Reading Cicero's Final Years Christoph Pieper,Bram van der Velden,2020-12-07 This volume contributes to the ongoing scholarly debate regarding the reception of Cicero. It focuses on one particular moment in Cicero's life, the period from the death of Caesar up to Cicero's own death. These final years have shaped Cicero's reception in a special way, as they have condensed and enlarged themes that his life stands for: on the positive side his fight for freedom and the republic against mighty opponents (for which he would finally be killed); on the other hand his inconsistency in terms of political alliances and tendency to overestimate his own influence. For that reason, many later readers viewed the final months of Cicero's life as his swan song, and as representing the essence of his life as a whole. The fixed scope of this volume facilitates an analysis of the underlying debates about the historical character Cicero and his textual legacy (speeches, letters and philosophical works) through the ages, stretching from antiquity itself to the present day. Major themes negotiated in this volume are the influence of Cicero's regular attempts to anticipate his later reception; the question of whether or not Cicero showed consistency in his behaviour; his debatable heroism with regard to republican freedom; and the interaction between philosophy, rhetoric and politics.

EU Securities and Financial Markets Regulation Niamh Moloney,2023-03-25 Over the decade or so since the global financial crisis rocked EU financial markets and led to wide-ranging reforms, EU securities and financial markets regulation has continued to evolve. The legislative framework has been refined and administrative rulemaking has expanded. Alongside, the Capital Markets Union agenda has developed, the UK has left the EU, and ESMA has emerged as a decisive influence on EU financial markets governance. All these developments, as well as the Covid-19 pandemic, have shaped the regulatory landscape and how supervision is organized. EU Securities and Financial Markets Regulation provides a comprehensive,

critical, and contextual account of the intricate rulebook that governs EU financial markets and its supporting institutional arrangements. It is framed by an assessment of how the regime has evolved over the decade or so since the global financial crisis and considers, among other matters, the post-crisis reforms to key legislative measures, the massive expansion of administrative rulemaking and of soft law, the Capital Markets Union agenda, the development of supervisory convergence as the means for organizing pan-EU supervision, and ESMA's role in EU financial markets governance. Its coverage extends from capital-raising and the Prospectus Regulation to financial market intermediation and the MiFID II/MiFIR and IFD/IFR regimes, to the new regulatory regimes adopted since the global financial crisis (including for benchmarks and their administrators), to retail market regulation and the PRIIPs Regulation, and on to the EU's third country regime and the implications of the UK's departure from the EU. This is the fourth edition of the highly successful and authoritative monograph first published as EC Securities Regulation. Heavily revised from the third edition to reflect developments since the global financial crisis, it adopts the in-depth contextual and analytical approach of earlier editions and so considers the market, political, institutional, and international context of the regulatory and supervisory regime.

A Bank's Duty of Care Danny Busch, Cees van Dam, 2017-08-24 In recent years, an increasing number of clients and third parties have filed claims against banks such as for mis-selling financial products, poor financial advice, insufficient disclosure of and warning about financial risks. The scope of a bank's duty of care seems to expand, not only to include protection of consumers against unclear risks of complicated products but also protection of professional parties against more obvious risks of relatively straightforward products. This topic raises many questions, both at a theoretical and practical level. This book provides a rich source of information about how various jurisdictions (Germany, Austria, France, Italy, Spain, the Netherlands, England and Wales, Ireland, and the United States of America) deal with these questions and how answers are found or embedded in their national legal systems. The book also contains a detailed chapter on the MiFID I and II conduct-of-business provisions. Finally, the book provides a thorough comparative analysis and perspective.

Regulating Primary Markets in the Capital Markets Union Konstantinos Serdaris, 2025-01-09 Stay ahead of the curve with this essential book, offering a concise, comprehensive and up-to-date analysis of the Prospectus Regulation (including its recent amendment by the EU Listing Act) and the pathbreaking Regulation on European Crowdfunding Service Providers (ECSPR). Placing the discussion in the context of the Capital Markets Union (CMU), this book provides a fresh and insightful perspective on the ever-evolving regulatory landscape of EU primary capital markets, setting out a practical roadmap for achieving effective and inclusive regulation. With a keen focus on the dynamic relationship between legal uniformity and differentiation, the book addresses 2 pivotal questions: how can the imperative of investor protection be balanced with the goal of providing businesses with improved and cost-effective access to EU primary securities markets, and how can the pursuit for greater unification be practically reconciled with the growing demand for regional solutions in a post-Brexit era?

Unveiling a unique normative framework, the book provides a holistic perspective; it explores the underlying objectives and intricate complexities of the CMU, critically evaluates the transformative potential of regulatory actions, sheds light on potential inconsistencies, and offers insightful suggestions for future reforms. A must-read for policymakers, scholars, legal practitioners and anyone seeking to comprehend the current and emerging challenges in the regulation of EU primary capital markets.

Capital Markets Union and Beyond Franklin Allen, Ester Faia, Michael Haliassos, Katja Langenbucher, 2024-03-12 Experts from economics, finance, law, policy, and banking discuss the design and implementation of a future capital market union in Europe. The plan for further development of Europe's economic and monetary union foresees the creation of a capital market union (CMU)—a single market for capital in the entire Eurozone. The need for citizens and firms of all European countries to have access to funding, together with the pressure to improve the efficiency and risk-sharing opportunities of the financial system in general, put the CMU among the top priorities on the Eurozone's agenda. In this volume, leading academics in economics, finance, and law, along with policy makers and practitioners, discuss the design and implementation of a future CMU. Contributors describe the key design challenges of the CMU; specific opportunities and obstacles for reaching the CMU's goals of increasing the economic well-being of households and the profitability and viability of firms; the role that markets—from the latest fintech developments to traditional equity markets—can play in the future success of CMU; and the institutional framework needed for CMU in the aftermath of the global recession. Contributors Sumit Agarwal, Franklin Allen, Valentina Allotti, Gene Amromin, John Armour, Geert Bekaert, Itzhak Ben-David, Marcello Bianchi, Lorenzo Bini-Smaghi, Claudio Borio, Franziska Bremus, Marina Brogi, Claudia M.
