualified, unskilled, and female migrants, makes reference to a wide range of discussion topics such as migrant integration, remittance transfers, relations established and maintained with home countries, legal and institutional arrangements and policy making processes in the host countries, through the concepts of employment and work." Roots, Rites and Sites of Resistance L. Cheliotis, 2010-08-20 Which practices count as resistance? Why, where, and how does resistance emerge? When is resistance effective, and when is it truly progressive? In addressing these questions, this book brings together novel theoretical and empirical perspectives from a diverse range of disciplinary and geographical locales.

Narratives of fear and safety Kaisa Kaukiainen, Kaisa Kurikka, Hanna Mäkelä, Elise Nykänen, Sanna Nyqvist, Juha Raipola, Anne Riippa, Hanna Samola, 2020-09-01 The essays in this edited volume, written in English and French, tackle the intriguing problems of fear and safety by analysing their various meanings and manifestations in literature and other narrative media. The articles bring forth new, cross-cultural interpretations on fear and safety through examining what kinds of genre-specific means of world-making narratives use to express these two affectivities. The articles also show how important it is to study these themes in order to understand challenges in times of global threats, such as the climate crisis. The main themes of the book are approached from various theoretical perspectives as related to their literary and cultural representations. Recent trends in research, such as affect and risk theory, serve as the basis for the discussion. The articles in the volume also draw from disciplines such as gender studies and trauma studies to examine the threats posed by collective fears and aggression on individuals' lives and propose ways of coping with fear. These themes are addressed also in articles analysing new adaptations of old myths that retell stories of the past. Many of the articles in the volume discuss apocalyptic and dystopian narratives that currently permeate the entire cultural landscape. Dystopian narratives do not only deal with future threats, such as totalitarianism, technocracy, or environmental disasters, but also suggest alternative ways of being and new hopes in the form of political resistance.

Migrations in Jordan Jalal Al Hussein, Valentina Napolitano, Norig Neveu, 2024-06-27 Jordan currently hosts the second largest percentage of registered refugees in the world: three million out of its eleven million inhabitants. Its experience in hosting migrants and refugees precedes its independence in 1946, with the arrival of Circassians, Chechens, and Armenians from the late 19th century. Jordan thus constitutes a unique observatory for reception policies and long-term settlement of different migrant groups. Based on original empirical and archival material, this volume focuses on migrations caused by conflicts, wars, and crises underscoring their articulation with longstanding human mobility. It sheds light on the cumulative and processual dimensions of Jordan's reception policies and migrants' settlement strategies. It identifies the multiple actors involved in the management of migrants and, conversely, the latter's contribution to the Jordanian social, economic, political, and urban fabric. The first part of the volume examines the policies adopted by the Jordanian authorities and international organizations to regulate access to basic services and to the labour market, and explores the economic and political factors underlying them. The second part analyzes the effects of Jordan's policies on the territorial distribution and settlement of migrants. How have these policies, combined with the adaptation strategies of migrants contributed to shaping new urban

spaces? The third part focuses on capacity of the migrants to activate, establish, (re)build, and intersect different kinds of solidarity networks within the context of protracted displacement.

The Role of Prison in Europe Tom Vander Beken, 2016-08-25 This book discusses the role of the prison in Europe across a divide of over 200 years. Inspired by the travels of the prison reformer John Howard (1726-1790), who visited prisons across Europe in the eighteenth century, it fundamentally reflects on centuries of the practice of locking people up as punishment. Howard travelled across Europe to visit prisons, with a simple method: he travelled and knocked on prison doors on his journey and entered the premises. He then observed the situation in the prison, took notes and left to visit other locations. Howard's influential book *The State of the Prisons* resulted from his experiences, provoking debate among prison reformers and academics worldwide. Adopting the contemporary methods of prison tourism research, the author follows in Howard's footsteps. He draws on extensive research conducted in prisons across six countries: England, Norway, the Netherlands, France, Italy and Azerbaijan. Howard's reflections are used as a frame to assess contemporary prisons, particularly revolving around the questions of what prisons are for today, and what they should (or should not) be. It will be of great interest to criminologists researching prisons and penology, as well as historians interested in the histories of punishment.

The Challenges of a Secular Quebec Lucia Ferretti, François Rocher, 2023-09-15 In 2019, the Quebec National Assembly passed Bill 21. It prohibits, among other things, certain state employees in positions of authority (including teachers, prison guards, police officers, and justices of the peace) from wearing religious symbols when providing public services. Many political commentators denounced the move as running counter to Canadian multiculturalism and human rights. Why did the government adopt this form of state secularism? And why did it garner public support? *The Challenges of a Secular Quebec* provides illuminating answers to these questions and explores why many Quebecers consider the law legitimate. Contributors analyze the statute from different angles to provide a nuanced, respectful discussion of its intentions and principles. Given the province's singular history in North America, the merits of the initiative to separate church and state must be considered within the Quebec context. *The Challenges of a Secular Quebec* calls for a legal interpretation of Bill 21 that is sensitive to this difference.

Imaginary Spaces of Power in Sub-Saharan Literatures and Films Alix Mazuet, 2012-04-25 This collection of essays is unlike others in the field of African studies, for it is based on three very precisely delineated focal points: a particular geographical region, the sub-Sahara; specific modes of cultural production, literature and cinema; and a focus on works of French expression. This three-fold approach to exploring the relationships between power and culture in a non-Western environment greatly contributes to making this book unique from a variety of perspectives: African, Francophone and postcolonial studies, as well as cross-disciplinary, cultural, transnational and diasporic studies. Moreover, the book offers

deft and innovative analyses that move beyond the rhetoric of crises on the African continent we so very often hear of, so as to present a critical reflection on the subject at hand that is specific to the sub-Sahara and at the same time intimately linked to global culture, economy and politics. The authors' three-fold approach also presupposes that disciplinary compartmentalization increases power conflicts in academia. If only in part, compartmentalization is the result of antagonistic and competitive relations between specialization and multidisciplinary education. This book is thus a modest attempt at presenting an alternative to excessively fixed and homogeneous academic frontiers while considering that disciplinary expertise remains a must. Keeping in mind that an increasing number of scholars in Anglophone Postcolonial studies and Francophone African studies have been attempting for quite some time now to open interstices and build crossroads that can better connect them to each other, keeping in mind that these scholars work at revealing mechanisms by which any antagonistic discourses can mix, influence, act upon or react to one another, this book seeks to take a constructive step in establishing enduring grounds for multidisciplinary, cross-disciplinary and transnational academic research and collaboration.

Virtual Freedoms, Terrorism and the Law Giovanna De Minico, Oreste Pollicino, 2021-02-15 This book examines the risks to freedom of expression, particularly in relation to the internet, as a result of regulation introduced in response to terrorist threats. The work explores the challenges of maintaining security in the fight against traditional terrorism while protecting fundamental freedoms, particularly online freedom of expression. The topics discussed include the clash between freedom of speech and national security; the multijurisdictional nature of the internet and the implications for national sovereignty and transnational legal structures; how to determine legitimate and illegitimate association online; and the implications for privacy and data protection. The book presents a theoretical analysis combined with empirical research to demonstrate the difficulty of combatting internet use by terror organizations or individuals and the range of remedies that might be drawn from national and international law. The work will be essential reading for students, researchers and policy makers in the areas of Constitutional law; Criminal Law, European and International law, Information and Technology law and Security Studies.
