

What Is The Meaning Of Greta

Rachel Mans McKenny

Mother and Son Therese Lund,2005 Seen through the eyes of it's main thirty-Something protagonists, Leap Second is an adventure novel based on a plausible corporate fraud funded by a terrorist-backed drug cartel.

Law and Order Mariana Valverde,2013-10-18 In an innovative departure from the much-studied field of 'crime in the media', this lively book focuses its attention on the forces of law and order; how they visualize and represent danger and criminality and how they represent themselves as authorities. After two chapters covering basic terms and tools in the study of culture and representation, the book covers such topics as the history of justice - system methods for visualizing criminality, from fingerprinting to DNA; the emergence of a 'forensic gaze' that begins with Edgar Allan Poe and Sherlock Holmes and culminates in the American television show Crime Scene Investigation and the rise of ways of seeing urban space that constantly divide the city into 'good' and 'bad' areas. The final chapter uses some recent conflicts regarding the legal admissibility of 'gruesome pictures' to reflect on the importance of the visual in our everyday experiences, both of safety and of danger. Shortlisted for the Hart SLSA Book Prize 2007

The Basic Minimum Dale Dorsey,2012-02-02 A common presupposition in contemporary moral and political philosophy is that individuals should be provided with some basic threshold of goods, capabilities, or well-being. But if there is such a basic minimum, how should this be understood? Dale Dorsey offers an underexplored answer: that the basic minimum should be characterized not as the achievement of a set of capabilities, or as access to some specified bundle of resources, but as the maintenance of a minimal threshold of human welfare. In addition, Dorsey argues that though political institutions should be committed to the promotion of this minimal threshold, we should reject approaches that seek to cast the basic minimum as a human right. His book will be important for all who are interested in theories of political morality.

The Butterfly Effect Rachel Mans McKenny, 2020-12-08 A delightfully off-kilter (Rachel Yoder, Nightbitch) tale of a grumpy, introverted entomologist, her astonishing lack of social skills, and her empirical data-driven approach to people and relationships that's half *A Man Called Ove*, half *The Rosie Project* A warm, winning debut from a talented new Midwestern voice. —J. Ryan Stradal, *New York Times* bestselling author of *Kitchens of the Great Midwest* Is there such a thing as an anti-social butterfly? An entomologist, Greta far prefers the company of bugs to humans, and that's okay, because people don't seem to like her all that much anyway, with the exception of her twin brother, Danny. So when she lands a research gig in the rainforest, she leaves it all behind. But when Greta learns that Danny has suffered an aneurysm and is now hospitalized, she abandons her research and hurries home to Ames, Iowa to be there for her brother. But there's only so much she can do, and unfortunately just like insects, humans don't stay cooped up in their hives either—they buzz about and...socialize. Being back home is making a mess of Greta's perfectly catalogued and compartmentalized world. It means confronting all that she left behind, including her lousy soon-to-be sister-in-law, her estranged mother, and her ex-boyfriend Brandon who has conveniently found a new partner with shiny hair, perfect teeth, and actually remembers the names of the people she meets. Plus Brandon runs the only butterfly conservatory in town, and with Greta's dissertation is now in jeopardy, she's got to get a job. She'll have to ask herself if she has the courage to open up for the people she loves, and for those who want to love her. *The Butterfly Effect* is an unconventional tale of self-discovery, navigating relationships, and how sometimes it takes stepping outside of our comfort zone to find what we need the most.

The Language of Gaze Isabella Poggi, 2024-11-28 Verbal and nonverbal communicative acts mark the links within our discourse, help us to exchange turns and give backchannel in conversation. This book analyses the communicative system of gaze in depth, investigating its structure and functions the same way that words and gestures are studied, and shows how to do so by establishing a phonology, a morphology and a semantics of eye communication, before finally outlining a lexicon of gaze. Poggi provides a detailed semantic analysis of lexical items, highlights the role of gaze in multimodal communication, and illustrates its uses in everyday life, politics, education and musical performance. The meanings we communicate by gaze are intertwined with the multimodality of our communication, thus integrating, complementing, sometimes contradicting, whether deliberately or inadvertently, what we say with words or gestures. Starting from a robust theoretical framework, this book also provides an overview of the methods that can be exploited to study gaze, ranging from ethno-semantics to observation and simulation, and provides examples of their use. A timely and original contribution that is essential reading for advanced students, scholars and researchers of multimodal communication, pragmatics, social psychology and related

areas.

