In 1923, an American named Delapore, the last descendant of the De la Poer family, moves to his ancestral estate in England following the death of his only son during World War I. To the dismay of nearby residents, he restores the estate, called Exham Priory. After moving in, Delapore and his cat frequently hear the sounds of rats scurrying behind the walls. Upon investigating further, and through recurring dreams, Delapore learns that his family maintained an underground city for centuries, where they raised generations of human cattle—some regressed to a quadrupedal state—to supply their taste for human flesh. This was stopped when Delapore's ancestor killed his entire family in their sleep and left the country in order to end the horror, leaving the remaining human livestock and a surviving relative to be devoured by the rats inhabiting the city's cesspits. Maddened by the revelations of his family's past, a hereditary cruelty and his anger over his son's death, Delapore attacks one of his friends in the dark of the cavernous city and begins eating him while rambling in a mixture of Middle English, Latin, and Gaelic, before devolving into a cacophony of animalistic grunts. He is subsequently subdued and placed in a mental institution. At least one other investigator, Thornton, has gone insane as well. Soon after, Exham Priory is destroyed and the investigators decide to cover up the existence of the city. Delapore maintains his innocence, proclaiming that it was the rats, the rats in the walls, who ate the man. He continues to be plagued by the sound of rats in the walls of his cell. The Rats in the Walls H. P. Lovecraft, 2014-12-13 The Rats in the Walls is a short story by American horror fiction writer H. P. Lovecraft. Howard Phillips Lovecraft (August 20, 1890 - March 15, 1937) - known as H.P. Lovecraft - was an American author who achieved posthumous fame through his influential works of horror fiction. Virtually unknown and only published in pulp magazines before he died in poverty, he is now regarded as one of the most significant 20th-century authors in his genre. Lovecraft was born in Providence, Rhode Island, where he spent most of his life. His father was confined to a mental institution when Lovecraft was three years old. His grandfather, a wealthy businessman, enjoyed storytelling and was an early influence. Intellectually precocious but sensitive, Lovecraft began composing rudimentary horror tales by the age of eight, but suffered from overwhelming feelings of anxiety. He encountered problems with classmates in school, and was kept at home by his highly strung and overbearing mother for illnesses that may have been psychosomatic. In high school, Lovecraft was able to better connect with his peers and form friendships. He also involved neighborhood children in elaborate make-believe projects, only regretfully ceasing the activity at seventeen years old. Despite leaving school in 1908 without graduating - he found mathematics particularly difficult - Lovecraft had developed a formidable knowledge of his favored subjects, such as history, linguistics, chemistry, and astronomy. Although he seems to have had some social life, attending meetings of a club for local young men, Lovecraft, in early adulthood, was established in a reclusive 'nightbird' lifestyle without occupation or pursuit of romantic adventures. In 1913 his conduct of a long running controversy in the letters page of a story magazine led to his being invited to participate in an amateur journalism association. Encouraged, he started circulating his stories; he was 31 at the time of his first publication in a professional magazine. Lovecraft contracted a marriage to an older woman he had met at an association conference. By age 34, he was a regular contributor to newly

founded *Weird Tales* magazine; he turned down an offer of the editorship. Lovecraft returned to Providence from New York in 1926, and over the next nine months he produced some of his most celebrated tales including *The Call of Cthulhu*, canonical to the Cthulhu Mythos. Never able to support himself from earnings as author and editor, Lovecraft saw commercial success increasingly elude him in this latter period, partly because he lacked the confidence and drive to promote himself. He subsisted in progressively straitened circumstances in his last years; an inheritance was completely spent by the time he died at the age of 46.

Finding Places: The Search For The Brain's Gps Unni Eikeseth, 2020-03-23 Finding Places tells the story of the groundbreaking discovery of the cells that constitute the brain's positioning system — its GPS. The book takes you into the lab of neuroscientists May-Britt and Edvard Moser and lets you experience the work of the many researchers who revealed how certain incredible cells help rats and humans find their way. It details the discovery of the mind-boggling 'grid cells', which generate a hexagonal coordinate system and enable precise positioning and pathfinding. While giving a unique insight into the research process, the author also conveys what these insights mean for you and me. Have you ever wondered how your brain knows where you are, why your memories are tied to places, or why Alzheimer's disease causes people to lose their

sense of place? These questions and many more are answered in this book. The author's goal is not only to document a fascinating scientific achievement that has revolutionized our understanding of the brain, but also to offer insight into the nature of science, and the imagination and creativity that lie behind topnotch research.