Four Decades in Infant Mental Health Michael Trout,2021-04-29 What can we do about very young children who cry all the time, or who withdraw, or who resist the very thing they need most: loving care? What can we do about parents who seem lost in the hurts of their own early childhood, and who behave in ways absolutely antithetical to their own stated parenting principles? This is the world of infant mental health, and this book gathers together 25 stories from the author's 41 years of experience in this remarkable clinical specialty. It will serve as a casebook and guide for infant mental health practitioners, and for the specialized faculty who prepare them. The clarity and accessibility of the cases will, however, make this book compelling to anyone mystified by how our earliest attachment experiences support or confound our later development.

Haunting Memories B. W. Van Riper,2013-11-26 Oh, no the anguished cry rang out. For a sister and her brothers, it was terrible news of a death in the family the death that left them dumbfounded. Broken hearted, here they were, a grand family suddenly bereft of a great part. It made no sense. Sorry to inform you, the awful words struck like a thunderbolt. Mom and dad had crashed on their vacation trip. So unfair, so unreal, so jarring so final. All the siblings could think of was how much love was lost to them. Their parents were the linchpins; they were the finest; they were the most revered. At a loss due to a loss. So much love and affection was denied them in an unpredictable moment. What was to become of them? Mom with her daily wisdom. Dad with his usual counsel. Mom with her laugh. Dad with his wry humor. Mom with her catering and caring. Dad with his hugs and counsel. What will they do without them? The sister and her husband, the brothers and their wives, succumbed to the pain, weakening them. Where would the strength come from that was required to survive such a tragedy? When ravaged by happenstance, What holds the family together when hope and promise lose some of their dash? In the moments of crisis, inevitably, people are hanging on by hanging tough. That courage comes from their heritage, which is the real force, the saving grace. Its not just what they have inherited in family lore, but the bond that ties endowment and legacy together in a triumvirate that can spark the spirit. *Haunting Memories* says something about how desire can influence perception; by allowing or causing us to see what we want to see. We wonder when they're gone, Did we do enough for them?

Did we express our love and affection often enough? Were we good to them? We aren't going to be able to answer yes to all such questions without some reservation. Because we were never going to think we've done all that we could have or should have done for our loved ones. We can't get our minds off them. We can't let them go. We want them back. But we can't have them back. They are where they are. And we can't get there from here.

The Pigeons' Secrets Ray Fawley, 2005-09-05 Uncle Paul and Marianne arrived at their usual feeding bench near the thicket of trees that lined one edge of DeSoto Park. Marianne was trembling as she scanned the premises for possible rescuers, but spotted no other occupants across the field. Not even a passerby walking down Georgetown Road, DeSoto Road, or Herkimer Street-the other three of the four boundaries of this devil's playground that she now inhabited. Only she and Uncle Paul populated the space today. What she was about to face was inevitable, and although she'd tried to stop it in the past, Marianne's attempts always failed. With no saviors to be seen and no hope for an intervention, Marianne took a seat on the altar of a park bench, preparing herself for the sacrifice that would soon be forced upon her. Advance praise for *The Pigeons' Secrets* A novel of psychological horror that's shrewdly developed in the manner of a whodunit-style mystery, *The Pigeons' Secrets* unfolds its story in a compelling narrative that keeps the reader wanting to know what happens next-and then some. -Ken Hanke, *Scarlet Street* magazine

Museums and Communities Viv Golding, Jen Walklate, 2019-01-22 This volume presents seventeen essays critically reflecting on the collaborative work of the contemporary ethnographic museum with diverse communities. It invites the reader to think about the roles and values of museums internationally, particularly the wide range of creative approaches that can progress dialogue and intercultural understanding in an age of migration that is marked by division and distrust. Against a troubling global background of prejudice and misunderstanding, where elections are increasingly returning right-wing governments, this timely book considers the power of an inclusive and transformative museum space, specifically the movements from static sites where knowledge is transmitted to passive audiences towards potential contact zones where diverse community voices and visibilities are raised and new knowledge(s) actively constructed.
